CITY CONTRACT NO: 20140969

**AGREEMENT FOR PROFESSIONAL ON-CALL ENGINEERING SERVICES
FOR VARIOUS CITY DEPARTMENTS**

This AGREEMENT ("Agreement") is made effective as of the date of execution by all parties, and is made by and between the **CITY OF SPRINGFIELD**, a Massachusetts municipal corporation with a principal office at 36 Court Street, Springfield, Massachusetts 01103, acting by and through its Chief Administrative and Financial Officer, and Director of Capital Asset Construction, with the approval of its Mayor, (hereinafter called the "**OWNER**" or "**City**"), and **GZA GEOENVIRONMENTAL, INC.**, a Massachusetts corporation with a usual place of business at 1350 Main Street, Suite 1400, Springfield, MA 01103 (hereinafter called the "**ENGINEER**").

WITNESSETH:

WHEREAS, the owner desires to retain a multidisciplinary Engineering firm to provide Professional Engineering Services on an "On Call" basis for various City projects; and

WHEREAS, the City issued a Request for Qualifications for On-Call Engineering Services for the Dept. of Capital Asset Construction (Bid No. SPG-14-134) and various City departments, and selected the ENGINEER for the award of a contract; and

WHEREAS, the ENGINEER represents and warrants that the ENGINEER, and its subsidiary organizations and subcontractors, meet the criteria set forth in Bid No. SPG-14-134 and that the ENGINEER possesses the necessary knowledge and experience to perform the Work and services herein described; and

WHEREAS, the OWNER desires to retain the ENGINEER on the terms and conditions set forth in this Agreement and the ENGINEER has agreed to accept such terms and conditions;

NOW, THEREFORE, in consideration of the mutual covenants and agreements hereinafter contained, the parties hereto do hereby agree as follows:

ARTICLE 1: TERM

The term of this AGREEMENT shall be for an initial period of ONE (1) year starting with the effective date. The OWNER in its sole discretion shall have the option to extend this AGREEMENT on a yearly basis for up to two (2) additional one-year terms. The OWNER will notify the ENGINEER of any renewal in writing approximately sixty (60) days prior to the expiration of the preceding contract term.

ARTICLE 2: SCOPE OF SERVICES

A) On Call Engineering Services are to be provided only at the request of the Owner, acting through its Department of Capital Asset Construction and various other departments, as described in the City's "Request for Qualifications/Proposals for On Call Engineering Services (Bid No. 14-134)", which is attached hereto as Appendix F and incorporated herein by reference. Services will be requested on an as needed basis, and the Owner is not required to request any services. The Owner retains the right to procure engineering services otherwise than by this Agreement.

B) The ENGINEER agrees to furnish the OWNER with the following general engineering services on an "as needed" basis, :

- 1) Consultation and advice;
- 2) Feasibility Studies;
- 3) Field Investigation and Engineering Data Collection;
- 4) Engineering Reports;
- 5) Land Surveying;
- 6) Construction Cost Estimating;
- 7) Design Services, whole or in part;
- 8) Construction Management and Inspection;
- 9) Materials Testing;
- 10) Value Engineering;
- 11) Expert Testimony;
- 12) Environmental Assessments and Permitting;
- 13) Sustainability Design;
- 14) Preparation of O&M Manuals;
- 15) State of Federal Agency Mandate Compliance.

C) The ENGINEER may be required to accomplish projects which are too large for execution by the OWNER and /or which require special expertise including but not limited to the following:

- 1) Architectural Services;
- 2) Materials Testing
- 3) Aerial Surveys;
- 4) Bridge Engineering;
- 5) Composting;
- 6) Construction Inspection & Administration;
- 7) Construction Management;
- 8) Dam Studies and Designs
- 9) Electrical Engineering;
- 10) Environmental Permitting;
- 11) Environmental Sciences and engineering;
- 12) Geographic Information Systems;

- 13) Flood Control Systems;
- 14) Highway and Street Engineering;
- 15) Lake and Pond Management Studies and Analyses
- 16) Land Surveying;
- 17) Building Inspections and Assessments;
- 18) Mechanical Engineering;
- 19) Pavement Management;
- 20) Plumbing Engineering
- 21) Solid Waste Management;
- 22) Traffic Engineering;
- 23) Hazardous Material;
- 24) Geotechnical Engineering;
- 25) Value Engineering;
- 26) Project Planning.

- D) The ENGINEER will provide a wide range of design and specialized consulting services through the medium of an appropriately staffed division or subsidiary organizations or subcontractors. The ENGINEER shall require that the subsidiary organizations or subcontractors be directed by a professional engineer with the requisite training and experience in the specialized field. The ENGINEER always retains the primary responsibility for all aspects of the projects as assigned.
- E) The ENGINEER will at all times employ, maintain, and assign to the performance of a project a sufficient number of competent and qualified professional and other personnel to meet the project requirements.
- F) The ENGINEER shall establish and maintain a Quality Assurance Plan setting forth the ENGINEER'S policy for quality assurance and procedures for implementing that policy. The Quality Assurance Plan must apply to all employees, subsidiaries, and subcontractors engaged in work for the project and must include regular and written procedures for performance of all Project activities, and provide sufficient information to senior management to enable effective supervision of the Project. The existence of the Quality Assurance Plan does not diminish in any way the responsibility of the ENGINEER to perform all work according to the highest standards of professional care.
- G) The ENGINEER shall maintain an effective internal control system sufficient to provide controls on Design review, quality assurance, project scheduling, personnel allocation, and financial control.
- H) CHANGES: The OWNER may make or approve changes within the general scope of services in this AGREEMENT. If such changes affect the ENGINEER'S cost or the time required for performance of the services, an equitable adjustment mutually agreeable to the OWNER and ENGINEER will be made through an amendment to this AGREEMENT. The ENGINEER is required to make a timely written request for any such changes being requested by the ENGINEER.

- D) The ENGINEER must have an office location in Massachusetts, and a prime work location within 50 miles of the City of Springfield.

ARTICLE 3: PROJECT ORDERS

- A) FURNISH ALL SERVICES DESCRIBED HEREIN IN ACCORDANCE WITH THE FOLLOWING OVERALL OBJECTIVES:

The Engineer shall provide services as may be required and requested by the Owner. Provision of these services is to be accomplished under a series of definitive written Project Orders, from the Owner to the ENGINEER, in the form attached hereto as Appendix A. The Project Order will identify the work to be accomplished; the limit of compensation for each Project Order using the personnel labor rates contained in the ENGINEER'S rate schedule submitted with its Response to the RFQ, which is attached hereto as Appendix D; and the schedule for performing the scope of service. The City shall not be liable for services or work that is not requested by an authorized written Project Order.

- B) The procedure for implementing individual Project Orders shall be as follows:

- 1) THE ENGINEER shall be notified by the OWNER of the specific Project(s) to be performed, whereupon the ENGINEER and the OWNER shall mutually formulate a Scope of Services for each Project Order.
- 2) THE ENGINEER shall prepare a written proposal stating:
 - a) The Scope of Services;
 - b) The proposed schedule for completion;
 - c) The estimated staffing, number of man-hours for each profession, Direct labor costs, other direct costs (reimbursable expenses), and any other anticipated fees or costs associated with the accomplishment of the Project Order;
 - d) An estimated Lump Sum Not to Exceed fee, supported by a list of tasks and the estimated cost for each task identified, listing job classifications and man hours required in each job classification, based on hourly rates submitted with the ENGINEER's response to the RFQ for the Specific Project Order; and,
 - e) A detailed description and estimate of Direct Expenses the ENGINEER will incur on the Project, without markup;
 - f) A list of any materials or information required from the OWNER to complete the Project Order Scope of Services.
 - g) All matters that should be included in a Project Order;

See Paragraph 3(C) below.

- 3) Following OWNER review and approval of the ENGINEER's proposal, the agreed upon terms and provisions shall be prepared in Project Order format (Appendix A) and duly executed by both parties. Only the Department Head of the applicable City Department shall have the authority to execute a Project Order on behalf of that department.

- 4) No work is authorized on the Project Order until the Engineer has received a Notice to Proceed from the OWNER for the specific Task. Such authorization shall be in the form of a written letter signed by the Department Head of the applicable City Department. Any work performed prior to receiving such Notice to Proceed shall be at the ENGINEER'S risk. No work on the final design of any project shall be performed by the ENGINEER without the prior written authorization of the OWNER. All requests for change orders to the Project Order must be made in writing and timely (within ten calendar days of the precipitating event or receipt of information) by the ENGINEER or be considered waived.
 - 5) For the purposes of this entire contract, Owner authorization or approval shall mean written approval signed by the Department Head of the applicable department. No other employee of the applicable City department shall have the authority to authorize or approve any terms, conditions, or changes to Project Orders or this Agreement.
- C) INFORMATION TO BE INCLUDED IN THE ENGINEER'S PROPOSAL FOR THE PROJECT ORDER:
- 1) The total estimated engineering cost, along with an hourly rate fee schedule, must be included for the different job classifications that will be assigned to the project. Individual employee salaries are not required.
 - 2) A summary, by task, of the man-hours projected for each job classification to be assigned to the project shall also be included along with a statement that the fee schedule shall remain valid for the length of the contract.
 - 3) The ENGINEER is required to certify in writing in the proposal that the total estimated engineering cost is based on a Lump Sum "not to exceed" basis which will include all expenses, and that amount will not be exceeded without prior written authorization from the OWNER.
 - 4) Increases or decreases in the scope of the project may result in an adjustment to the approved Lump Sum fee. Authorization to increase the approved Lump Sum fee will not be considered unless it can be clearly established that actual work is required beyond the currently approved scope of work.
 - 5) The work associated with the total project shall be divided into various project tasks, along with the estimated cost for each task identified.
 - 6) The ENGINEER must provide a time schedule, in bar graph form, from the notice to proceed to completion of the various tasks, as well as a statement requiring that the ENGINEER obtain written approval from the OWNER prior to proceeding into the Final Design phase.

- 7) The ENGINEER shall provide a statement establishing the length of the contract.
 - 8) The ENGINEER shall include a copy of the proposed Organization Chart for the Project for the OWNER'S approval. The Organization Chart shall delineate the names, titles, and job duties of all the ENGINEER'S employees as well as any sub-consultants/subcontractors responsible for performance under the Project.
 - 9) The ENGINEER shall designate in writing one person for each Project who, on the ENGINEER'S behalf, shall be responsible for directing and coordinating all of the services to be rendered by the ENGINEER under the Project. Such designee shall be subject to the approval of the OWNER based on the experience and professional licensing requirements.
 - 10) A description of the ENGINEER'S proposed approach and methods of operation for accomplishing the work of the project.
 - 11) The ENGINEER shall include a statement that all work on the project shall be performed in accordance with the provisions in this document unless otherwise noted. The ENGINEER shall comply with the OWNER'S Request for Qualifications (Appendix D), the OWNER's Engineering Specifications/ Guidelines-December 1991 (**Appendix B**) and Hampden County Registry of Deeds Plan Regulations (**Appendix C**).
 - 12) The ENGINEER shall indicate an estimated maximum number of record plats that will be required and the fee per plat. The ENGINEER shall include a statement that final fee for this task shall be adjusted based on the actual number of plats prepared.
 - 13) Unless otherwise noted, the original and two (2) copies of the proposal shall be submitted to the Director of the appropriate City department. Original signatures must appear on all copies of the proposal submitted.
- D) The OWNER will review the ENGINEER's proposal, and if approved by the Owner, the agreed upon terms and provisions shall be prepared by the Owner in Project Order format (attached hereto as **Appendix A**) and duly executed by all necessary parties. Only the Director shall have authority to execute a Project Order on behalf of the Department.
- E) No work is authorized on the Project Order until the ENGINEER has received a Notice to Proceed from the OWNER for the specific project and the Project Order is signed by all necessary parties. Any work performed by the ENGINEER prior to receiving such Notice to Proceed shall be at the ENGINEER's sole risk and expense.
- F) PAYMENT FOR PROJECT ORDERS:
- 1) The method of payment shall be the Lump Sum "not to exceed" basis, including expenses, in accordance with Article 4 of this Agreement, with monthly billing based on work performed. Concise progress reports must be submitted with each payment request

stating work completed and the status of the various project tasks. Payment requests shall correspond directly with the project tasks as outlined in the proposal. The following provisions shall be applicable to these payments:

- a) Progress payments will be made up to ninety-five (95%) percent of the total Lump Sum amount.
- b) The remaining five (5%) percent of the total Lump Sum amount will be paid following final acceptance of the completed design documents, report or project deliverable to the Director of the applicable City department. The Date of Final Acceptance shall be determined solely by the Director of the applicable City Department.
- c) At such time that either the payment request or the actual work completed reaches fifty (50 %) percent of the total amount, the ENGINEER and the OWNER shall meet to review the project status and projected completion schedule.
- d) The following statement is to be included on all invoices:

"I certify that the amount of this invoice is just and correct and in accordance with the terms of the contract, and payment thereof has not been previously received."

Signature: _____
Title: _____
Date: _____

ARTICLE 4: COMPENSATION

- A) All obligations of the OWNER are subject to the prior appropriation to meet said obligations.
- B) The OWNER is not obligated for any compensation or any expenses of any kind unless the OWNER has given prior approval therefore.
- C) Compensation by the OWNER to the ENGINEER will be as follows:
 - 1) A FIXED LUMP SUM, "NOT TO EXCEED" FEE FOR EACH PROJECT, INCLUDING ALL EXPENSES; ALL OF THE CITY'S OBLIGATIONS UNDER THIS AGREEMENT SHALL BE SUBJECT TO THE PRIOR APPROPRIATION OF FUNDS FOR SUCH OBLIGATION.
 - 2) The Not to Exceed Fee for each project shall be based on the rates contained in the ENGINEER'S Price Proposal attached hereto as **Appendix E**:
 - 3) For any extension terms, if the OWNER and the ENGINEER do not agree to maintain

the rates as set forth in Appendix E, then the Consumer Price Index (C.P.I.U.), The United States City Average-All Urban Consumers, as determined by the Bureau of Labor Statistics, shall be utilized for any price adjustment from the previous year's prices. The compensation for extension terms will not increase greater than the C.P.I.U. for the previous twelve (12) months. This index will be computed two (2) month prior to the expiration of this Agreement.

D) BUDGET:

1. A total not to exceed first year budgetary amount of FIVE HUNDRED THOUSAND DOLLARS (\$500,000.00) is hereby established for services in ARTICLE 2.
2. Each Project Order will be executed as a written amendment to this Agreement and will contain a not to exceed fee for that Project, which will be subject to appropriation. The ENGINEER will make every reasonable effort to complete the work on assigned projects within the project budget, and will keep the OWNER informed of progress toward that end so that the budget or work effort can be adjusted if found necessary.
3. The ENGINEER is not obligated to incur costs beyond the not to exceed fee, as may be adjusted, nor is the OWNER obligated to pay the ENGINEER in excess of the not to exceed fee.
4. When any budget has been increased, the ENGINEER'S excess costs expended prior to such increase will be allowable to the same extent as if such costs had been incurred after the approved increase, provided the OWNER has approved such excess costs.

E. DEFINITIONS

1. DIRECT SALARIES:
Direct Salaries are the amount of wages or salaries paid to the ENGINEER'S employees for work directly performed on the PROJECT, exclusive of all payroll-related taxes, payments, premiums, and benefits. The ENGINEER may not mark-up direct salaries. Compensation amounts shall be consistent with the ENGINEER's rate schedule in response to the RFQ (Appendix E).
2. SALARY COSTS:
Salary Costs are the amount of wages or salaries paid ENGINEER'S employees for work directly performed on the PROJECT. Such costs are determined by the ENGINEER'S price proposal attached hereto as Appendix E.
3. DIRECT EXPENSES:
Direct Expenses are those costs incurred on, or directly for, the PROJECT, including but not limited to: necessary transportation costs, including mileage at ENGINEER'S current rate when its automobiles are used, meals and lodging, laboratory tests and analyses, computer services, word processing services,

telephone, printing, binding and reproduction charges, all costs associated with outside consultants, sub-consultants, and other outside services and facilities, and other similar costs. Reimbursement for Direct Expenses will be on the basis of actual charges, without any mark up. A 5% fee may be added to all subcontractors costs.

ARTICLE 5: TERMS OF PAYMENT FOR PROGRESS PAYMENTS FOR PROJECT ORDERS

- A. It is anticipated that progress payments for each Project Order shall be made to the ENGINEER monthly. The ENGINEER shall not be paid more for any Project Order at any time than would be due on a percentage of completion basis with respect to that Project Order as determined by the OWNER.
- B. The OWNER need not process a request by the ENGINEER for payment unless the ENGINEER submits invoices meeting the following conditions:
1. Proper Invoice: In addition to any other requirement set forth in this contract with respect to what constitutes a proper invoice or for the ENGINEER to be entitled to receive payment, the ENGINEER's invoice, in triplicate, must set forth the following:
 - a. A description, with specificity, of the goods delivered, work performed, services rendered, or other event initiating entitlement to payment pursuant to the terms hereof.
 - b. That portion of the contract price related to such payment less any deductions, such as retainage, required pursuant to the terms hereof.
 - c. The contract number and purchase order number: Should the invoice not be calculated correctly, such as not taking into account retainage as a deduction, the OWNER may either reject the invoice or treat the invoice as proper only to the extent of the correct calculation.
 - d. Should the invoice not be calculated correctly, the OWNER may either reject the invoice or treat the invoice as proper only to the extent of the correct calculation of the amount thereof.
 - e) The invoice is to be delivered to,

Office of the Department of Capital Asset Construction
Attn: Director of DCAC
City of Springfield
36 Court Street, Room 309

Springfield, MA 01103

2. Supporting Documentation: In addition to any other requirement set forth in this contract with respect to what supporting documentation must accompany an invoice, the following documents must be attached to any invoice submitted by the ENGINEER:
 - a. A complete itemized listing of all employees, by name, with and itemization of hours worked and hourly rates.
 - b. Out-of-Pocket Expenses: A summary showing all charges that are actual and are in conformity with the contract and have not previously been charged. In addition, copies of paid invoices are required.
 - c. Such other supporting documentation as the sub-consultant's payment forms and support, or similar.
 - d. For contracts requiring payment upon milestones of performance, a certificate, or equivalent document, that the milestone has been achieved.
 - e. Any other documentation reasonably requested by the OWNER.

ARTICLE 6: OBLIGATIONS OF THE ENGINEER

Amendments to ARTICLE 6, if any, will be included in the Project Order.

A. ENGINEER'S Representations: By entering into this Agreement with the OWNER, the ENGINEER represents and warrants the following:

1. That the ENGINEER is experienced in and competent to perform the type of work required;
2. That the ENGINEER is financially solvent, able to pay the ENGINEER'S debts as they mature, and possesses sufficient working capital to initiate and complete the work required under the Agreement;
3. That the ENGINEER is familiar with all Federal, State, County, Municipal and departmental laws, ordinances, permits, regulations and resolutions applicable to the work which may in any way affect the work of those employed therein, including but not limited to any special acts relating to the work or any part thereof;
4. That such temporary and permanent work required by the Contract which is to be done by the ENGINEER will be satisfactorily performed;

5. That the ENGINEER will fully comply with all requirements in the Agreement;
6. That the ENGINEER will perform the work consistent with sound Project Management practice, good workmanship, and sound business practices, and in the most expeditious and economical manner consistent with such standards and OWNER'S interests.
7. That the ENGINEER will furnish efficient business administration and experienced management and an adequate supply of employees at all times;
8. That the ENGINEER will complete the work within the Project/Task Time, milestones, and price unless adjusted by agreement of the parties hereto.

B) SUBSURFACE INVESTIGATIONS:

In soils, foundation, groundwater, and other subsurface investigations, the actual characteristics may vary significantly between successive test points and sample intervals and at locations other than where observations, explorations, and investigations have been made. Because of the inherent uncertainties in subsurface evaluations, the OWNER and the ENGINEER acknowledge that changed or unanticipated underground conditions may occur that could affect total PROJECT cost and/or execution. The ENGINEER shall use the ENGINEER'S best efforts to keep the OWNER fully apprised regarding subsurface conditions.

C) ENGINEER'S PERSONNEL AT CONSTRUCTION SITE:

- 1) The presence or duties of the ENGINEER'S personnel at a construction site, whether as onsite representatives or otherwise, do not make the ENGINEER or its personnel in any way responsible for those duties that belong to the OWNER and/or the construction contractors or other entities, and do not relieve the construction contractors or any other entity of their obligations, duties and responsibilities, including, but not limited to, all construction methods, means, techniques, sequences and procedures necessary for coordination and completing all portions of the construction work in accordance with the Contract Documents and any health or safety precautions required by such construction work.
- 2) The ENGINEER and its personnel have no authority to exercise any control over any construction contractor or other entity or their employees in connection with their work or any health or safety precautions and have no duty for inspecting, noting, observing, correcting or reporting on health or safety deficiencies of the construction contractor or other entity or any other persons at the site except ENGINEER'S own personnel.

D) OPINIONS OF COST, FINANCIAL CONSIDERATIONS, AND SCHEDULES:

In providing opinions of cost, financial analyses, economic feasibility projections, and schedules for the PROJECT, the ENGINEER has no control over cost or price of labor and materials; unknown or latent conditions of existing equipment or structures that may affect operation or maintenance costs; competitive bidding procedures and market conditions; time or quality of performance by third parties; quality, type, management, or direction of operating personnel; and other economic and operational factors that may materially affect the ultimate PROJECT cost or schedule. Therefore, the ENGINEER makes no warranty that the OWNER'S actual PROJECT costs, financial aspects, economic feasibility or schedules will not vary from the ENGINEER'S opinions, analyses, projections or estimates. When the OWNER requires the ENGINEER to prepare quantity and material take-offs and/or opinions of cost from plans and specifications that are less than one hundred (100%) percent complete, the ENGINEER will not be responsible for any and all loss, liability or claims resulting from the incompleteness.

E) CONSTRUCTION PROGRESS PAYMENTS:

Recommendations by the ENGINEER to the OWNER for periodic construction progress payments to the construction contractor will be based on the ENGINEER'S knowledge, information, and belief from selective sampling that the work has progressed to the point indicated. Such recommendations do not represent that continuous or detailed examinations have been made by the ENGINEER to ascertain that the construction contractor has completed the work in exact accordance with the contract documents; that the final work will be acceptable in all respects; that the ENGINEER has made an examination to ascertain how or for what purpose the construction contractor has used the monies paid; that title to any of the work, materials, or equipment has passed to OWNER free and clear of liens, claims, security interests, or encumbrances; or that there are not other matters at issue between OWNER and the construction contractor that affect the amount that should be paid.

F) RECORD DRAWINGS:

Record drawings, if required, will be prepared, in part, on the basis of information compiled and furnished by others, and may not always represent the exact locations, type of various components, or exact manner in which the PROJECT was finally constructed. The ENGINEER is not responsible for any errors or omissions in the information from others that are incorporated into the record drawings as long as the ENGINEER reasonably believes such information to be correct.

G) ACCESS TO ENGINEER'S ACCOUNTING RECORDS:

Right to Audit: The Engineer shall maintain books, records, and accounts of all costs in accordance with generally accepted accounting principles and practices. The OWNER or its authorized representative shall have the right to audit the books, records, and accounts of the ENGINEER under any of the following conditions:

- 1) If the Contract is terminated for any reason in accordance with the provisions of these Contract Documents in order to arrive at equitable determination of costs;
- 2) In the event of a disagreement between the ENGINEER and the OWNER on the amount due the ENGINEER under the terms of this Contract;
- 3) To check or substantiate any amounts invoiced or paid which are required to reflect the costs of the ENGINEER, or the ENGINEER's efficiency or effectiveness under this Contract or in connection with extras, changes, additions, back charges, or other, as may be provided for in this Contract; and/or
- 4) If it becomes necessary to determine the OWNER'S rights and the ENGINEER'S obligations under the Contract or to ascertain facts relative to any claim against the ENGINEER which may result in a charge against the OWNER.
- 5) To provide any required information to a funding source of the OWNER.
- 6) Under these stated conditions, The OWNER shall have unlimited access during normal working hours to the ENGINEER'S books and records for an audit; and the ENGINEER shall cooperate with the performance of the audit including but not limited to providing copies of requested documents.

H) ENGINEER'S INSURANCE:

The ENGINEER will maintain at a minimum throughout this AGREEMENT the following insurance:

- 1) Worker's compensation and employer's liability insurance as required by the state or province where the work is performed.
 - 2) Comprehensive automobile and vehicle liability insurance covering claims for injuries to members of the public and/or damages to property of others arising from use of motor vehicles, including onsite and offsite operations, and owned, non-owned, or hired vehicles, with \$1,000,000 combined single limits.
 - 3) Commercial general liability insurance covering claims for injuries to members of the public or damage to property of others arising out of any covered act or omission of the ENGINEER or of any of its employees, agents, or subcontractors, with \$1,000,000 combined single limits.
 - 4) Professional liability insurance of \$2,000,000.
 - 5) OWNER will be named as an additional insured with respect to liabilities hereunder in insurance coverages identified in items "2" and "3", and ENGINEER waives subrogation against OWNER as to said policies.
- I) If the ENGINEER claims that the ENGINEER or any of its subsidiaries or sub-contractors is held up or cannot perform the work because of a failure on the part of the OWNER, then the ENGINEER must timely (within ten calendar days of the knowledge of this failure) and in writing inform the OWNER of this fact or the claim is considered waived.

J) CONTRACTOR INDEMNIFICATION:

Regarding all Construction Contracts for which the ENGINEER provides assistance to the

OWNER, the ENGINEER agrees to include the following paragraph in all such construction contracts for the Owner that are associated with this project.

- 1) It is mutually covenanted and agreed that the relationship of the Contractor and the OWNER to the work to be performed by the Contractor under this Contract shall be that of an independent contractor. The Contractor will be responsible for all damages, loss or injury, including death, to persons or property that may arise or be incurred in or during the conduct and progress of said work and as the result of any action, omission or operation under the Contract or in connection with the Work under the Contract, whether such action, omission or operation is attributable to the Contractor, the Subcontractor, any material supplier, anyone directly or indirectly employed by any of them, or any other person. The Contractor shall make good any damages that may occur in consequence of the Work or any part of it. The Contractor shall assume all liability, loss and responsibility of whatsoever nature by reason of his neglect or violation of any Federal, State, County, or local laws, regulations, or ordinances.
- 2) The Contractor shall indemnify, hold harmless, and defend the OWNER and ENGINEER, their employees, agents, servants, and representatives from and against any and all claims, suits, demands, actions, costs (including attorney's fees) and damages of whatever nature, regardless of the merit thereof, which may be asserted against the OWNER and/or ENGINEER on account of any such damages or injuries, including death, arising out of or resulting from the performance of the Contractor's Work or the failure to perform the Contractor's Work, including jurisdictional labor disputes or other labor troubles that may occur during the performance of the Contractor's Work, whether or not such damages or injuries, including death, are caused in part by the negligence of the OWNER and/or ENGINEER, their employees, agents, servants, or representatives; provided, however, that the Contractor shall not be obligated to indemnify the OWNER and/or ENGINEER hereunder for any damages or injuries, including death, caused by or resulting from the sole negligence of the OWNER and/or ENGINEER.
- 3) The indemnification obligations under this Article shall not be affected in any way by any limitation on the amount or type of damages, compensation or benefits payable by or for the Contractor or Subcontractor under worker's or workman's compensation acts, disability benefit acts, or other employee benefit acts.
- 4) The obligations of the Contractor under this Article shall not extend to the liability of the ENGINEER, his agents, or employees, arising out of: (1) the preparation or approval of maps, drawings, opinions, reports, surveys, change orders, designs, or specifications, or (2) the giving of or the failure to give directions or instructions by the ENGINEER, his agents or employees provided such giving or failure to give is the primary cause of the injury or damage.
- 5) The above indemnification language will be the standard provisions included in OWNER'S Construction Contract Documents.

K) LITIGATION ASSISTANCE:

The Scope of Services will include services of the ENGINEER for required or requested assistance to support, prepare, document, bring, defend, or assist in litigation undertaken or defended by the OWNER. All such services required or requested of the ENGINEER, except for suits or claims between the parties to this AGREEMENT, will be reimbursed as mutually agreed, and payment for such services shall be in accordance with ARTICLE 5.

L) SERVICES OF ENGINEER:

The OWNER'S specifications/guidelines for typical land survey, street design and/or drainage design are included in Appendix B. Unless this Agreement is modified or terminated, the OWNER will have all services specified in this AGREEMENT performed by the ENGINEER, employing OWNER'S standard form and content of drawings and specifications except as may be modified in the Project Order. The ENGINEER shall also comply with the Registry of Deeds Plan Regulations (Appendix C).

ARTICLE 7: OBLIGATIONS OF THE OWNER:

Amendments to ARTICLE 7, if any, will be included in the Project Order.

A. OWNER-FURNISHED DATA:

The OWNER may provide to the ENGINEER all technical data in the OWNER'S possession, including, but not limited to, previous reports, maps, surveys, borings, and all other information relating to the ENGINEER'S services on the PROJECT. The ENGINEER may, where reasonable, rely upon the accuracy, timeliness, and completeness of the information provided by the OWNER.

B. ACCESS TO FACILITIES AND PROPERTY:

The OWNER will make its facilities accessible to the ENGINEER as required for the ENGINEER'S performance of its services and will provide labor and safety equipment as required by the ENGINEER for such access. The OWNER will perform, at no cost to ENGINEER, such tests of equipment, machinery, pipelines, and other components of the OWNER'S facilities as may be required in connection with ENGINEER'S services, unless otherwise agreed to.

C. ADVERTISEMENTS, PERMITS, AND ACCESS:

Unless otherwise agreed in the Scope of Services, the OWNER will obtain, arrange, and pay for all advertisements for bids, permits and licenses required by local, state, province, or federal authorities; and land, easements, right-of-way, and access necessary for the ENGINEER'S services or PROJECT construction.

D. TIMELY REVIEW:

The OWNER may examine the ENGINEER'S studies, reports, sketches, drawings,

specifications, proposals, and other documents; and may obtain advice of an attorney, insurance counselor, accountant, auditor, and other consultants as the OWNER deems appropriate; and render in writing decisions required of OWNER in a timely manner. Such review or examination shall not diminish the ENGINEER'S responsibilities under this Agreement.

E. PROMPT NOTICE:

The OWNER will give prompt written notice to ENGINEER whenever the OWNER observes or becomes aware of any development that affects the scope or timing of ENGINEER'S services, or any defect in the work of the ENGINEER or construction contractors. The giving or failure to give such notice shall not diminish the ENGINEER'S responsibilities under this Agreement.

F. DISPUTES

The Director of Department shall decide on all matters of contract dispute as raised by the ENGINEER, except such matters which this contract states are the duty of the ENGINEER to determine.

G. NOTIFICATION OF DELAY:

If the ENGINEER claims that the ENGINEER is delayed or cannot perform the work because of a failure on the part of the OWNER, then the ENGINEER must timely (within ten calendar days of the knowledge of this failure) and in writing inform the OWNER of this fact, and the period of delay, or approximate period of delay if not then known, or the claim shall be considered waived.

H. ASBESTOS OR HAZARDOUS SUBSTANCES AND INDEMNIFICATION:

If asbestos or unanticipated hazardous substances in any form are encountered or suspected, the ENGINEER shall immediately notify the OWNER and may stop its own work in the affected portions of the PROJECT to permit testing and evaluation of the problem. If asbestos is suspected, the ENGINEER will, if requested, assist the OWNER in contacting regulatory agencies and in identifying asbestos testing laboratories and demolition/removal contractors or consultants. If asbestos is confirmed, the OWNER may engage a specialty consultant or contractor to study the affected portions of the work and perform all remedial measures. If unanticipated hazardous substances other than asbestos are suspected, the ENGINEER may conduct tests as directed by the OWNER to determine the extent of the problem and may perform the necessary studies and recommend the necessary remedial measures at an additional fee to be negotiated.

ARTICLE 8: GENERAL LEGAL PROVISIONS

Amendments to ARTICLE 8 if any, will be included in the Project Order.

A. EFFECTIVE DATE OF AGREEMENT:

This AGREEMENT shall become effective upon full execution by the authorized

representatives of the OWNER and the ENGINEER. The full execution of each Project Order by the authorized representatives of the OWNER and the ENGINEER, and a NOTICE TO PROCEED from the OWNER, will constitute authorization for ENGINEER to proceed with the work, unless otherwise provided for under this AGREEMENT.

B. REUSE OF PROJECT DOCUMENTS:

All designs, drawings, specifications, documents, and other Work Products of the ENGINEER are instruments of service for the PROJECT whether the PROJECT is completed or not and they become the property of the OWNER. The ENGINEER does not warrant or represent that any Work Products are suitable for use on any project other than this project, and that any such reuse without specific written authorization by the ENGINEER will be at the sole risk of the OWNER.

C. FORCE MAJEURE

The ENGINEER and the OWNER shall not be responsible for damages or delay in performance caused by acts of God, strikes, lockouts, or events within the exclusive control of the other party. Any party claiming a delay due to force majeure must notify the other party of the same within 2 business days, and the notice must contain a description of the force majeure event causing the delay, and a good faith estimate of the period of delay.

D. TERMINATION:

1. Termination of Contract by the OWNER for Cause:

If, through any cause, the ENGINEER shall fail to fulfill to the OWNER'S satisfaction in a timely and proper manner the ENGINEER'S obligations under this contract, or if the ENGINEER shall violate any of the covenants, agreements, or stipulations of this contract, the OWNER shall thereupon have the right to terminate this contract, by specifying the effective date thereof, in writing, at least five (5) days before the effective date of such termination. If the ENGINEER does not cure the default to the satisfaction of the OWNER within the five (5) day period, then the contract shall terminate. Upon termination, all finished or unfinished documents, data, studies, surveys, drawings, maps, models, and reports prepared by the ENGINEER under this contract shall be delivered by the ENGINEER to the OWNER within seven (7) days. The ENGINEER shall be entitled to receive just and equitable compensation for satisfactory and undisputed work completed prior to termination.

2. Termination of Contract by OWNER for Convenience:

This Agreement may be terminated without cause and for convenience by the OWNER by giving the ENGINEER thirty (30) calendar days written notice of termination signed by the Mayor or his designee, however, the ENGINEER shall be entitled to receive payment for all undisputed work satisfactorily completed up to the effective date of termination.

3. Remedies of the OWNER:

In addition to the right to terminate the contract, the OWNER shall also have the right to secure substitute services at the expense of the ENGINEER, require the ENGINEER to perform the promised services, withhold further payment from the ENGINEER until the services are performed, or, if applicable, call the ENGINEER's letter of Credit/Escrow Funds to the extent of the loss caused to or costs incurred by the OWNER as a result of the ENGINEER's failure to perform.

4. In the event of termination of this Agreement, at the option of the OWNER, all originals of documents, data, papers, studies and reports prepared by the ENGINEER immediately shall become OWNER property and immediately be delivered by the ENGINEER to the OWNER. In the event of such termination, the ENGINEER shall be entitled to receive just and equitable compensation for any satisfactory work performed as of the termination date.

E. SUSPENSION, DELAY OR INTERRUPTION OF WORK:

The OWNER may suspend, delay or interrupt the services of the ENGINEER for the convenience of the OWNER. In the event of force majeure or such suspension, delay, or interruption, an equitable adjustment in the PROJECT'S schedule, commitment and cost of ENGINEER'S personnel and subcontractors, and ENGINEER'S compensation will be made.

F. NO THIRD PARTY BENEFICIARIES:

This AGREEMENT gives no rights or benefits to anyone other than the OWNER and ENGINEER and has no third party beneficiaries.

G. INDEMNIFICATION:

The ENGINEER shall indemnify, defend with counsel acceptable to the OWNER, and hold the OWNER harmless from and against claims, liabilities, suits, loss, cost, expense, and damages to the extent arising from any act or omission of the ENGINEER, his employees, officers, agent, subcontractors and affiliates, in performance of the work and services pursuant to this contract. Such indemnification shall include, but not be limited to, claims of breach of contract or warranty, fault, tort, including negligence, strict liability, statutory or regulatory violations.

H. ASSIGNMENT:

Neither party shall have the right or authority to assign all or any part of this AGREEMENT without the prior written consent of the other party.

I. Reserved.

J. JURISDICTION:

This is a Massachusetts Contract. The law of the Commonwealth of Massachusetts shall govern the validity of the Agreement, its interpretation and performance, and other claims related to it. Any actions resulting from the interpretation or performance of or related in any way to this Agreement shall be brought in the Superior Court of Hampden County, Massachusetts sitting in Springfield, (except for claims by the City of a value less than \$25,000.00 which shall be brought in the District Court sitting in Springfield, Massachusetts), or the United States District Court for the District of Massachusetts, sitting in Springfield, Massachusetts.

K. SEVERABILITY AND SURVIVAL:

If any of the provisions contained in this AGREEMENT are held for any reason to be invalid, illegal, or unenforceable in any respect, such invalidity, illegality or unenforceability will not affect any other provision, and this AGREEMENT shall be construed as if such invalid, illegal or unenforceable provision had never been contained herein.

L. ARTICLES 6, 7 and 8 shall survive the termination of this AGREEMENT for any reason.

ARTICLE 9: ADDITIONAL TERMS AND CONDITIONS:

The following terms and conditions are included as part of this AGREEMENT:

- A. The ENGINEER shall maintain an Affirmative Action Program regarding the recruitment of minorities and of women that is consistent with the objectives and goals of the Massachusetts State Office of Minority and Women Business Assistance.
- B. Subletting of Contract or Contract Funds: The ENGINEER shall not assign, transfer, convey, sublet or otherwise dispose of this contract or of his right, title or interest therein, or of the power to execute such contract to any other person, firm or corporation, without the prior written consent of the OWNER. In no case shall such consent relieve the ENGINEER from the ENGINEER'S obligations or change the terms of this contract.
- C. Safeguarding of Information: Any materials given to or prepared by the ENGINEER under this contract shall not be sold or otherwise made available to any individual or organization without prior approval of the OWNER.
- D. Nondiscrimination: During the performance of this contract, the ENGINEER agrees as follows:
 - 1. The ENGINEER will not discriminate against any employee or applicant for employment because of race, color, religion, gender, sexual orientation, disability, family status or national origin, or any other unlawful discrimination, except

where the ENGINEER can prove that religion, gender, or national origin is a bona fide occupational qualification reasonably necessary to the normal operation of the ENGINEER. The ENGINEER agrees to post in conspicuous places, available to employees and applicants for employment, notices setting forth the provisions of this nondiscrimination clause.

2. The ENGINEER, in all solicitations or advertisements for employees placed by or on behalf of the ENGINEER, will state that such ENGINEER is an equal opportunity employer.
3. Notices, advertisements, and solicitations placed in accordance with federal and Massachusetts law, rule, or regulation shall be deemed sufficient for the purpose of meeting the requirements of this provision.
4. The ENGINEER will include the provisions of paragraphs (1), (2) and (3) above in every subcontract or purchase order so that the provisions will be binding upon every subcontractor or vendor.

E. Conflict of Interest: Upon the request of the Director of the appropriate City department or any authorized agent of the OWNER, as a prerequisite for any payment requested by the ENGINEER pursuant to the terms of this contract, there shall be furnished to the OWNER a statement, under oath, that no officer or employee of the City of Springfield or any member or employee of a Commission, Board, or Corporation controlled or appointed by the City of Springfield and no member of such person's immediate family, including spouse, parent or children, or any other such family member, has received or has been promised, directly or indirectly, any financial benefit, by way of fee, commission, finder's fee, or in any other manner, remuneration arising from or directly or indirectly related to this contract.

F. Prohibition against Contingent Fees: The ENGINEER by entering into this Agreement hereby certifies that the ENGINEER has not employed any company or person other than a bona fide employee working for the ENGINEER to secure this agreement and the ENGINEER has not paid or agreed to pay any person, company or corporation, individual or firm other than a bona fide employee working solely for the ENGINEER any favor, commission, percentage, gift, or any other consideration contingent upon or resulting from the award of making this or any other agreement. It is the ENGINEER'S understanding that in the event of a breach or violation of the provision, the OWNER shall have the right to terminate this or any other agreement with the ENGINEER immediately and without liability and at the OWNER'S discretion, to deduct from the contract price or otherwise recover, the full amount of such fee, commission, percentage, gift or consideration.

G. The Director of the appropriate City department shall decide on all matters of contract dispute as raised by the ENGINEER.

H. Decreases and Work Not Performed: If deemed expedient, the OWNER or ENGINEER may decrease the scope of work without effecting enforcement of this contract. If the work

is not performed, the ENGINEER and the OWNER shall mutually agree upon the credit due to OWNER based on the reasonable value of the work deleted.

- I. Attorney's Fees and Other Expenses: The ENGINEER will not litigate or otherwise pursue any frivolous or unsubstantiated claims. If an ENGINEER'S claim is without substantial justification, the ENGINEER will reimburse the OWNER for all costs and expenses and attorney's fees associated with defending such claim.
- J. Compliance: The ENGINEER shall comply and all design work shall conform to all applicable and current additions or revisions of Massachusetts Statewide Building Code, at the time of the design work.
- K. ENGINEER'S Representations: By entering into this Contract with the OWNER, the ENGINEER represents and warrants the following, together with all other representations and warranties in the Contract Documents:
 - 1. That the ENGINEER is experienced in and competent to perform the type of work required;
 - 2. That the ENGINEER is financially solvent, able to pay the ENGINEER'S debts as they mature, and possesses sufficient working capital to initiate and complete the work required under the Contract;
 - 3. That the ENGINEER is familiar with all Federal, State, County, Municipal and departmental laws, ordinances, permits, regulations and resolutions applicable to its work which may in any way affect the work of those employed therein, including but not limited to any special acts relating to the work or any part thereof;
 - 4. That such temporary and permanent work required by the Contract which is to be done by the ENGINEER will be satisfactorily performed in accordance with paragraph 6 below;
 - 5. That the ENGINEER will fully comply with all requirements of the Contract Documents;
 - 6. That the ENGINEER will perform the work consistent with sound engineering practice, good workmanship, and sound business practices, and in the most expeditious and economical manner consistent with high industry standards and in the OWNER'S interest;
 - 7. That the ENGINEER will furnish efficient business administration and experienced management and an adequate supply of employees at all times; and
 - 8. That the ENGINEER will complete the work within the Project/Task Time, milestones, and price, unless adjusted by mutual agreement of the parties hereto.
- L. The OWNER retains the right to procure similar engineering services outside of this contract if it deems it to be in the OWNER'S best interest.
- M. Any notices to be given to the OWNER under this Agreement shall be given to the Director of the applicable Department of the City. Any notices to be given to the ENGINEER shall be given to:

Thomas E. Jenkins, P.E.
GZA Environmental, Inc.
1350 Main Street
Suite 1400
Springfield, Massachusetts 01103

ARTICLE 10: ATTACHMENTS, SCHEDULES AND SIGNATURES:

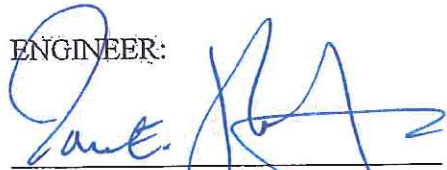

This AGREEMENT including its Attachments and Schedules, constitutes the entire AGREEMENT, supersedes all prior written or oral understandings, and may only be changed by a written amendment executed by both parties. The following Attachments and Schedules are hereby made a part of this AGREEMENT:

- Appendix A – Project Order Format
- Appendix B – Owner's Engineering Specifications/Guidelines
- Appendix C – Hampden County Registry of Deeds Plan Regulations
- Appendix D – ENGINEER'S Technical Proposal
- Appendix E – ENGINEER'S Price Proposal
- Appendix F – Owner's Request for Qualifications/Proposals

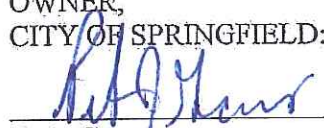

[SIGNATURE PAGE TO FOLLOW]

IN WITNESS WHEREOF, the City of Springfield (OWNER) and the ENGINEER have each hereunto set their hand and seal, effective as of the date of the last signatory.

APPENDIX B

DECEMBER 1991

OWNERS ENGINEERING SPECIFICATIONS/GUIDELINES

The basic land surveying and engineering services to be provided to the OWNER by a firms will be performed to the following standards and will be comprised of the following phases of work for a typical land survey, street design and/or drainage design:

1. Surveying Phase
2. Preliminary Design
3. Final Design

The work to be performed by firms under each of these phases is outlined below:

SECTION V Land Surveying Phase

1. Assemble all available data from existing records relative to utilities, properties, topography, streets and land use, which may affect the engineering design of the project.
2. Make field surveys of existing conditions. The surveys shall provide all data which may be required for the preparation of the final plan, construction contract drawings and record plats. Plans are to be acceptable for filing at the Hampden County Registry of Deeds and meet the City of Springfield Department of Public Works guidelines. The surveys shall include but not be limited to the following information:
 - 2.1 A referenced traverse, including computations, with a minimum closure of 1:35,000. The OWNER shall specify the traverse base to be utilized.
 - 2.2 Sufficient property corner ties shall be made to permit accurate computation of all property lines adjacent to and departing from the proposed areas of construction; the preparation of all plats of easement, right-of-ways or land acquisitions as required; and the accurate establishment of these lines in the field. Apparent voids or overlaps in property lines shall be noted and shown.

The purpose of this information is to allow be property corners in areas disturbed during construction to be reset.
 - 2.3 A series of referenced elevation benchmarks with a maximum distance of 300 feet apart, minimum second order level results on OWNER specified datum.

2.4 Strip topography, on mylar, to be run for the entire length of the project area as follows:

- minimum width of 150 feet road and community improvement projects
- minimum width of 100 feet for storm sewer and sanitary sewer projects
- minimum width of 50 feet for sidewalk and trail projects. At locations along an existing road, this width shall extend from existing edge of pavement.

Topography to be 20 feet to the inch, two-foot contour interval, for storm drainage, community improvement, sidewalk, trail and road projects and at 40 feet to the inch, two-foot contour interval for sanitary sewer projects, including the following for all projects: telephone, power poles and lines; where not in a forest, trees four or more inches in diameter along with shrubbery in developed areas. In addition, all residences along with first floor and/or basement elevations shall be noted on all projects. Topography may be a separate overlay.

2.5 Horizontal location of underground conduits or sanitary sewer, storm drainage, water, telephone, electric, gas, oil, cable t.v., etc., by field surveys. Existing utility companies to be contacted and arrangements made for them to field locate their existing facilities. The location of existing utilities from office records will not be acceptable. The elevation of underground conduits shall be determined by any method other than boring and excavation.

2.6 Perform all office work required to plot the above information and prepare the base map(s) needed for the base design drawings. Prepare reproducible base sheet(s) showing the topography, street lines (metes and bounds) property lines, utilities, right-of-ways, easements and horizontal and vertical control information. The base sheet(s) are to be prepared at the scale specified in III B, with two-foot contour intervals for all projects. The horizontal and vertical control will include, but not be limited to, the following:

ARTICLE 1. Horizontal

- (1) Plot the traverse on the base sheet with bearings and distances shown.
- (2) Tie the traverse stations to centerline of right-of-way of proposed construction and all existing structures or control stations with bearings and distances. (Sidewalk and trail projects may be set up with baseline tied to traverse and offset distances provided from baseline).

- (3) Show coordinates of traverse stations, structures, or control stations and all property corners adjacent to route of proposed construction.
- (4) Reference traverse station on base sheet, i.e., designation of object used as a traverse station; H&T, P.K., I Pin, cutnails, spike, etc.
- (5) Tie traverse stations to a minimum of two permanent reference marks.

ARTICLE 2. Vertical

- (1) Describe S.M. on base sheet.

B.M. Elev. - 256.95 (City Datum)
Chiseled "X" on top of curb-inlet west side of Main Street

- (2) Plot B.M. on base sheet at proper locations, i.e.

2.7 The survey crew will make a special effort to advise the property owners of their presence prior to entering upon a property to perform the survey work. This notification procedure should be especially adhered to on all property that will require the cutting or trimming of trees, brush, undergrowth, etc. Notification can be accomplished by telephone or by the survey personnel directly informing each resident. All efforts shall be made to locate benchmarks and traverse stations in the right-of-way to minimize property disturbance.

SECTION VLPreliminary Design

1. Develop preliminary designs and computations and prepare preliminary drawings and/or graphics showing the extent and scope of the project in detail suitable for use in public meetings. The preliminary design will be of sufficient detail to reasonably ensure the feasibility of obtaining the required approvals, permits and future construction of the project.
2. Contact private and public utility companies and others whose facilities may be affected by the proposed construction. Obtain from such companies the available horizontal and vertical location of existing facilities to supplement the field locations provided, together with any proposed new construction, changes or relocations.
3. OWNER, or its designated agent(s), may obtain the detailed horizontal and vertical location via the use of test pits of all underground conduits that cross the proposed facilities that are being designed by the ENGINEER. The ENGINEER shall cooperate with OWNER or its designated agent(s) in providing any information that is required to dig the test pits. In addition, the ENGINEER shall

provide the field survey stakeout as required to define the horizontal location of all proposed facilities where a test pit(s) is required;

4. Upon receipt of the test pit data, the ENGINEER shall investigate the feasibility of redesigning the proposed facilities in order to eliminate the projected conflicts. OWNER shall be advised of the results of this investigation and of the extent of utility conflicts.
5. If necessary, perform or cause to be performed the required geotechnical investigation (see Subsurface Soil Investigation).
6. Prepare a preliminary estimate of the quantities and cost of construction based on current unit prices for materials and labor.
7. Determine the limits of property, existing easements and rights-of-way by a detailed review of the recorded land records including any Land Court Records. A determination is to be made on the need for additional easements required for the construction of the project, along with advising the OWNER of such requirements.
8. Attend detailed conferences with the OWNER and participate in citizens meetings. The ENGINEER shall prepare meeting minutes of all meetings which are to be forwarded to OWNER within five working days. Unless specifically requested, the ENGINEER shall not be required to attend citizen meetings for sidewalk and trail projects.
9. On road and community improvement projects, a street lighting plan will be prepared by the OWNER, using the preliminary plans prepared by the ENGINEER. This plan will be forwarded to the ENGINEER for coordination and inclusion into the final plans.
10. All road improvement projects and community improvement projects will include a standard five-foot concrete walkway(s) unless specifically deleted from the scope of work.
11. The location of the proposed sidewalk(s) shall be in accordance with the OWNER'S specification, unless otherwise noted by OWNER. Any soil tests associated with determining the need for under drains shall be the responsibility of the ENGINEER.
12. All road and community improvement projects will meet the Standard Specifications for Highways and Bridges, Commonwealth of Massachusetts, Department of Public Works, 1988; and Commonwealth of Massachusetts Design Criteria and Construction Standards, 1977; as well as the street design section of the City of Springfield Subdivision Regulations, 1991, unless specified otherwise.

SECTION VII Final Design

1. No work will be initiated on final design until written authorization is received from WER.
2. Develop complete designs and computations, and prepare final contract drawings showing all proposed construction in sufficient detail to ensure the granting of all necessary approvals and permits by all affected regulatory agencies and utility companies and to ensure proper execution of the work by a contractor. All plan and profile sheets shall include a graphic scale as follows unless otherwise approved:
 - 2.1 Storm drainage, sidewalk, trail, road and community improvement projects: Horizontal 1"=40'; vertical 1"=6'
 - 2.2 Sanitary sewer projects: Horizontal 1"=40'; vertical 1"=6'
 - 2.3 On street design plans where a proposed curb, berm, center line or gutter grade will be required profiles of the ground as it exists at each street line shall be shown and identified as such:

All such proposed elevations shall be stationed at a maximum of fifty (50) feet intervals for the entire length of each street and at every change of grade. When the proposed street is a continuation of an existing street, the stationing thereof shall be a continuation from the end of the existing street.

- 2.4 All points of curvature, points of tangency, intersections, catch basins, manholes, points of tangency of vertical curves shall be stationed.
- 2.5 The proposed layout and profile of sanitary and stormwater lines shall include their location, size, type of material to be used, as well as their related structures. All other utilities shall be located on the Plot portion of the plan. Differentiation shall be made between existing and proposed services.

3. Prepare any special provisions for the project to the construction specifications and reference on the plans.
4. Prepare an Engineer's estimate of the final design quantities and cost of construction based on current unit prices for material and labor.
5. Prepare individual record plats for permanent easements, dedication to public street purposes (Acceptance Plans) and temporary construction or grading easements which will be required for the construction of the project. The record plats shall include:
 - 5.1 "Take" areas computed in square feet and indicated in the lower left hand portion of the plat.
 - 5.2 Two points referenced by OWNER specified traverse base, unless modified by the conditions in Item I B (1).
 - 5.3 Metes and bounds on all 'take' areas including complete curve data.
 - 5.4 The same scale as the design drawings, unless approved otherwise by the OWNER, and be on 18" x 24" reproducible mylar whenever possible.
6. Final design plans shall be 4 mil mylar and will include standard Department of Public Works (DPW) cover sheet with locus map, general notes sheet with erosion/sedimentation requirements as needed, along with plan/profile and standard detail sheets. Liberal use of details is encouraged. All sheets, except DPW cover sheets, should have OWNERS title block. All plans shall also meet the requirements of the Hampden County Registry of Deeds (see Appendix C).
 - 6.1 All road projects shall include a revision data sheet.

7. Attend detailed conferences with the OWNER and participate in citizens' meetings. Meeting minutes of all meetings are to be forwarded to OWNER within five working days. Unless specifically stated, the ENGINEER shall not be required to attend citizens meetings for sidewalk and trail projects.
8. On road improvement projects, prepare cross sections at 50 foot intervals for the length of the improvements except for intersection improvement projects where the cross section interval shall be 25 feet, as well as a cross section of each driveway.
9. Plans must be submitted by an Engineer or Surveyor Registered in Massachusetts, with stamps on all sheets.
10. All intersecting streets shall be identified as "public" or "private".

SECTION VIII Subsurface Soil Investigation

Prior to submitting a proposal for a project, the ENGINEER shall field review the project site along with any available soil information to determine if a geotechnical investigation is required to design and/or construct the proposed improvements. The cost to perform the geotechnical investigation should be included as part of the proposal. A copy of the detailed scope and approach for the geotechnical investigation shall be included as an attachment to the proposal.

If the ENGINEER determines that a geotechnical investigation of the project site is not required, the costs associated with Item No. II-C shall be deleted and indicated accordingly in the proposal.

SECTION IX Engineering Services During Construction

If requested by OWNER, the ENGINEER shall provide as part of this proposal the costs associated with providing engineering services during construction. The scope of these services shall be determined jointly with OWNER prior to submitting the proposal.

SECTION X. Materials to be Transmitted to OWNER Include:

1. A progress report briefly describing the work accomplished will be submitted with all invoices requesting payment for work performed.
2. Advance sets of plans may be required on certain projects to obtain OWNER and/or Massachusetts Department of Public Works approval.
3. Original inked mylars of record plats and design plans will be stamped by a principal of the firms registered in the State of Massachusetts as a Professional Engineer and/or Professional Land Surveyor as required. Mylar reproducible, of penciled originals, varitype letter press, and stick-on letters will not be accepted.
4. Two clean copies of the special provisions.
5. One copy of Engineer's construction cost estimate.
6. One copy of all design calculations, assumptions, etc.
7. A copy of all deed research, including instruments and plats of the recorded land records including Land Court used to determine the limits of property, existing easements and rights-of-way.
8. A reproducible copy of the survey field book and notes.
9. A coordinate list corresponding to the survey datum of all existing permanent facilities as related to the proposed design, property corners, etc.
10. Reproducible survey base sheet indicating the referenced traverse, property lines and property corners numbered to correspond with the coordinate list.
11. Strip topography, pencil on mylar, that can be overlaid on the base sheet.

SECTION XI. Materials available from OWNER Include:

1. 1"=100', two-foot contour topographic map(s) and property (Assessors) identification map(s).
2. Site or subdivision plans in the project area on record at the Department of Public Works.
3. Available soil data from the Soil Survey of Hampden County.
4. Available plans on any sanitary, storm sewer, walkway or road projects in the area.
5. Mylar or seria of the Department of Public Works standard cover sheet and general note sheets.

APPENDIX C

HAMPDEN COUNTY REGISTRY OF DEEDS

PLAN REGULATIONS

AMENDMENTS UNDER THE GENERAL LAWS, CHAPTER 36, SECTION 13A, APPROVED BY THE ATTORNEY GENERAL ARE EFFECTIVE JANUARY 1, 1976 ARE AS FOLLOWS:

1. Plan sizes shall be a minimum of eight and one-half inches by eleven inches (8 1/2' X 11') and a maximum of twenty-four inches by thirty-six inches (24' X 36').
2. Plans being presented for recording shall be on linen or polyester film, single matte with a thickness of .004 mils, and must have an opacity so as to allow consistent diazo and microfilm reproduction.
3. All plans shall be prepared using a compatible ink with excellent cohesiveness which will produce a permanent bond and result in a plan with long term durability.
4. Linen or polyester reproductions shall be accepted for recording provided they contain original signatures and comply with the other requirements for the recording of plans.
5. Each plan shall have three quarter inch (3/4) borders.
6. The minimum letter size on plans presented for recording shall be one eighth inch (1/8).
7. Each plan presented for recording shall include a graphic scale.
8. Each plan shall have an area reserved to receive planning board recitation or contain a surveyors certification as per Chapter 380, Acts of 1966.
9. Each plan shall have a three and one-half inch (3 1/2) square reserved for Registry use.
10. Each plan must contain a certification clause signed by the preparer stating that he/she has conformed with the rules and regulations of the Registers of Deeds in preparing the plan.

Dear Ms. Stabilo:

On January 15, 2014, GZA GeoEnvironmental, Inc. (GZA) submitted to you our Technical Proposal package and our Price Proposal in accordance with RFP # SPG-14-188. Last week, we received City Contract No. 20140969 and signed that document and returned it back to you. Thank you very much.

Today, we noticed an error in the Schedule of Fees (rate sheet) that we submitted with our Price Proposal. One of our key labor categories—Project Engineer / Scientist—was inadvertently omitted from the schedule. To avoid any confusion in our preparation of proposals, we would like to provide a corrected **Schedule of Fees (Rev. 1)** that includes the Project Engineer / Scientist position at the rate of \$150 per hour. The additional labor category is the only revision. The revised schedule is enclosed.

We apologize for any confusion or inconvenience this error may generate. Should you have any questions regarding this submission, please me at 413-726-2121.

Very Truly Yours,
GZA GeoEnvironmental, Inc.

SCHEDULE OF FEES
CITY OF SPRINGFIELD

Rev. 1
03/31/14

FOR PROPOSAL FOR SERVICES DATED JANUARY 15, 2014 FILE NO. 15.P000094.14

<u>LABOR</u>	<u>Per Hour</u>
Senior Principal Engineer / Scientist	\$260
Principal Engineer / Scientist	\$240
Associate Principal Engineer / Scientist	\$220
Senior Consultant	\$200
Senior Project Engineer / Scientist	\$175
Senior Designer/Landscape Architect	\$160
Project Engineer / Scientist	\$150
Assistant Project Engineer / Scientist	\$125
Staff Engineer / Scientist I	\$105
Staff Engineer / Scientist II	\$95
Technician I	\$85
Technician II	\$80
Senior CAD/Technical Designer	\$120
CAD/Technical Designer	\$110
Technical/Administrative Support	\$75
Outside Services and Subcontractors	Cost Plus 5%
Expenses	Cost

The above rates for technical and support personnel will be charged for actual time worked on the project, including time required for travel from company office to job or meeting site and return. For work requiring out-of-town overnight stay, the minimum charge for work on the project will be eight (8) hours per day.

The above-listed rates are valid for the calendar year in which the work is performed. GZA will modify this rate schedule on an annual basis per the contract-specific cost of living adjustment procedure.

EXPENSES

- *Laboratory service, rental of specialized field or monitoring equipment and vehicle charges based on GZA standard unit prices*
- *Transportation, lodging and subsistence for out-of-town travel*
- *Printing, reproduction, plotting, and wide-format scanning*
- *Express mail and shipping charges*
- *Project-specific computer hardware and software*

APPLICABILITY

*This Schedule of Fees is appropriate for use with:
City Bid No. SPG-14-134 / City Contract No. 20140969*
