

DESIGN PUBLIC HEARING

TUESDAY, SEPTEMBER 17, 2019 AT 6:30 P.M.

AT

FOREST PARK MIDDLE SCHOOL AUDITORIUM  
46 OAKLAND STREET  
SPRINGFIELD, MA 01108

FOR THE PROPOSED

SUMNER AVE. AT BELMONT AVE. AND DICKENSON STREET (THE X)  
INTERSECTION AND RELATED IMPROVEMENTS PROJECT  
Project No.: 608717  
Roadway Project Management Section

IN SPRINGFIELD, MASSACHUSETTS

COMMONWEALTH OF MASSACHUSETTS  
MASSACHUSETTS DEPARTMENT OF TRANSPORTATION  
HIGHWAY DIVISION

JONATHAN GULLIVER  
HIGHWAY ADMINISTRATOR

PATRICIA A. LEAVENWORTH, P.E.  
CHIEF ENGINEER

Arlington Reporting Company  
(339)674-9100

**PRESENTERS**

Thomas Currier, Project Manager,  
 MassDOT - Highway Division  
 Bryan Slack, Right of Way Bureau,  
 MassDOT - Highway Division  
 Bao Lang, District 2 Office,  
 MassDOT - Highway Division  
 Stephen Savaria, P.E., PTOE, Sr. Transportation Engineer,  
 Fuss & O'Neill  
 Nicholas Lapointe, P.E., Senior Transportation Engineer,  
 Fuss & O'Neill  
 Jonathan Allard, PLA, Landscape Architect,  
 Fuss & O'Neill

**SPEAKER INDEX**

<b><u>Name</u></b>	<b><u>Page</u></b>
Thomas Currier, Moderator, MassDOT - Highway Division,	7, 8, 9, 10, 11, 13, 31, 32, 34, 35, 36, 37, 39, 40, 41, 42, 46, 48, 49, 50, 51, 52, 54, 56, 57, 58, 61, 62, 64, 65, 66, 67, 68, 69, 75, 76, 77, 78, 80, 84, 87, 88, 89, 90, 91, 92, 94, 95, 97, 98, 99, 102, 103, 104, 108, 111, 112, 113, 116, 117, 119, 120, 125, 126, 127, 128, 129, 130, 131, 132, 133,
Bryan Slack, Right of Way, MassDOT - Highway Division	10
Bao Lang, District 2 Office, MassDOT - Highway Division	118, 128

1                                   P R O C E E D I N G S

2                                   MODERATOR THOMAS CURRIER:   Good  
3   evening, everyone.   Welcome to the Springfield Forest  
4   Middle School.   Tonight we're here to discuss the  
5   intersection of Sumner Ave. at Dickinson Street and  
6   Belmont Ave., the X.

7                                   My name is Tom Currier.   I'm with  
8   MassDOT out of Boston.   I'm pinch-hitting tonight for  
9   your project manager, Shawn Holland, whose dad is  
10   gravely ill, and Shawn couldn't be with us tonight for  
11   that reason.

12                                  You've met Walter.   He means business.  
13   So, we all have to talk one at a time.   When you come  
14   up to offer a comment, if you could just spell your  
15   last name, introduce yourself and spell your last name  
16   so he can get it correctly recorded and transcribed.

17                                  I know this is a big project, and  
18   perhaps there's going to be a lot of discussion.   So,  
19   if we can just do it in a friendly manner.   We're  
20   really here to hear everything you have to say.   No  
21   one knows this intersection better than you.   And we  
22   will benefit greatly and the project will benefit  
23   greatly from us learning what you have to tell us  
24   tonight.   So, good, bad, indifferent, I know there's

1 going to be people in favor of and not in favor of  
2 what's presented. We want to hear it all, and let's  
3 just do it one at a time so Walter doesn't yell at us  
4 all night.

5 With me tonight from our District 2  
6 Office is Bao Lang. He's our traffic engineer in  
7 District 2, MassDOT District 2. And, Bryan Slack is  
8 your --

9 AUDIENCE: We can't hear you.

10 MODERATOR CURRIER: You can't hear me?  
11 Yeah.

12 STENOGRAPHER: I know it's a big echoey  
13 room and it's difficult to hear. I need to run out  
14 and bring in an amp to do that. Do you want to pause  
15 for a moment?

16 MODERATOR CURRIER: Can you guys wait  
17 for ten minutes? Thank you. I guess it will make our  
18 evening go better.

19 (Brief recess off the record.)

20 STENOGRAPHER: Okay. Give it a shot.

21 MODERATOR CURRIER: Okay. Are we good?

22 STENOGRAPHER: Yeah.

23 MODERATOR CURRIER: All right. Thank  
24 you for your patience, everyone. Much appreciated.

1 Can you hear me better now back there?

2 AUDIENCE: Sounds good.

3 MODERATOR CURRIER: Good. So, as I  
4 said, I'm Tom Currier from MassDOT Boston. I'm here  
5 on behalf of Shawn Holland and our Chief Engineer  
6 Patricia Leavenworth to present tonight's project, the  
7 reconstruction of Sumner Avenue at Dickinson Street  
8 and Belmont Ave., the X, that six-way intersection  
9 that you're all very familiar with I'm sure.

10 And, as I was giving the introductions,  
11 your City Engineer Chris Cignoli, Bao Lang from  
12 MassDOT District 2, traffic engineer. Bryan Slack is  
13 MassDOT's Right of Way compliance officer here to  
14 explain the right of way process. And I'm going to  
15 get to Bryan in the next minute. And this is Nick  
16 Lapointe and Jon Allard of Fuss & O'Neill. And that  
17 distinguished looking gentleman right there is Steve  
18 Savaria of Fuss & O'Neill. And there won't be any  
19 acrobatics tonight.

20 I'm very grateful for all of you making  
21 time to come out tonight because, as I was saying  
22 earlier, your comments, thoughts, and criticisms of  
23 our preliminary design is critical to the success of  
24 the project. So, without further ado, I'm going to

1 ask Bryan to -- oh, I can't do that. I think you can  
2 just speak to that thing.

3 STENOGRAPHER: No, you can sit. No,  
4 stay where you are.

5 MODERATOR CURRIER: You can sit and  
6 just talk, yeah.

7 STENOGRAPHER: Okay. Give it a shot.

8 BRYAN SLACK: Good evening.

9 When the Commonwealth, acting through  
10 its Massachusetts Department of Transportation Highway  
11 Division, indicated it would accept this \$11.5 million  
12 project for funding, your municipality accepted  
13 certain responsibilities. One of those  
14 responsibilities is acquiring all the necessary rights  
15 in private and public lands for the design,  
16 construction, and implementation of this project.

17 My function is to review and recommend  
18 procedures that your municipality will use in  
19 acquiring these rights. The procedures used must  
20 comply with both federal and state regulations.

21 The current design plans indicate that  
22 there are two fee acquisitions, four permanent  
23 easements, and 111 temporary easements required.

24 The property owners impacted by this

1 project will be contacted by your municipal officials.  
2 They will present the proposed impacts to each owner  
3 and discuss the methods with which they may acquire  
4 the needed rights for the project.

5 Frequently, municipalities will appeal  
6 for donations to minimize the acquisition cost for  
7 your community. However, donations are not required,  
8 and property owners are entitled to an appraisal,  
9 review appraisal, and just compensation.

10 Right of way documents will be provided  
11 to each owner to help them understand the acquisition  
12 process and how the project affects their property.

13 Affected property owners' rights are  
14 protected under our Massachusetts General Laws,  
15 primarily Chapter 79. And, because this project is  
16 receiving federal funds, the property owners' rights  
17 are further defined under Title III of the Real  
18 Property Act of 1970, as amended.

19 I will be happy to answer any general  
20 questions concerning right of way activities during  
21 the open forum, and I will be available after the  
22 hearing for any specific questions you may have.

23 Thank you.

24 MODERATOR CURRIER: I do have a little

1 bookkeeping to take care of right now. I'd like to  
2 let you know that this public hearing notice was  
3 published in the *Republican* on September 3<sup>rd</sup> and  
4 September 10<sup>th</sup>, and in *El Mundo* on September 5<sup>th</sup> and  
5 September 12<sup>th</sup>.

6 And, as was mentioned by Bryan just a  
7 second ago, the estimate today, the rough estimate, is  
8 roughly \$11.5 million. That will probably change  
9 before we're done.

10 So, I'd like to turn it over to Chris  
11 Cignoli, your City Engineer, who wants to make a few  
12 remarks before we ask the engineers to give us their  
13 presentation.

14 CHRIS CIGNOLI: Good evening. Can you  
15 hear me here?

16 STENOGRAPHER: Try it again.

17 CHRIS CIGNOLI: Good evening. Perfect.  
18 Chris Cignoli, DPW Director for the City of  
19 Springfield.

20 Just to give everybody a brief history,  
21 we were in front of you a year-and-a-half, two years  
22 ago with the final concepts for this project. The  
23 concept that was agreed upon is what's basically moved  
24 forward at this point through MassDOT.

1                   What we've been doing over that period  
2 of time is doing final survey, getting the actual  
3 designers on board, and getting to this phase of the  
4 design. We worked through MassDOT with the 25  
5 percent, reviewed their comments. And whatever  
6 comments we receive tonight or we receive in writing  
7 from you following this meeting we will look at and  
8 see what needs to be incorporated into the project.

9                   As you move forward, if there are any  
10 comments that you have, please get them on the record  
11 with MassDOT. In the handout, there is a way to get  
12 it into MassDOT. So, please do that. We need to have  
13 an official record of it.

14                  Other than that, we encourage you to  
15 come up with any comments that you have for tonight so  
16 we can make sure we are able to address them moving  
17 forward on this project.

18                  Thank you.

19                  MODERATOR CURRIER: Thank you, Chris.

20                  Yeah, I'd like to just reinforce what  
21 Chris says. There's handouts at the sign-in sheet.  
22 And I'd like to reiterate that if you'd like your  
23 presence known tonight officially, please sign in on  
24 that and let us know how you heard about the meeting.

1 We're always trying to improve our communication with  
2 the public when we do these. And, as Chris said, your  
3 comments are critical to the success of the project.

4 I mean you're speaking tonight. That's  
5 all recorded. That's why Walter's here. And the  
6 designers use the recording to capture the comments.  
7 And if you don't feel like talking on a microphone  
8 tonight in front of everybody, that's fine, too. We  
9 have a handout. On the back of the handout is a  
10 little form. You can write your comment down on that  
11 and send it into us. It's addressed to MassDOT in  
12 Boston. And we'll receive that and incorporate that  
13 into the official transcript as well.

14 And so now the fun part. Now we'll get  
15 to hear from Steve Savaria and Fuss & O'Neill

16 STEPHEN SAVARIA: Thanks, Walter.  
17 Thank you, Chris.

18 We've already been through our  
19 introductions. I just want to go over a history of  
20 the public outreach on the project to date.

21 There had been two public meetings  
22 during the planning phase of the project where  
23 alternatives to the various features of the project  
24 were discussed.

1                   The City, along with Fuss & O'Neill,  
2   presented the conceptual plans, basically the  
3   preferred concept plan, to the Forest Park Civic  
4   Association in 2017.

5                   All the abutting property owners within  
6   the project limits were sent letters soliciting input  
7   and comments. Those comments were received, and  
8   responses were sent out from Springfield DPW.

9                   The project team is my firm, Fuss &  
10   O'Neill, has a contract with the City to provide the  
11   design of the project. That means we will prepare all  
12   of the contract documents so that the project can be  
13   constructed.

14                  The project will then be constructed by  
15   MassDOT under a construction contract that they will  
16   bid and award. And because MassDOT is responsible for  
17   the proper application of state and federal funding  
18   for the construction of the project, they have review  
19   responsibility over the plans, and specifications, and  
20   the contract documents. So, everything has to be  
21   designed and all of the plans and documentation has to  
22   be prepared according to MassDOT standards.

23                  This is an overview of the project  
24   area. Sumner Ave., from just west of the entrance to

1 Forest Park, Main Greeting Road, out to just east of  
2 Ormond Street.

3 Belmont Avenue from just north of  
4 Burlington and just south of Ormond Street.

5 And, Dickinson from just north of  
6 Burlington down to just south of where Cliftwood comes  
7 out.

8 That is the project area. This entire  
9 roadway system is going to be reconstructed.

10 Why do we need this project? There's  
11 well documented issues with intersection safety. And  
12 I will get into that in a little more detail.

13 Man, this thing is hot.

14 We have big problems with congestion  
15 and delay, especially during the peak commuting times,  
16 long queues of traffic backups and congestion.

17 There are cut-through -- there's a  
18 large volume of cut-through traffic through  
19 neighborhoods to avoid the congestion in the X  
20 intersection.

21 The project area, in general, lacks  
22 adequate pedestrian facilities for crossing, for safe  
23 crossing of the major roadways in the project area.

24 There is virtually no bicycle

1 accommodation through the entire project area. And,  
2 as a requirement of MassDOT and Federal Highway's  
3 Complete Streets policy, we must provide bicycle  
4 accommodation. We must provide equal accommodation  
5 for all modes.

6 And, all of the signal equipment, the  
7 existing signal equipment in the project area is  
8 obsolete. It's prone to failure. And it can't be  
9 readily maintained.

10 So, on the issue of intersection  
11 safety, Pioneer Valley Planning Commission, our  
12 regional planning agency, periodically does reports of  
13 high accident locations. They maintain the database  
14 of crash locations and the crash records which they  
15 obtain from the Registry and MassDOT. And they  
16 periodically issue these reports, which identify what  
17 they call crash clusters. And this particular  
18 intersection, the X, is the number one in terms of --  
19 in the region -- in terms of the frequency of crashes  
20 at this location relative to the amount of the volume  
21 of traffic. And, three of the other intersections  
22 made the Top 100 on the list. So, this entire project  
23 area has got some serious safety deficiencies that  
24 need to be improved upon.

1                   So, what are our goals? Our goals are  
2 to address all of those issues. So, we want to make  
3 the project safe.

4                   We want to make it multimodal so that  
5 pedestrians, bicycles, vehicles, and transit are all  
6 accommodated adequately.

7                   We want to make it walkable as an  
8 improvement to the neighborhood. We want to -- an  
9 enhancement of the residential and business  
10 properties, we want to make it easy and safe to walk  
11 around the neighborhood, and, you know, cross the  
12 various streets and get to where pedestrians need to  
13 go.

14                  We want to make it livable. We want to  
15 enhance the environment of the project area to make it  
16 more conducive to further economic development and  
17 just make it a nicer place to live.

18                  And we want to make it sustainable so  
19 that going into the future that these improvements  
20 will continue to benefit the community.

21                  So, we're going to implement  
22 improvements to increase intersection safety; improve  
23 operations, vehicular, and pedestrian, and bicycle  
24 operations through the project area to reduce

1 congestion and delay.

2 We want to improve the operation of the  
3 major intersections so that it will discourage cut-  
4 through traffic.

5 And, we're going to provide updated  
6 pedestrian facilities: walks, ramps, crossings. We  
7 have a couple of pedestrian plazas designed into the  
8 project.

9 We want to have bicycle accommodation  
10 on all the streets in the project area, whether that's  
11 through exclusive bike lanes or through shared lanes  
12 with vehicular traffic.

13 And, we want to replace all of the  
14 signal equipment with upgraded state-of-the-art  
15 equipment.

16 So, our scope is we're going to -- we  
17 have kind of a redistribution of traffic around the X  
18 to improve -- to alleviate the congestion. And we'll  
19 talk more about that.

20 We have new traffic signal equipment  
21 that's going to provide for coordinations, which means  
22 that we're going to be able to provide progression  
23 through the numerous intersections up and down Sumner  
24 Avenue so you don't have to stop at every one.

1                   We're going to provide bicycle lanes,  
2   five-foot bicycle lanes, where it's feasible.

3                   And, currently in the plan, there's a  
4   multi-use path through Forest Park extending from  
5   Cliftwood Avenue, the end of Cliftwood Avenue, through  
6   the park and out past the tennis courts and out  
7   opposite Oakland Street. That path is kind of already  
8   there through the woods, but we're going to provide a  
9   paved multi-use path so there's an alternative route  
10   for pedestrians going to and from Sumner Avenue and  
11   Dickinson.

12                  We're going to provide new pedestrian  
13   facilities, walkways, furnishings, landscape,  
14   streetscape.

15                  And we're going to improve pedestrian  
16   accessibility. We're going to provide accessible  
17   crossings of all the streets in the neighborhood. And  
18   all of the pedestrian facilities, all of the walkways  
19   in the project, will be fully ADA compliant.

20                  And, at many of the intersections, both  
21   signalized and unsignalized along Sumner Avenue, we're  
22   going to provide auxiliary turning lanes, left and  
23   right turning lanes, which will allow vehicles that  
24   are stopped, waiting to make turns, to queue in areas

1 that are outside the through traffic lane so that they  
2 don't impede through traffic progression.

3 The project schedule: The project is  
4 currently under design. We are at the 25 percent  
5 stage now. Those plans were submitted last year.  
6 They were reviewed by MassDOT. We've gone through  
7 their comments. We've had comment resolution. There  
8 are some issues still to be resolved, but most of them  
9 have already been incorporated into the design.

10 We are here to have the Design Public  
11 Hearing, which is the major milestone of the 25  
12 percent stage. And, we're going to go, after this  
13 hearing and the solicitation of public input from this  
14 hearing, we are going to go into final design. And  
15 there are three stages of final design: 75 percent,  
16 100 percent, and final plans, specifications, and  
17 estimates before we get to the actual contract  
18 documents. So, that's going to take another two  
19 years.

20 And then the project is currently  
21 scheduled for the application of the state and federal  
22 funding for construction for fiscal year 2024. Now,  
23 that could change depending on how soon the contract  
24 documents are ready. But the actual programming of

1 those funds is under the control of the regional  
2 planning agencies and the Joint Transportation  
3 Committee. And they meet every year to prioritize  
4 projects, to arrange them as the availability of  
5 federal funds allow.

6                   This region only gets about \$30 million  
7 total for the region every year for projects that are  
8 on the Transportation Improvement Program. So, this  
9 \$11 million project is a big chunk of that. And so  
10 projects have to be kind of moved around and  
11 prioritized in order to allocate all that funding in  
12 any given fiscal year.

13                   And the project construction duration  
14 is probably going to be two full construction seasons.  
15 Normally, what happens is the majority of the  
16 construction takes place during the first construction  
17 season, and then it gets finalized and final  
18 improvements are made in the second construction  
19 season.

20                   During construction, there will be  
21 traffic impacts. But there will be a traffic  
22 management plan to reroute so that traffic will still  
23 be able to flow throughout the project area. A  
24 minimum of one lane of moving traffic in each

1 direction is going to be maintained at all times.

2 Access to all the abutting properties  
3 and businesses will be maintained at all times  
4 throughout the duration of construction. There will  
5 be temporary closures, possible full street closures,  
6 lane closures, occasional rerouting, detours, and  
7 pedestrian detours as well as construction is going  
8 along. But, in general, the project area will remain  
9 open for traffic.

10 Alternatives are analyzed during the  
11 project planning phase. So, the preferred  
12 alternatives that we are presenting here tonight  
13 represent kind of the culmination of that planning  
14 process that analyzed different alternatives. So,  
15 what we have here is what's kind of been accepted as  
16 the preferred alternative.

17 Okay. So, there's a lot of text on  
18 this slide. But, what I can do is go to the plan and  
19 hopefully read it.

20 So, in all of this text here, all of  
21 the description of the improvements is actually in  
22 your handouts.

23 For the X intersection, Belmont Avenue  
24 on the north side is going to be one-way only

1 northbound until we get to Burlington. And on the  
2 south side, it will be one-way southbound out past the  
3 CVS to Ormond Street. That will eliminate any Belmont  
4 Avenue through traffic going through the intersection.  
5 And it will be rerouted around to the other streets in  
6 the area. The Belmont Avenue northbound traffic -- I  
7 mean southbound traffic -- will be rerouted to Oakland  
8 Street. Possibly, some of it will be distributed over  
9 Burlington and down to Dickinson, and the Belmont  
10 Avenue northbound traffic will be rerouted to Oakland  
11 Street to come out onto Sumner Avenue there at a new  
12 signalized intersection at Oakland -- I mean Ormond  
13 Street.

14                   There will be an exclusive left turn  
15 lane to allow traffic headed westbound on Sumner  
16 Avenue to turn onto Dickinson. And the Dickinson  
17 southbound approach will be allowed to turn left and  
18 right at the intersection.

19                   And because we only have one-way  
20 traffic flow on Belmont Avenue on either side, we now  
21 have the opportunity to take some of that pavement  
22 that's there now and turn it into pedestrian plazas,  
23 which we'll talk about more.

24                   So, this is the north side of Belmont

1 Avenue. The intersection with Burlington will be  
2 configured as a small roundabout. It will still be  
3 large enough to turn large vehicles, trucks, if they  
4 need to make whatever moves they need to make. The  
5 center of the island will be flush to allow that to  
6 happen. But passenger vehicles will still be  
7 channelized around the roundabout. So, all movements  
8 will be able to be made at that roundabout.

9 Belmont Ave. south of the X will be  
10 one-way southbound coming out of the intersection.  
11 Again, another mini-roundabout to be constructed at  
12 this location. Two-way traffic from that point on and  
13 northbound traffic on Belmont will be redirected to  
14 Ormond Street.

15 This is Sumner Avenue west of the X.  
16 The current signal at Lenox Street will be relocated,  
17 and now Cliftwood Street will have the signalized  
18 intersection to allow for traffic to -- that's  
19 bypassing the X to exit out onto Sumner Avenue. Lenox  
20 Street will be one-way southbound, so that's a  
21 reversal of the one-way pair that we have there now.

22 And so this Cliftwood Street  
23 intersection will be under traffic signal control.  
24 There will be left turn lanes introduced for the Taco

1 Bell entrance and also for heading southbound into  
2 Lenox Street -- I mean westbound into Lenox Street and  
3 eastbound into Belmont.

4                   So, this is a comparison of the cross-  
5 section on Sumner Avenue west of the X. So, right  
6 now, there's four lanes, four travel lanes, 13-and-a-  
7 half-foot travel lanes. There's a 16-foot tree belt  
8 or buffer outside of that on either side of the road.  
9 And then there's the sidewalk that's currently there.  
10 And the outside edge of the sidewalk is basically the  
11 City layout, the City that the property owns (sic) --  
12 the property that the City owns. And, beyond that is  
13 the property of the residential neighborhood on either  
14 side. Notice there's no bicycle accommodation and  
15 there's no provision for turning lanes.

16                   This is the proposed cross-section.  
17 Four 11-foot lanes for vehicles. In some areas, there  
18 will be a center median island that can be planted.  
19 That intersection is now being replaced with left turn  
20 lanes in one direction or another, in some cases both  
21 directions, five-foot bike lanes on either side, and a  
22 ten-foot tree belt or grass or buffer on either side  
23 that will still accommodate trees. The sidewalks will  
24 be reconstructed essentially in the same location they

1 are now.

2                   At Oakland Street, there will be a left  
3 turn lane in addition to the two through lanes in each  
4 direction for eastbound left turns onto Oakland  
5 Street. Oakland Street will be slightly widened.  
6 It's almost wide enough for two lanes coming out of  
7 Oakland Street now. Some drivers take advantage of  
8 that and queue up in two lanes. But we're going to  
9 provide two, you know, establish two lanes for left  
10 and right turns out of Oakland Street. And there will  
11 be a new signalized intersection here with signalized  
12 crossings of all three legs.

13                   At Ormond Street, there will now be a  
14 signalized intersection at Ormond Street because we're  
15 redirecting Belmont Avenue traffic out Ormond to get  
16 out to Sumner Avenue. The signalized intersection  
17 will incorporate the driveway to the Forest Park  
18 Liquors and the other shops on the north side of  
19 Sumner, and also the Santander Bank will have access  
20 to this signalized intersection.

21                   This is the Forest Park, the main  
22 entrance to Forest Park, the Main Greeting Road.  
23 There will be a left turn lane for entrance into the  
24 park in addition to the two through lanes in each

1 direction. This island opposite the left turn lane  
2 will remain as a flush island, so that will facilitate  
3 Bright Nights, how the lanes get re-established during  
4 Bright Nights. So, we won't have a raised island  
5 here.

6                   Okay. So, I indicated that we have the  
7 opportunity to create some pedestrian amenities in  
8 these plaza areas that are leftover from the two-way  
9 closure of Belmont Avenue on both sides of Sumner  
10 Avenue. So, there's kind of a laundry list of  
11 potential streetscape enhancements that we're  
12 considering. They may not all be incorporated.

13                   I'd like to bring up our landscape  
14 architect, Jon Allard, who designed these pedestrian  
15 spaces.

16                   JONATHAN ALLARD: Thanks, Steve.

17                   Yeah, so, earlier, Steve mentioned that  
18 with the realignments of the roads, it left over some  
19 space for us to kind of get back to the people of  
20 Springfield and the users of this area. I'm just  
21 going to quickly go through some of the components  
22 that may be a part of the final design and  
23 construction.

24                   This plaza is pretty much centered

1 around the relocation of the existing spruce tree out  
2 there for the Christmas holiday lighting. It's going  
3 to be in a raised bed with some stairs and seating  
4 around. This whole plaza is going to be filled with  
5 opportunities for seating for people to come  
6 congregate, maybe eat some lunch from the local shops  
7 out here, just keep them in this area and let them  
8 spend their money at the local shops.

9                   We're going to maintain a pretty wide  
10 walkway from the existing parking area right here to  
11 promote pedestrian flow through the area. There's  
12 going to be opportunities for additional plant beds,  
13 more trees, some signing, signage.

14                   STENOGRAPHER: Can you get a little  
15 closer to the mic?

16                   JONATHAN ALLARD: I'm sorry.

17                   Also, this main plaza area is going to  
18 be filled with some decorative pavers and the  
19 potential of some install artwork, again, multiple  
20 areas for seating around the center area there.

21                   And so this one, it's almost a mimic of  
22 the other one. Again, Dunkin' Donuts area, around  
23 here, providing seating for people to come sit and  
24 enjoy their new open space, a potential art

1   installment, and, again, seating, bicycle racks, just  
2   providing elements for people to come, gather, and  
3   feel safe, and want to spend some time in these plaza  
4   areas.

5                   I believe -- back to Steve.

6                   STEPHEN SAVARIA: Thank you.

7                   The project will be subject to certain  
8   environmental permitting regulations. This mostly has  
9   to do with the multi-use path through Forest Park  
10   because that's the only area within the project that  
11   has any wetland resource areas. So, that's what most  
12   of this has to do with.

13                  We have worked in coordination with the  
14   Parks Department to design this area and this facility  
15   to provide for pedestrian access through the park.

16                  STENOGRAPHER: Steve?

17                  STEPHEN SAVARIA: Yes?

18                  STENOGRAPHER: I know you don't like  
19   the heat --

20                  STEPHEN SAVARIA: Yeah.

21                  STENOGRAPHER: -- but can you back up  
22   just a half a foot?

23                  STEPHEN SAVARIA: Sure. So, next  
24   steps. After this hearing, once again, we're

1 soliciting your input. We're going to take whatever  
2 comments we hear tonight that are submitted in writing  
3 and incorporate revisions to the plans as they are --  
4 as we are able to do so. If that means that this plan  
5 changes significantly, then we will definitely be  
6 providing more public outreach and ask you all to come  
7 back and see what the changes are.

8                   There's contact information. This is  
9 identical to what is in the handout. The feedback  
10 goes to [dot.feedback.highway@state.ma.us](mailto:dot.feedback.highway@state.ma.us). And be sure  
11 and mention the project name and number.

12                   So, we thank you all. That's the end  
13 of this presentation, but we're open to questions and  
14 comments from you all.

15                   MODERATOR CURRIER: Thank you very  
16 much, Steve, Fuss & O'Neill, Jon Allard, the landscape  
17 architect.

18                   I understand we have some elected  
19 officials here this evening. But before we get to  
20 those folks and then the public, we'd like Chris to  
21 say a few words.

22                   CHRIS CIGNOLI: Sure. Just I know  
23 there's a lot of --

24                   STENOGRAPHER: Chris, hang on. Hang

1 on. Sorry. I'm going to juggle these. Go ahead.

2 CHRIS CIGNOLI: I know there's a lot of

3 people here. I just want to introduce a couple of

4 other people from the City so you can grab them.

5 Andrew Krar, who is in the front row,

6 please be very nice to him. He's the brand new city

7 engineer. He just started last week. So, don't

8 pepper him with too many questions.

9 Luca, staff at the Engineering

10 Department, right here in the front.

11 Stefan is in the back.

12 Who else is here? Where is Scott?

13 You're hiding over there. Scott Hanson from the

14 Planning Department has been involved.

15 Most of the people here have been

16 involved with this project. So, at the end of the

17 meeting, if you're looking around for questions, those

18 people will be able to help you. I just wanted to let

19 you know that there was a lot of us here tonight.

20 And, Tom, I'll turn it over to you for

21 some of our elected officials.

22 MODERATOR CURRIER: Thank you, Chris.

23 Are there any elected officials who

24 would like to say a few words before we get started?

1                   Yes, sir. If you could just come up to  
2 the mic and tell us who you are, spell your last name,  
3 and have at it.

4                   COUNCILOR TIMOTHY RYAN: Tim Ryan, R-y-  
5 a-n. And I'm a Springfield City Councilor.

6                   My concerns are, for Chris, what -- you  
7 know, I see the timetable as potential construction  
8 2024. But what's the local approval by the City  
9 Council, by the Mayor on this?

10                  CHRIS CIGNOLI: The only other  
11 approvals that need to go in front of the Council will  
12 be when we need to do any land takings or easements.  
13 And that would probably happen four to six months  
14 before the construction would start, roughly, in  
15 coordination with MassDOT. That's the only other  
16 approval at the City level, at the Council level.

17                  COUNCILOR TIMOTHY RYAN: Okay. Because  
18 my concerns are it's a two-year construction schedule.  
19 I'm not sure that when all this is said and done that  
20 the traffic flows any quicker. And I'd be interested  
21 to know what the cost of the signal improvement versus  
22 the whole ripping everything up and starting all over,  
23 the extent of the taking, the extent of the removal of  
24 trees. I mean we're talking about removing it looks

1    like a lot on Sumner Ave. from the entrance to the  
2    park all the way up to past Ormond Street. And I'm  
3    very concerned. Obviously, Dickinson Street up there  
4    between Holy Name and the X is very narrow. So, you  
5    know, you've got the five-foot walks between the  
6    buildings. So, I'm just very concerned as to the  
7    extent of the takings and what that does and what that  
8    does to the neighborhoods, what that does to the  
9    beauty of the homes. I know there's a couple of  
10   historic trees across from Trinity Church. So, all of  
11   these things -- one of those trees is right there  
12   along the roadway. And, you know, if we're going to  
13   expand the roadway then we're taking that tree, and  
14   there's probably some other significant trees. And I  
15   just have a very real concern as to, at least on the  
16   local level, I want to be assured that this is  
17   actually going to be a step forward and not just  
18   moving -- removing old pavement for new pavement. And  
19   I guess that case hasn't been made tonight.

20                   MODERATOR CURRIER: Thank you.

21                   COUNCILOR TIMOTHY RYAN: Thank you.

22                   MODERATOR CURRIER: Thank you very  
23   much.

24                   Is there anyone else who would like to

1 speak before we open it up to the general public?

2 STENOGRAPHER: Excuse me. Excuse me.

3 We're just looking for elected officials.

4 MODERATOR CURRIER: And then we'll --

5 COUNCILOR JESSE LEDERMAN: I'll be

6 quick. I'll be really quick.

7 Hi. I'm City Councilor Jesse Lederman.

8 I also happen to live -- oh, I apologize.

9 STENOGRAPHER: Let's start again from

10 the top. Hang on.

11 COUNCILOR JESSE LEDERMAN: Oh, right.

12 STENOGRAPHER: I've just got to get the

13 feedback down. Okay.

14 COUNCILOR JESSE LEDERMAN: Are we good?

15 Thank you.

16 City Councilor Jesse Lederman. I also

17 happen to be a resident a couple of blocks away.

18 I just wanted to thank you guys for

19 coming out and holding the public hearing, a really

20 important part of any process. And I'm really mainly

21 here for the same reason, which is to hear concerns of

22 constituents and how we can best advocate for them as

23 the process goes forward and relative to our role in

24 the process with the City Council, the land takings

1 and such.

2                   One initial question I just have is  
3 around the proposed walking trail around the edge of  
4 the park is what does the lighting and security look  
5 like on that particular project or aspect of the  
6 project. Also, I'm curious about just the total cost  
7 on the project and the funding source in terms of any  
8 sort of land takings or anything like that. Is that  
9 all coming out of the DOT funds?

10                   MODERATOR CURRIER: Correct.

11                   COUNCILOR JESSE LEDERMAN: Or is there  
12 any City funds that will come into play with that?

13                   MODERATOR CURRIER: So, the estimated  
14 cost today is about \$11-and-a-half million, and 80 to  
15 90 percent of that is federally funded. The rest, it  
16 comes from MassDOT's budget.

17                   The land takings are federal? No?

18                   CHRIS CIGNOLI: No, the land takings  
19 are --

20                   MODERATOR CURRIER: On the City.

21                   CHRIS CIGNOLI: On the City.

22                   MODERATOR CURRIER: Yeah, the municipal  
23 right of way acquisition on this project. So, the  
24 City would have to buy the easements necessary to

1 build the project.

2 COUNCILOR JESSE LEDERMAN: Do we have  
3 an estimate on that cost or a potential funding  
4 source.

5 CHRIS CIGNOLI: We do not have -- we do  
6 not have an estimate of that. However, 90 percent of  
7 the time, we use Chapter 90 funds for that. So there  
8 would not need to be a specific appropriation at the  
9 City level to cover that. We use our Chapter 90  
10 funds.

11 COUNCILOR JESSE LEDERMAN: Yeah, I mean  
12 our average Chapter 90 funds are what, a million-and-  
13 a-half a year, three million this year.

14 CHRIS CIGNOLI: Three-and-a-half.

15 MODERATOR CURRIER: Wow.

16 COUNCILOR JESSE LEDERMAN: So, do we  
17 have an idea as to a ballpark on total land takings?

18 CHRIS CIGNOLI: I would probably guess  
19 it's upwards over \$100,000.

20 COUNCILOR JESSE LEDERMAN: Okay. So,  
21 we're not talking \$500,000; we're not talking a  
22 million?

23 CHRIS CIGNOLI: No.

24 COUNCILOR JESSE LEDERMAN: All right.

1 Well, thank you guys very much. And I'll look forward  
2 to monitoring the project closely with my colleagues.  
3 And I'll also be having a conversation with Councilor  
4 Williams, the Chair of the Maintenance and Development  
5 Committee where I sit on. So, just remember, for the  
6 public that are here, also, that oversight does exist.  
7 In the meantime, in between hearings, if questions  
8 arise, please feel free to reach out to us and we can  
9 address some of that at the committee level as well.

10 Thanks, Chris.

11 JONATHAN ALLARD: Councilor, I do have  
12 an answer to your question regarding the path  
13 lighting.

14 COUNCILOR JESSE LEDERMAN: Oh, thank  
15 you. Yeah.

16 JONATHAN ALLARD: This is something we  
17 discussed with Parks. Initially, they were kind --  
18 they weren't convinced that was a good idea. They  
19 didn't necessarily want to encourage use of the park,  
20 you know, during the nighttime hours. But the plans,  
21 as they stand right now, have lighting through the  
22 entire multi-use path, the length of the entire multi-  
23 use path.

24 COUNCILOR JESSE LEDERMAN: Yeah, I

1 think that that's the nuance of it is if it's not open  
2 at night, then there needs to be a way to secure it.  
3 If it is open at night, then it needs to be lit. And  
4 then what that also brings is I see there's a section  
5 of that that will go behind some residences.  
6 Certainly, you know, I know that the Parks Department  
7 director has already upgraded lighting to LED  
8 lighting. And folks that are here that know me, and  
9 Chris knows I'm a big fan of LED lighting, but those  
10 are a bit brighter and a bit harsher in some  
11 situations. So, if we're then going to have those  
12 along the trail, we need to make sure that they're not  
13 shining into the homes of the abutting residences.

14 Thanks.

15 MODERATOR CURRIER: Yes, ma'am. Hi.

16 COUNCILOR KATERI WALSH: Good evening.  
17 City Councilor Kateri Walsh. And I'm actually really  
18 here to listen, but I remain concerned about any use  
19 of parkland. So I'll be monitoring that.

20 MODERATOR CURRIER: Thank you.

21 STENOGRAPHER: I'm sorry, Councilor  
22 Walsh, would you spell your first name, please?

23 COUNCILOR KATERI WALSH: K-a-t-e-r-i.

24 MODERATOR CURRIER: Thank you.

1 COUNCILOR KATERI WALSH: Kateri.

2 MODERATOR CURRIER: Yes, ma'am.

3 CHRIS CIGNOLI: Before you speak, I  
4 just wanted to mention one thing.

5 Some of you may end up having to leave.  
6 The presentation that we have behind us tonight, in  
7 the next few days we'll try to get it posted on the  
8 DPW's website and also on our Facebook page. And  
9 we're going to share it with the Office of  
10 Communications, so we hope to have it in multiple  
11 places within the City websites and Facebook if you  
12 want to be able to go through it following this  
13 meeting.

14 MODERATOR CURRIER: Great.

15 CHRIS CIGNOLI: Thank you.

16 IRENE FONTAINE: Irene Fontaine. I  
17 live at 17 Grenada Terrace in Springfield, right  
18 across from Burlington.

19 MODERATOR CURRIER: Can you spell your  
20 last name for us, please?

21 IRENE FONTAINE: F-o-n-t-a-i-n-e.

22 I was wondering how is that going to  
23 affect my street? It's like there's an island. And  
24 when we back out, it's hard to get out on our street.

1 I wanted to know if it's going to affect us.

2 MODERATOR CURRIER: I'm going to have  
3 to rely on our designers here to answer this question.

4 STEPHEN SAVARIA: Sorry. Can you  
5 describe where the location is you're speaking of?

6 IRENE FONTAINE: Grenada Terrace.

7 STEPHEN SAVARIA: Grenada Terrace.

8 IRENE FONTAINE: It's across from  
9 Burlington where Dickinson is, where the church is.  
10 There's an island. It's hard getting out of our  
11 driveways as is with the island. And I was wondering  
12 if there's going to be a lot of traffic where we won't  
13 be able to get out.

14 MODERATOR CURRIER: Are you familiar  
15 with that location, Steve?

16 STEPHEN SAVARIA: I'm just not familiar  
17 with that location.

18 MODERATOR CURRIER: Can we point to it?

19 CHRIS CIGNOLI: I can help with that.

20 MODERATOR CURRIER: Yeah, great, Chris.  
21 That would be great. Thank you.

22 CHRIS CIGNOLI: That is right here.

23 IRENE FONTAINE: It's across from Holy  
24 Name, my street.

1                   CHRIS CIGNOLI: Holy Name Church. Not  
2 to speak for Steve, but one of the things this project  
3 should do is very much relieve a lot of the cut-  
4 through traffic that happens now. So, what our hope  
5 is is that the side streets, Grenada and some of the  
6 others, will see a reduction in cut-through traffic of  
7 people like me who do it all the time trying to avoid  
8 the mainline at the X. With the changes that we're  
9 making, getting through the corridor will be a lot  
10 easier and reduce a lot of the cut-through traffic on  
11 the side streets.

12                  IRENE FONTAINE: Okay. Thank you.

13                  STEPHEN SAVARIA: Grenada Terrace  
14 itself is outside the project limits. There's  
15 nothing, no construction proposed there.

16                  MODERATOR CURRIER: It's a great  
17 question. Thank you.

18                  Yes, sir?

19                  CHARLES GRAY: Good evening. My name  
20 is Charles Gray. I'm president of the Board of  
21 Trustees for Trinity United Methodist Church.

22                  First of all, thank you all for being  
23 here and providing this forum. It's really helpful to  
24 me and to our membership. So, thank you for being

1 here.

2                   We appreciate and applaud the goals  
3 that you have for improving safety around the X. In  
4 fact, we share them. At the same time, we've got some  
5 concerns as the renditions have been laid out to us  
6 and as I've heard this evening.

7                   As you may be aware, Trinity United  
8 Methodist Church is a longstanding good neighbor to  
9 the Forest Park community. We have over 700 members,  
10 many of whom are in attendance this evening, all who  
11 live in close geographic proximity and have a very  
12 vested interest in this project.

13                   In addition to our membership, we also  
14 have a number of groups that use our facilities on a  
15 regular basis. In fact, 365 days of the year, we have  
16 groups in Trinity United Methodist Church. The list  
17 is countless. But, trust me, it's long, and probably  
18 many people in this room have been a part of Trinity  
19 at one point in their lives.

20                   So, based upon what we've seen so far,  
21 I'd just highlight a few concerns that we have. The  
22 first, and probably the biggest that we have, is the  
23 rendering does not have a turning lane for westbound  
24 Sumner Avenue traffic onto Continental Street. So,

1 similarly, as you're exiting Continental Street, the  
2 main access and egress for Trinity Church, there's no  
3 left turn because there's a pylon in the middle. So,  
4 this obviously would impact our membership, the  
5 nursery school, and all the families that use our  
6 church and facilities on a regular basis as well as  
7 our guests.

8                   Second, the tree belt mentioned  
9 earlier, the takings, would eliminate on-street  
10 parking that we rely upon not only in our congregation  
11 in the community, but also in the guests that use  
12 Trinity on a regular basis.

13                   Third, the general aesthetics. You had  
14 spoken earlier about the adverse impact, including the  
15 reduced use of our front lawn and the potential loss  
16 of beautiful trees. It would have an impact on the  
17 church and on the community.

18                   The exit across from Oakland Street,  
19 looking at it on the far left of the rendition up  
20 here, does not appear to have a signal that would --  
21 currently, there's a signal there. The signal does  
22 not face inward towards Trinity's exit on that side.  
23 It doesn't appear that that's addressed. There's only  
24 three-way traffic. We'd love to have four-way traffic

1 to get safely left onto Sumner Ave.

2                   With respect to behind Trinity Church,  
3 that creation of the Trafton Road walking bike path  
4 connecting Dickinson to Sumner could have some  
5 negative impacts on our church and the community,  
6 addressed earlier: a potential for increased  
7 vandalism, trespass, etc. And, at this point, I don't  
8 think we fully comprehend and understand what the  
9 mitigating measures that you'd employ to address those  
10 attractive nuisances that would be created.

11                   Also, it's unclear how the impact of  
12 fire lanes, both in front of and beside Trinity's  
13 Church, as well as access and egress of larger  
14 vehicles, including the mobile food bank that we  
15 support, and fire and safety vehicles, would be  
16 addressed.

17                   And, finally, like everyone, we're  
18 going to be negatively impacted by the general  
19 construction, the two-year construction, the nuisances  
20 and the inconveniences.

21                   So, I mention these in the full spirit  
22 of cooperation. We applaud the ability to have this  
23 voice. We thank you. And we'd appreciate the open  
24 dialogue.

1 Thank you.

2 MODERATOR CURRIER: Steve, do you have  
3 any responses to any of that?

4 STEPHEN SAVARIA: The only thing that I  
5 know that we've already considered is signalization of  
6 the driveway at Oakland Street. I believe that it's  
7 feasible to do that. So, we are going to look into  
8 incorporating that.

9 MODERATOR CURRIER: Great. Great.  
10 Thank you.

11 What about the trees? I know there's  
12 several people in the audience who are very concerned  
13 about these legacy beautiful trees in here. Do you  
14 know which ones are going to go and which ones are  
15 going to stay?

16 STEPHEN SAVARIA: Jon, do you want to  
17 answer that?

18 JONATHAN ALLARD: Yeah. So, I mean you  
19 can see on the rendering the ones that are new or  
20 proposed, the darker trees. And the ones that are  
21 kind of faded out are the existing trees.

22 STENOGRAPHER: Excuse me, Jon. Can you  
23 move next to Steve? I can't hear you.

24 JONATHAN ALLARD: Yeah, I'm sorry.

1                   On the plan, the darker trees are the  
2   proposed trees, so the trees that are going to be  
3   installed as part of this project. And the kind of  
4   faded out into the background are the existing, which  
5   will remain.

6                   That being said, we work with the  
7   engineers hand-in-hand during the design project. My  
8   goal as a landscape architect is always to save any  
9   old tree or any tree for that matter. But there are  
10  cases where during the design that it's not feasible  
11  just due to kind of roadway alignments, stuff like  
12  that. But we do work side-by-side. I work right next  
13  to Nick every day. And I give him a little shove  
14  saying, "Hey, let's look at saving this tree."

15                  So, that being said, on that plan, we  
16  do show trees that will be removed.

17                  CHARLES GRAY: I'm sure there are a  
18  number that are in this community.

19                  JONATHAN ALLARD: Yeah.

20                  CHARLES GRAY: There's at least 200-  
21  plus-year-old trees that look like they're in the  
22  danger zone that are on Trinity's property.

23                  JONATHAN ALLARD: Yeah. And we do have  
24  an open dialogue with the City forester as well. He

1 will, as part of this, will have a public meeting for  
2 the removal of trees along Sumner and along the rest  
3 of the project as well.

4 MODERATOR CURRIER: So, we'll be doing  
5 an ENF or an NOI --

6 JONATHAN ALLARD: Yes.

7 MODERATOR CURRIER: -- tree hearing?

8 JONATHAN ALLARD: Yes.

9 MODERATOR CURRIER: Great.

10 CHARLES GRAY: But, again, thank you  
11 for the dialogue.

12 MODERATOR CURRIER: Yes.

13 CHARLES GRAY: I'll follow this up in a  
14 letter later this week. So, thank you.

15 MODERATOR CURRIER: Thank you.

16 Yes, sir?

17 JOEL SENEZ: Good evening. I'm Joel  
18 Senez. I'm from 17 Garfield Street, the road that  
19 runs just behind the school right here.

20 STENOGRAPHER: Folks, folks, everyone  
21 who comes up to speak, please remember you have to  
22 spell your last name because I have no idea who you  
23 are.

24 JOEL SENEZ: All right. Joel Senez, S-

1 e-n-e-z.

2 STENOGRAPHER: Thank you.

3 JOEL SENEZ: Thank you.

4 So, my concern, it looks like from  
5 everything I've been shown that this should mitigate  
6 some of the cut-through traffic that we see on  
7 Garfield if Sumner is improved and Belmont is  
8 improved. My concern is during construction that  
9 Garfield Street already is a major cut-through for  
10 people coming westbound on Sumner to get over to  
11 Forest Park Ave. and just heading anywhere towards 91  
12 going north, if there's going to be any mitigation  
13 during construction for that inevitable increase in  
14 traffic coming through that neighborhood both going  
15 westbound on Garfield, but then also an increase of  
16 people coming down Greenleaf and going eastbound on  
17 Fairfield Street. So, I think that's going to be a  
18 huge kind of cut-through for people trying to avoid  
19 all the X traffic that's going to take place during  
20 construction.

21 MODERATOR CURRIER: Yeah.

22 JOEL SENEZ: So, I don't know if  
23 there's plans for mitigation during construction or  
24 how that works.

1                   MODERATOR CURRIER: This will be  
2 administered by MassDOT resident engineers. We'll  
3 have to monitor that as the construction progresses.  
4 And perhaps there's actions they can take to divert  
5 traffic elsewhere if it's overburdening some of these  
6 cut-throughs that you've mentioned.

7                   JOEL SENEZ: Okay. So that will be an  
8 as construction is happening decision?

9                   MODERATOR CURRIER: I think they'll  
10 have to watch it, yeah.

11                  JOEL SENEZ: Rather than something that  
12 can be prepared for?

13                  MODERATOR CURRIER: Yes, I believe so.  
14 I think we can try and divert them elsewhere. If  
15 they're hitting a particular street too hard, perhaps  
16 we can shut that street down and move them elsewhere.  
17 It's going to have to be an ongoing, fluid, dynamic  
18 kind of situation that the resident engineers are  
19 going to have their hands full with. I know there's  
20 going to be lots of communication required during the  
21 construction period with all the businesses and the  
22 contractor to make sure everybody knows in advance  
23 what's going to happen next.

24                  JOEL SENEZ: Okay.

1                   MODERATOR CURRIER: So that would be  
2 one of the discussions that they'd have an ongoing  
3 dialogue about is cut-through traffic and how to  
4 mitigate it.

5                   JOEL SENEZ: Okay.

6                   STEPHEN SAVARIA: And during the design  
7 phase, too, again, this is a 25 percent plan, so we do  
8 have a traffic management plan that we do prepare.  
9 And, you know, Garfield Street is definitely on our  
10 radar to see. We know that there's going to be cut-  
11 through traffic during construction. And there might  
12 be plans, depending upon how the construction is  
13 phased with the roundabouts on Belmont Avenue, that we  
14 would come up with a plan to, you know, restrict  
15 traffic to only local traffic only, so to speak, on  
16 Garfield Street. So, there's certain things we're  
17 going to have to look at --

18                  JOEL SENEZ: Okay.

19                  STEPHEN SAVARIA: -- as the design  
20 progresses. I think, like Tom said, a large portion  
21 is going to be being reactive, unfortunately. We will  
22 be as proactive as we can prior based on the  
23 anticipated construction phasing. But, at the end of  
24 the day, a lot of the construction activities is up to

1 the contractor's means and methods to build the  
2 project. So, he or she may decide to, you know, do  
3 temporary lane closures or close certain streets.  
4 And, unfortunately, it's hard for us to predict that  
5 ahead of time.

6 So, that's kind of what Tom was  
7 alluding to is that a lot of this has to be decisions  
8 made once we receive the contractor's construction  
9 plan, which they will provide prior to the start of  
10 any shovel hitting the ground.

11 MODERATOR CURRIER: But they don't run  
12 the show. MassDOT runs the show.

13 STEPHEN SAVARIA: Correct.

14 MODERATOR CURRIER: So, if we see in  
15 advance that there's going to be an issue with their  
16 proposed schedule of work, we'll change it.

17 JOEL SENEZ: Now, Chris, this may be  
18 for you, but is there an opportunity for the City to  
19 mitigate the kind of -- not involved with the direct  
20 project but maybe the surrounding neighborhoods  
21 outside of the funding for the project if it becomes  
22 an issue as we move forward?

23 CHRIS CIGNOLI: One of the things, just  
24 to address your concern, we do get involved with

1 MassDOT, and they're right. But when we start looking  
2 at construction sequencing and what they can do and  
3 what they can't do, in my opinion, under no  
4 circumstances are we going to have a formal detour  
5 through neighborhoods for this.

6 JOEL SENEZ: Right.

7 CHRIS CIGNOLI: That will never happen.  
8 You know, and the idea of restricting it to local  
9 traffic during times of construction and monitored by  
10 police, absolutely. When we start putting the traffic  
11 management plan together, as Steve was mentioning, we  
12 then work with MassDOT and the contractor, telling  
13 them what they -- I don't like to say it this boldly,  
14 but telling them what they can and can't do. You  
15 know, they're not going to come in and just say, "Hey,  
16 we're going to send all the traffic down, you know,  
17 Greenleaf or, you know, Forest Park Ave.," and all  
18 that. It's like, no, we work with them on that.

19 JOEL SENEZ: Okay. And then a concern  
20 about an area that does not necessarily look like it's  
21 in the scope of the project, but the shift on  
22 Cliftwood and Lenox. Where cars are coming right out  
23 of the X onto Lenox, they're then going to have to  
24 cross traffic at Cliftwood to go left to get out to

1 Dickinson. Is that my understanding?

2 STEPHEN SAVARIA: That's right, yes.

3 JOEL SENEZ: And then there's no --  
4 nothing in place for that Cliftwood and Dickinson  
5 intersection because that's one of the most difficult  
6 areas --

7 MODERATOR CURRIER: Right.

8 JOEL SENEZ: -- in this whole -- in the  
9 X in general is that. What's going to happen back  
10 there when cars are trying to go left on Lenox? I can  
11 see it backing up all the way down Lenox to Sumner  
12 Ave. because you can't get left across that traffic if  
13 there's nothing stopping people on Cliftwood from  
14 coming off of Dickinson.

15 CHRIS CIGNOLI: I agree. At that  
16 intersection, left turns are -- there's not a lot of  
17 them because there's not a lot of cars coming out of  
18 there taking a left. We expect to see a lot less  
19 traffic on Cliftwood in the opposite direction because  
20 now going up to the X, there's people who take a left  
21 on Dickinson, from Dickinson onto Sumner, which is  
22 restricted. That's going to be allowed in the future,  
23 so there's going to be a lot less traffic. But, in  
24 the opposite direction, by switching these back and

1   forth here, rather than coming down the side street  
2   here, you're coming down the side street here. It  
3   really doesn't end up helping you the way that it does  
4   now because now you're stuck at two lights. In the  
5   future, there's only a light here. You're already  
6   through this light to get here. So, I expect that  
7   there's going to be a lot less traffic.

8                   JOEL SENEZ: So, we would just bypass  
9   Lenox altogether?

10                  CHRIS CIGNOLI: Yeah. Yeah, because  
11   once you're past that, now you're at -- you get stuck  
12   at Lenox at a light, and then you can also get stuck  
13   at Dickinson at a light --

14                  JOEL SENEZ: Yeah. Yeah.

15                  CHRIS CIGNOLI: -- depending upon what  
16   phase you're in. In the future, you'll have a free  
17   right there and you'll already be past the light  
18   before you can take the right.

19                  The other thing now is we also have a  
20   number of businesses there where everybody just cuts  
21   through the businesses as well. So that's going to  
22   end up being almost eliminated as well. So, I  
23   anticipate a lot less traffic having to do that cut-  
24   through.

1 JOEL SENEZ: Okay. Thank you.

2 CHRIS CIGNOLI: Thank you.

3 MODERATOR CURRIER: Great discussion.

4 Yes, sir?

5 NORMAN BLISS: Norman Bliss, 78

6 Garfield Street. And the last name is B as in Boston-  
7 l-i-s-s.

8 And the preceding gentleman covered  
9 many of my concerns. I'll be brief, but I still have  
10 one thought, and that is to what extent the Bright  
11 Nights traffic that makes our lives miserable for over  
12 one-tenth of the year. I do see this gentleman did  
13 discuss how the widening up to Oakland may make  
14 traffic coming from the X, although I'm not convinced  
15 that's going to be that much better. But I'm still  
16 concerned since the City has this weird idea that  
17 reducing Sumner going eastbound from four lanes to  
18 three is a great way to handle increased traffic. It  
19 isn't. And it encourages more neighborhood traffic.

20 But it's still going to be full of  
21 traffic coming down to Main Greeting Road because  
22 you're not making any adjustments west of that. So,  
23 has that been taken into consideration at all.

24 STEPHEN SAVARIA: It has been taken

1 into consideration. Obviously, the project limits are  
2 at Main Greeting Road. From that point east, you  
3 know, Sumner Avenue is going to be quite a bit wider  
4 than it is now, which should give more flexibility in  
5 terms of the length, the extent of the dedicated lanes  
6 for traffic entering and exiting Bright Nights.

7 But, as you've stated, west of Main  
8 Greeting Road, there really is not going to be any  
9 change.

10 NORMAN BLISS: Okay. Thank you.

11 MODERATOR CURRIER: Thank you.

12 SHEILA MCELWAINE: My last name is  
13 spelled M-c-E-l-w-a-i-n-e. I'm a member of WalkBike  
14 Springfield and I'm also a neighborhood resident. And  
15 I have two issues.

16 One is communication with the public.  
17 This is the second DOT really public meeting.

18 MODERATOR CURRIER: Yeah.

19 SHEILA MCELWAINE: And the last one was  
20 three-and-a-half years ago. We get questions in  
21 WalkBike and as a neighborhood resident all the time  
22 about what's happening with the X redo.

23 MODERATOR CURRIER: Yeah.

24 SHEILA MCELWAINE: Chris, what can you

1 do to keep us current because this timeline that was  
2 laid out is really that's ten years from the first  
3 public meeting, ten years plus.

4 CHRIS CIGNOLI: Mm hum.

5 SHEILA MCELWAINE: And people get  
6 discouraged when they think things aren't going to  
7 happen. I know these things take a long time. But  
8 what can you do to improve ongoing communication with  
9 the public?

10 CHRIS CIGNOLI: One of the things that  
11 I can guarantee from the City's standpoint is, while  
12 this is a mandated MassDOT public hearing, we're going  
13 to have more. We will have more presentations whether  
14 it is just at the civic association level or it is at,  
15 you know, a bigger meeting like this.

16 SHEILA MCELWAINE: I'd just like to  
17 point out that the civic association represents the  
18 western part of the neighborhood. This is a large and  
19 varied neighborhood of 25,000 people. And there's no  
20 way in the world that a small group of volunteers can  
21 keep 25,000 people current on this project.

22 MODERATOR CURRIER: What about your  
23 website, Chris?

24 CHRIS CIGNOLI: Well, the information

1   that we do on the project, we try to get it up. And  
2   just to go backwards a little bit, this project being  
3   longer, you're 100 percent right. The specific reason  
4   is being at \$11 million, it is eating into a huge  
5   chunk of the region's money that comes in. And in  
6   order for us to get into a fiscal year where all that  
7   money is available, they need to push us out. If we  
8   were a million-and-a-half-dollar intersection project  
9   or a \$2 million, we can kind of sneak into other  
10  fiscal years. That's the reason why this is pushed  
11  out so far so that dedicated money is there.

12                   SHEILA MCELWAIN: Then you need to  
13  explain that to the general public in a way they can  
14  understand.

15                   CHRIS CIGNOLI: And I have no problem  
16  doing that. But, as we move forward, you know, I  
17  mentioned the Forest Park Civic Association. And I'm  
18  not trying just to keep it to that association and  
19  those people specifically. They have a forum in the  
20  neighborhood rather than just having a meeting. I'd  
21  also like to make a presentation to the East Forest  
22  Park Civic Association. That neighborhood is also  
23  included as well in what we're doing. So, we're going  
24  to be making presentations as we move on, especially

1 as we get closer to the construction sequence or the  
2 timing of the sequencing for bidding, but also as we  
3 move through the 75 percent phases, if there are any  
4 whether minor or major changes to what we're proposing  
5 here. And some of those meetings will also allow us  
6 to go into a huge more detail about specific areas for  
7 people as well.

8                   SHEILA MCELWAIN: Have you considered  
9 having informational panels posted around the  
10 neighborhood or information in the library for people  
11 where you post updates --

12                  CHRIS CIGNOLI: Oh, absolutely.

13                  SHEILA MCELWAIN: -- where we can send  
14 people who ask us for information which we don't have?

15                  CHRIS CIGNOLI: Absolutely. And,  
16 really, we wanted to get to this milestone before we  
17 did that because, really, once we get past this, not  
18 that stuff doesn't change greatly -- it can -- but  
19 it's a lot more carved in stone. We have reasons why  
20 we do things, reasons why we don't do this. So, this  
21 information will get shared as we move on because I  
22 agree with you. If all of a sudden there's no word  
23 for a year, people are going to forget that it's even  
24 happened.

1                   SHEILA MCELWAIN: Well, there have  
2   been three years.

3                   CHRIS CIGNOLI: Yeah.

4                   SHEILA MCELWAIN: Three years of  
5   silence really for Jack and Jill six-pack out there.  
6   Okay?

7                   CHRIS CIGNOLI: I agree with you.

8                   SHEILA MCELWAIN: Okay. I understand  
9   that you hear me. Okay.

10                  CHRIS CIGNOLI: Yeah.

11                  SHEILA MCELWAIN: And I'll be looking  
12   for changes.

13                  CHRIS CIGNOLI: Thank you.

14                  SHEILA MCELWAIN: Secondly, I'm  
15   wondering how the crosswalks have been coordinated  
16   with the bus stops. Have you looked at that?

17                  MODERATOR CURRIER: Great question.  
18   Great question?

19                  SHEILA MCELWAIN: And, WalkBike feels  
20   that there are insufficient crosswalks on Sumner  
21   Avenue. And I would add, as someone who lives near  
22   Belmont Avenue, Belmont Avenue as well.

23                  MODERATOR CURRIER: I'm going to,  
24   again, lean on Steve here.

1                   STEPHEN SAVARIA: We have met with PVRTA  
2 and have coordinated our design with their kind of  
3 plans for service on Sumner Avenue. The major  
4 westbound stop that now stops in front of the X Pub, I  
5 that areas where they sometimes need to get two or  
6 maybe even three buses in there, we've provided along  
7 our pedestrian plazas areas for them to do that.

8                   They have eliminated some stops on  
9 Sumner Avenue, which kind of cuts down on -- and  
10 they're looking to establish a certain separation  
11 between stops on Sumner Avenue.

12                  SHEILA MCELWAIN: Because the reason -  
13 - the issue is that people coming from the north and  
14 the south side of Sumner Avenue might want to get on a  
15 bus on the other side of the street.

16                  STEPHEN SAVARIA: Right.

17                  SHEILA MCELWAIN: And coming home,  
18 they're going to want to cross in the opposite  
19 direction.

20                  STEPHEN SAVARIA: Right. So, there  
21 will be a new signalized crossing at Ormond Street,  
22 which doesn't exist now, and there is a bus stop right  
23 there. And the pedestrian crossings at the X will be  
24 enhanced and there will be signalized crossings at

1 Dickinson as well. So, I mean that basically kind of  
2 frames the area where the bus stops are.

3 MODERATOR CURRIER: You can see the  
4 crosswalks up on the drawing up there.

5 CHRIS CIGNOLI: At Oakland, at the area  
6 up where Taco Bell is, the --

7 STENOGRAPHER: I can't hear you, Chris.  
8 I can't hear you unless you say that back here,  
9 please. Say it again.

10 CHRIS CIGNOLI: The four locations,  
11 obviously, at Oakland, the area by Taco Bell, which is  
12 one of the areas now where people cross anyways.

13 SHEILA MCELWAINE: Are the bus stops  
14 indicated on your visual?

15 STEPHEN SAVARIA: They are on there.

16 CHRIS CIGNOLI: The bus stops, there is  
17 a main bus stop here, and there is a main bus stop  
18 here, and there's one at Trinity.

19 SHEILA MCELWAINE: They're indicated on  
20 the map. If I get this map, it will say "bus stop?"

21 CHRIS CIGNOLI: Yes. Yeah, they're on  
22 there. Yeah.

23 SHEILA MCELWAINE: Okay. Thank you.

24 CHRIS CIGNOLI: They're all pullouts,

1 correct, Steve?

2                   STEPHEN SAVARIA: The one in front of

3 Trinity Church is not.

4                   CHRIS CIGNOLI: Okay.

5                   STEPHEN SAVARIA: It's where the

6 parking is there.

7                   CHRIS CIGNOLI: Okay.

8                   MODERATOR CURRIER: And that will be on

9 the City website.

10                  CHRIS CIGNOLI: Yes. Yes.

11                  MODERATOR CURRIER: Right.

12                  SHEILA MCELWAIN: Okay. Thank you.

13                  MODERATOR CURRIER: Thank you.

14                  VICTOR DAVILA: Good evening,

15 everybody. My name is Victor Davila. I'm the

16 president of the Forest Park Civic Association.

17                  MODERATOR CURRIER: Victor, can you

18 spell your last name for us?

19                  VICTOR DAVILA: Sure. My apologies.

20 Victor Davila, D-a-v-i-l-a.

21                  MODERATOR CURRIER: Thank you.

22                  VICTOR DAVILA: I am the president of

23 the Forest Park Civic Association. And, a thank you

24 to all of you. And, Chris, thank you for this

1 wonderful presentation.

2                   The lady before me pre-empted my  
3 question, the bus stops. About a year-and-a-half ago  
4 or so, not only did we have a 30 percent bus fare  
5 increase, but, as you mentioned, PVTa did get rid of  
6 some of the bus stops. If I understood you correctly,  
7 you're saying that there is a map that shows the  
8 current where the bus stops will be with this layout.

9                   MODERATOR CURRIER: Yes.

10                  VICTOR DAVILA: Okay. That's good.  
11 That will be very helpful because the X, there's a lot  
12 of buses, you know, a lot of buses going through, and  
13 a lot of people, a lot of handicapped people that take  
14 the bus there.

15                  I don't recall right now, but those  
16 roundabouts, I think there's a bus stop nearby,  
17 particularly by the CVS.

18                  STEPHEN SAVARIA: Yes.

19                  VICTOR DAVILA: So, I just urge you not  
20 to impact or minimize the impact on the bus stops.

21                  Well, talking about the CVS, I am  
22 excited that there's going to be a crosswalk between  
23 CVS and Ormond Street because that is actually a very  
24 dangerous spot. So, I'm excited about that.

1                   But I would urge you to -- the  
2   lighting. I think if you recall much of the lighting,  
3   it's still pretty dark there. And it's very  
4   dangerous. So, did you say there's going to be  
5   improved lighting with that area as well?

6                   CHRIS CIGNOLI: There will be new  
7   lighting installed throughout the project, new street  
8   lighting.

9                   VICTOR DAVILA: But in that particular  
10  -- are they going to be bright in some spots? Because  
11  the reason I ask because I'm concerned that we're  
12  still going to have jaywalkers. And I'm just very  
13  concerned with that area. I've seen pretty close  
14  calls there as it is now. So, I would urge you to  
15  ensure that it's pretty bright.

16                  MODERATOR CURRIER: That's a terrific  
17  comment.

18                  VICTOR DAVILA: Now, the character of  
19  the neighborhood is very important to me.

20                  MODERATOR CURRIER: Yeah.

21                  VICTOR DAVILA: I do believe somebody  
22  say that the Christmas tree -- I think you're calling  
23  that the North Plaza?

24                  CHRIS CIGNOLI: Yes.

1                   VICTOR DAVILA: I've just got one thing  
2 to say. Don't mess with the Christmas tree. Leave it  
3 alone. That's a staple for the community. You know,  
4 I'm not an expert, but please don't mess with the  
5 Christmas tree.

6                   Finally, I do want to say that the bend  
7 between Belmont, right behind I think that's called  
8 CAP, the auto parts there --

9                   MODERATOR CURRIER: Yeah.

10                  VICTOR DAVILA: -- that goes to Sumner  
11 Avenue, I'm excited that it's going to be more open  
12 space where people are going to be able to see Dunkin'  
13 Donuts. But for a fraction of a second, that's a  
14 closed bend there; you cannot see. I'm just concerned  
15 with the possible increased foot traffic that we may  
16 have somebody hit in that location. So, do you have  
17 anything extra that we can do to minimize that in that  
18 particular location? Right behind the auto parts.

19                  CHRIS CIGNOLI: I'm sorry. The area  
20 that Victor is talking about is right here, correct?

21                  VICTOR DAVILA: Right.

22                  CHRIS CIGNOLI: And with the exception  
23 of -- there are a bunch of trees, I believe there's a  
24 bunch of arborvitaes there that kind of block a lot of

1     that view.

2                   VICTOR DAVILA:   Right.

3                   CHRIS CIGNOLI:   A lot of those will go  
4     away.  But there's a tree in the middle that stays,  
5     correct?

6                   JONATHAN ALLARD:  Yeah, the big oak  
7     tree.

8                   CHRIS CIGNOLI:   The big tree stays  
9     there.  So, a lot of those other arborvitaes that are  
10    there were actually there to block the traffic  
11    controller before.

12                  VICTOR DAVILA:   Okay.

13                  CHRIS CIGNOLI:   So, a lot of those are  
14    going away.  So, the visual of people being able to  
15    see that you don't have now will be there during this,  
16    yes.

17                  VICTOR DAVILA:   Okay.  So, finally, I  
18    just want to say I know that there's going to be a  
19    traffic impact that we need to be realistic about  
20    this.  There's going to be a traffic impact.

21                  MODERATOR CURRIER:  Yeah.

22                  VICTOR DAVILA:   But I'm sure you guys  
23    are going to do your due diligence.

24                  MODERATOR CURRIER:  That's right.

1                   VICTOR DAVILA: I'm sure you know  
2 better than me there's about 15,000 cars a day that  
3 goes through the X. It gets difficult. And we're  
4 going to have all these projects. We're going to have  
5 Bright Nights. We're going to have other potential  
6 projects. I'd just ask of you to please ensure that  
7 the impacts are as minimal as possible.

8                   Thank you.

9                   MODERATOR CURRIER: Thank you. Those  
10 were great comments. Those are the kinds of things  
11 that only the people who live in the neighborhood can  
12 reveal to us that are very helpful.

13                  STENOGRAPHER: Sir, sir, just hang on a  
14 second. Let me remind the panel, please, if you speak  
15 while they're speaking just by going, "Yes, yeah, uh-  
16 huh," I have to jot all that down. So try not to do  
17 that. Let them say their comments.

18                  Go ahead sir, please.

19                  BRIAN TORPEY: Okay. My name is Brian  
20 Torpey, T-o-r-p-e-y. I have the privilege and honor  
21 of owning a building that abuts Dickinson, Sumner, and  
22 Belmont. It's where the law offices are, En Motion  
23 Dance Studios, Liberty Tax, and the barbershop.

24                  I've owned the building for 30 years.

1 I've been through a lot of the trials and tribulations  
2 of the X. I rehabbed that entire building. I have  
3 five small businesses located in that building. I'm  
4 here representing them.

5                   Years ago, there was a parking lot that  
6 Mary Hurley -- the city bought -- and Mary Hurley  
7 drove a nice Caddy convertible out and drove away and  
8 pretty much that was it. The parking lot was never  
9 maintained. And, eventually, I guess it became under  
10 the premise of the parking authority in the City. I'm  
11 not sure. I don't live in Springfield any longer.  
12 But the parking lot was sold without anyone knowing  
13 really. And it was never maintained. I'm sure it's  
14 the parking authority that runs the stuff underneath  
15 91 is the same entity. I'm not sure who it is now.

16                   So, our City parking disappeared. The  
17 building was -- the parking lot was sold to SCS  
18 Realty, who then sold it to the Vietnamese market,  
19 which relocated from Belmont into the old Orange Café  
20 building. The gentleman that owns that now is not  
21 interested in any way, shape, or form of having or  
22 sharing his parking lot, my land, and he will not  
23 really kind of work with the neighborhood.

24                   This project, for me, really can't go

1 forward without getting some parking. You know,  
2 you're going to put a bus stop with a planting,  
3 pedestrian gathering area. It's a garbage gathering  
4 area. I clean that place every couple of days and  
5 it's just garbage. It's just a windy intersection. I  
6 have not seen a City street sweeper in years. I've  
7 called and asked when they were going to be scheduled.  
8 I called in May. It was going to be June 27<sup>th</sup>. And I  
9 said, "Well, when was the last one?" She goes, "Oh,  
10 it was last year."

11 We don't -- like I mentioned earlier,  
12 this neighborhood wasn't hit by a tornado and, you  
13 know, all kind of federal dollars came and, you know,  
14 things really kind of changed up because half of it  
15 was gone. This neighborhood isn't being supported by  
16 a casino. We don't have BID. It's just the business  
17 people that are there. I have En Motion Dance  
18 Studios. Eric is here tonight. He has over 100  
19 children in that building coming and going every day.  
20 He's doing a great job. He's interested in buying the  
21 building and staying eventually. But, without  
22 parking, and safe parking, it's kind of crazy.

23 I know Jon -- I think your name is Jon,  
24 right?

1 JONATHAN ALLARD: Yes.

2 BRIAN TORPEY: You know, talked about  
3 trees and putting things up like that. The trees that  
4 the City did install in front of my building have  
5 berries coming out of them. So when you park your  
6 car, I mean you can't park your car because it's  
7 covered with these berries. It was just insane.

8 I've maintained those trees. The City  
9 has never come and pruned them. I've had to cut them  
10 and chainsaw them. Now they're so damn big they're  
11 dropping stuff on the roof of the building and causing  
12 damage.

13 So, in addition to the maintenance of  
14 these gathering places, you know, who is going to do  
15 this? Who is going to shovel these things? Who is  
16 going to maintain the trash pickup? You know, the  
17 Christmas tree, yeah, I'll be the Grinch. I need  
18 parking over there. We don't need a gathering spot,  
19 honestly.

20 I think that the bus stop can be  
21 relocated west further down in a less congested area,  
22 honestly, than right at the X. You have one up near,  
23 you know, Benson Bagels or that's where that's going  
24 to be. But, maybe down a little further, more towards

1 Trinity, if there's open space down near Taco Bell or  
2 something of that nature, that would be a better  
3 location for it in order to give us some kind of  
4 reconfigured parking. I don't know how you do it in  
5 that little bit of a triangle. You guys are the  
6 engineers. That's one of my main concerns.

7                   The Dickinson plan, on the Dickinson  
8 side of my building, which is Pho Saigon and Vinh  
9 Chau, that's bad math. There's no bike trail there.  
10 There's not five feet for anything. I mean during the  
11 big snowstorms we had, you couldn't even get one lane,  
12 you know, one lane of cars down there. Once again, we  
13 suffered with the snow. We didn't have the loaders  
14 come up and take away all the snow on that road. It  
15 became virtually impassible during some of the crazy  
16 winters that we've all had.

17                   The City needs to purchase the parking  
18 lot that they owned previously, which is -- it's on  
19 Dickinson and it adjoins the other gentleman's lot.  
20 He's not maintaining it. He's really doing a good job  
21 of maintaining his. I get it. He wants to have spots  
22 for his customers. But all the other businesses that  
23 rely on it, there's a whole bunch of them on Dickinson  
24 Street that have all changed hands. There used to be

1 an insurance thing. Everybody knows the neighborhood.  
2 That whole strip has no parking. And it's a concern.  
3 It's a concern. So, I really would like to see some  
4 parking.

5                   Yeah, also, you know, the signaling  
6 of Burlington dumping out onto Dickinson, that's a  
7 rocket ship over there with people just trying to  
8 shoot across. That's not being addressed here really.  
9 It needs to have a light or something because people  
10 get into that rotary and they're going to book down  
11 Grenada, you know, and they're going to try and cut  
12 through. That's a problem. It's still a problem.  
13 You can't -- these little side streets can't support  
14 all this. You know, we're just going to rotary off  
15 into the abyss here.

16                   I get it that, you know, sometimes you  
17 have to give up a little peace to make some progress.  
18 But sometimes you've got to give up a little progress  
19 to make some peace. I don't really see this being  
20 progressive or peaceful. It's not going to work for  
21 me.

22                   If you're going to do it, you've got to  
23 have people, you know, one, be informed. I would  
24 suggest that this is as important as the aqueduct

1 project on 91 where there's an actual aqueduct, or the  
2 Sumner Ave. project link that's very easy to find on  
3 the City website. You know, everybody is, "Well,  
4 you've got to go to MassDOT." Everybody is  
5 deflecting. You know, it needs to be in one spot so  
6 everybody can be informed.

7 I got a phone call from the office.  
8 That's why I'm here. And I'm happy to be here, and,  
9 you know, as a member of the business community,  
10 owning the building for 30 years, trying to maintain  
11 it, trying to maintain parking for, you know, five  
12 small businesses. These people aren't, you know,  
13 they're not making a killing. They're making a  
14 living. And we need to support them.

15 Thank you.

16 MODERATOR CURRIER: Great comments.  
17 Thank you.

18 STENOGRAPHER: Excuse me, Mr. Torpey.  
19 Before you go, because I'm anticipating that you're  
20 going to leave before I can get to you later.

21 BRIAN TORPEY: Yeah.

22 STENOGRAPHER: You mentioned a lot of  
23 businesses; most of them I got. But you said Pho  
24 Saigon and --

1                   BRIAN TORPEY: Well, I mentioned Pho --  
2 I don't own that building, Pho Saigon. Right.  
3                   STENOGRAPHER: No, no, I just want to  
4 know how to spell it.  
5                   BRIAN TORPEY: P-h-o Saigon.  
6                   STENOGRAPHER: And the other one, Vinh  
7 Chau?  
8                   BRIAN TORPEY: Vinh Chau is across the  
9 street.  
10                  STENOGRAPHER: Vinh Chau?  
11                  BRIAN TORPEY: V-i-n (sic) C-h-a-u.  
12 You haven't eaten there?  
13                  STENOGRAPHER: I'm not from around  
14 here.  
15                  BRIAN TORPEY: Come on! It's the best  
16 Vietnamese food in town.  
17                  MODERATOR CURRIER: Thanks a lot.  
18 Yes, sir?  
19                  PAUL HETZEL: My name is Paul Hetzel,  
20 H-e-t-z-e-l. So, as I understand it, the whole reason  
21 to do this is to increase flow, make the flow easier,  
22 correct?  
23                  MODERATOR CURRIER: Right. Make it  
24 safer.

1                   PAUL HETZEL: Right.

2                   MODERATOR CURRIER: Process traffic  
3 better.

4                   PAUL HETZEL: If you go a little  
5 further, you're creating a Robert Moses effect. I'm  
6 sure anyone who knows anything about roads knows about  
7 Robert Moses. So, if you live in the neighborhood, as  
8 soon as you get beyond the X going west, you run into  
9 a huge traffic block with Sumner Avenue with the  
10 lights. And every day the traffic is backed up beyond  
11 Forest Park Avenue. Okay? How kids have not been  
12 killed at Forest Park and some of the other schools,  
13 because you know it's almost illegal to let your kid  
14 walk to school now. So everyone is driving. They run  
15 across the street. The amount of cut-through traffic,  
16 which you say you're trying to decrease, if you live  
17 in the area, you get to the light at Forest Park and  
18 there's the Indiana raceway turning left onto Forest  
19 Park, racing through the neighborhood.

20                   In addition, Joel talked about the  
21 Garfield. Ninety percent of the people do not even  
22 know or pay attention to a stop sign there. We have  
23 been told by a prior head of the DPW that putting  
24 speed bumps is illegal. You can't do it. There's a

1 law. Gee, there's an awful lot of cities and towns in  
2 Western Mass. that are breaking the law every day.

3                   So, I know further down Sumner is not  
4 part of your responsibility, but you're creating a  
5 Robert Moses effect. That traffic is just going to  
6 continue to flow. They're going to have more cut-  
7 throughs. I've walked it every day. There are people  
8 cutting through that side, the south side of Sumner  
9 through the Forest Park area. And, you know, you just  
10 get into it. So, something -- the City has to address  
11 what's going to happen beyond the X because you're  
12 creating a nightmare.

13                   MODERATOR CURRIER: Thank you, sir.

14                   JIM SCHEFFLER: Hi. My name is Jim  
15 Scheffler. Scheffler is spelled S-c-h-e-f-f-l-e-r.

16                   My comment concerns the stretch of  
17 Belmont northbound out of the X intersection. The  
18 plans show that vehicles will be going northbound.  
19 Then, on the left side, there will be a bike lane  
20 going southbound. And, as a cyclist with many  
21 thousands of miles' experience biking in Springfield,  
22 that does not make sense. Cyclists coming out of the  
23 rotary will have a very hard time, and it may be  
24 hazardous to try to turn onto the bike lane as cars

1 are trying to get into the rotary. So, at the same  
2 time, you have sharrows on the right side. What I  
3 would suggest is prohibiting that southbound bike  
4 movement and moving that bike lane more toward the  
5 right side and make it northbound.

6                   STEPHEN SAVARIA: We considered that.  
7 So, right now, like you said, we have a contra-flow  
8 lane. Originally, we had it proposed actually going  
9 in the opposite direction with traffic. There was  
10 concerns over not having accessible or bike access  
11 going into the X. We're trying to get people kind of  
12 to the X instead of really away from it in terms of  
13 pedestrians and cyclists. So, we kind of had to make  
14 a choice. And I think it's still something that we're  
15 trying to resolve by possibly adding in a side path  
16 that will allow people to go to the X and then keep  
17 the shared bicycle lane away from the X so to be able  
18 to provide multidirectional travel on that segment of  
19 Belmont. So, that's something we're certainly -- it's  
20 still on the table at 75 percent design. We're  
21 looking into that.

22                   JIM SCHEFFLER: Yeah, my feeling as a  
23 cyclist is that everything works best when cyclists  
24 and vehicles follow the same rules. And I think that,

1 you know, it might improve it slightly if you made it  
2 easier to go from the rotary to the bike lane because  
3 right now there's no turning radius.

4                   STEPHEN SAVARIA: There's no turn,  
5 right.

6                   JIM SCHEFFLER: A cyclist would almost  
7 have to stop and do a slow-motion turn as cars as  
8 trying to go out. That doesn't seem safe.

9                   STEPHEN SAVARIA: Yeah, we had it -- I  
10 think the original plan was almost like a little break  
11 in how the island comes out into the roundabout to  
12 allow that, because of that sharp radius, it would  
13 allow the bike to easily enter the flow of traffic.  
14 But we are certainly looking at that.

15                   JIM SCHEFFLER: Thank you.

16                   MODERATOR CURRIER: Thank you.

17                   Let me guess, bicycle comment.

18                   ALEX WECK: It's a costume.

19                   (Laughter.)

20                   ALEX WECK: My name is Alex Weck, W-e-  
21 c-k. I live on Somerset Street here in Forest Park,  
22 president of the Pioneer Valley Chapter of the  
23 Massachusetts Bicycle Coalition and I'm a member of  
24 WalkBike Springfield.

1                   I'm wondering -- thanks, first of all,  
2   guys for this amazing body of work. I think this is  
3   going to transform what is a really tough intersection  
4   for walkers and cyclists and drivers. It's wild out  
5   there right now.

6                   I'm wondering if any consideration that  
7   might aid the questions about tree removal has been  
8   made towards the possibility of a separated path on  
9   the south side of Sumner. You know, it's essentially  
10   a beefed up sidewalk that could be both rideable and  
11   walkable, but it's separated beyond the tree belt from  
12   the traffic patterns. The trends in bike design are  
13   showing that unseparated bike lanes are going to be  
14   going the way of the dinosaur by the time this gets  
15   built, and people prefer separated paths and they're  
16   way safer. Has any consideration been done towards in  
17   that direction?

18                  STEPHEN SAVARIA: There has been some  
19   consideration. One of the issues you have to deal  
20   with is that we have to -- we have to then consider  
21   what happens at the project limits. So, you know,  
22   what happens when your separated bike lane ends and  
23   you're now back out and sharing the road?

24                  ALEX WECK: I think it's unlikely that

1 many riders are going to use Sumner Avenue. I think  
2 Jim who just spoke recently is the brave guy in town  
3 who does use it correctly. I'm pretty brave. I don't  
4 do it. It's, you know, even with a lane with traffic  
5 and the history of Sumner, I think it's -- unless we  
6 install some sort of bollard system or really bring  
7 lanes down to ten feet, which I know the Mayor doesn't  
8 like, we're going to have a tough time convincing  
9 people to ride on Sumner Avenue.

10 CHRIS CIGNOLI: If I may, when we did  
11 the preliminary studies that were done on the project,  
12 one of the concepts had a separated bike lane. And  
13 the major criticism of that on the south side of the  
14 roadway, basically the entire project limit, which I  
15 looked at, when complete, it can be extended down to  
16 Longhill Street, you were basically going to have to  
17 get rid of any vegetation that was going to be on that  
18 side of the street, which that was one of the major  
19 comments that everybody was against.

20 The other issue is in that area there  
21 are a significant amount of utility manholes,  
22 handholds, things like that that would have had to  
23 have been relocated. But the idea of kind of taking  
24 that whole side of the street and getting rid of all

1 the vegetation and --

2 ALEX WECK: My idea would be to rather  
3 than take away any vegetation would be to just widen  
4 the sidewalk from -- within the existing footprint, or  
5 blacktop it over. It's not feasible to do anything  
6 like that?

7 CHRIS CIGNOLI: It didn't get us the  
8 room that we wanted to have a true -- through there,  
9 if we wanted to have something like that, we really  
10 wanted to encourage the bikes to do something  
11 separate, then the pedestrians and, you know, get in  
12 the way. It just, it ended up that there just wasn't  
13 enough room especially when you got on the east side  
14 of Dickinson. The utilities that are there, there's  
15 two or three --

16 ALEX WECK: But the main advantage  
17 would be to bring -- essentially allow people, even if  
18 they wanted to ride their bikes or drive their bikes  
19 to Forest Park, they could potentially ride them into  
20 the business district and spend a buck while they're  
21 here. Dickinson, I'm less concerned. But that would  
22 be a major, major gain for the neighborhood in the  
23 views of many bike riders.

24 CHRIS CIGNOLI: Yeah. As I said, it

1 was one of the concepts that was looked at. And it  
2 was -- I don't want to say agreed upon by everybody --  
3 but the idea was people were like, "We don't want to  
4 lose that southern side with all the trees."

5 ALEX WECK: So, there's no way of  
6 keeping the trees and keeping --

7 CHRIS CIGNOLI: Really, geometrically,  
8 no.

9 ALEX WECK: Thank you. In the absence  
10 of that, I would highly recommend bollards to separate  
11 the bike lane. Now, we're seeing a lot more of that  
12 in New York City and other cities because traffic is  
13 just going to be too fast on that.

14 And I'll submit my other questions in  
15 writing because we've got a long line.

16 Thanks, guys.

17 MODERATOR CURRIER: Thank you very  
18 much.

19 Yes, ma'am. Hi.

20 DEBORAH WEITKUNAT: Hi. My name is  
21 Deborah Weitkunat.

22 STENOGRAPHER: Can you get a little  
23 closer?

24 DEBORAH WEITKUNAT: My name is Deborah

1 Weitkunat, W-e-i-t-k-u-n-a-t.  
2 STENOGRAPHER: Hold on a second.  
3 Again, please.  
4 DEBORAH WEITKUNAT: W-e-i-t-k-u-n-a-t.  
5 STENOGRAPHER: Okay. Thank you.  
6 DEBORAH WEITKUNAT: I just want to say  
7 what isn't broke shouldn't be fixed. And I'm looking  
8 at you talking about all the trees, like that man  
9 said, about decorating and doing whatever, putting a  
10 park bench in. It isn't worth it at the X. It just  
11 is not worth it. You want a car to come up and hit  
12 you, fine, sitting on a bench. But trees, our City  
13 can't even take care of the forestry around here where  
14 my stop sign at the end of my street has a bunch of  
15 leaves hanging down and you can't even see the stop  
16 sign. So, to me, it's useless. We don't even have a  
17 forestry that can come out and cut the trees, trim the  
18 trees, and take care of the trees. So, to me, trees  
19 are out of the question unless you go out and trim it  
20 yourself.  
21 And the rotary that is on Dickinson  
22 going out is useless to me because you can -- you're  
23 only going one way out. And when you're coming in,  
24 you would only turn onto Commonwealth anyway.

1                   And with the plowing in this City, they  
2 don't even plow close to the curbs, okay, to get rid  
3 of the snow. They don't even plow Sumner Avenue. I  
4 can go to work for 7:00 in the morning and it's not  
5 even plowed. And it's so full of slush and  
6 everything, they leave the stuff in the middle of the  
7 road.

8                   And the rotary that my neighbor talked  
9 about, you said that taking a left from Sumner Avenue  
10 going east, okay, you're going to put a turning lane  
11 there. Nobody is going to turn there to go down  
12 Belmont to go to that rotary. They're all going to  
13 turn, like my neighbors have been saying, on the side  
14 streets to get away from the X, just like they are  
15 now. They're not going to make a left there. The  
16 only people that go down Belmont are the ones coming  
17 west on Sumner or the people coming out of Lexington,  
18 or not Lexington, but Lenox. They're going straight  
19 across to go down Belmont. Nobody on Sumner Avenue  
20 going east is going to turn left to go down Belmont.

21                 STEPHEN SAVARIA: Just to be clear,  
22 that's a major access. We generally agree with you.  
23 We don't expect to have a lot of traffic on those  
24 streets. It's mostly just for access to the existing

1 businesses that are --

2 DEBORAH WEITKUNAT: Well, that's a  
3 stupid -- that's a stupid thing to put there then,  
4 very stupid.

5 MODERATOR CURRIER: Well, you need to  
6 provide a way to get to every --

7 DEBORAH WEITKUNAT: Well, if you want,  
8 you should have the traffic coming out instead of  
9 going in. You should have the traffic coming like  
10 going -- what is this, south, south to east, instead  
11 of going -- turning left to go northwest.

12 STEPHEN SAVARIA: That's basically what  
13 it does now --

14 DEBORAH WEITKUNAT: But, you're sending  
15 all that traffic onto Burlington Street. Have you  
16 seen how big Burlington Street is? That street cannot  
17 handle it.

18 And also, like that man said, you don't  
19 know what that intersection is like at Holy Name  
20 Church. A lot of accidents happen there, probably  
21 more than at the X.

22 MODERATOR CURRIER: Okay. All right.

23 DEBORAH WEITKUNAT: I mean it's  
24 ridiculous the way you have things set up there.

1                   And then where are you going to put the  
2 islands, your little islands on Sumner Avenue so that  
3 you can't turn into your street that you live on off  
4 of Sumner? Because out by where Gus and Paul's is,  
5 and I'm sure some of you people know, okay, if I lived  
6 on the street next to People's Bank, I would have been  
7 pissed and going to every meeting to bitch at you guys  
8 because that guy can't turn down his street anymore to  
9 go down the street. There's an island in the way.  
10 And the traffic during rush hour, you guys don't even  
11 have those lights in sync. You talked about having  
12 the lights in sync on Sumner Avenue. Baloney.  
13 They're not in sync out there. Did you ever see  
14 everything backed up when they're coming off Allen  
15 Street onto Sumner Avenue? It's so backed up, you  
16 have to sit through three lights.

17                   MODERATOR CURRIER: So, I think they  
18 proposed to fix that.

19                   DEBORAH WEITKUNAT: Oh, they did?

20                   MODERATOR CURRIER: No, no, they  
21 propose to fix it with the project.

22                   DEBORAH WEITKUNAT: Well, then they  
23 ought to fix the one out there, too, then because it's  
24 ridiculous.

1                   MODERATOR CURRIER: These are great  
2 comments.

3                   DEBORAH WEITKUNAT: And I live on  
4 Ventura Street. Ventura Street meets Grenada Terrace  
5 on one of the islands which crosses. The people run  
6 down my street to go onto Grenada to get over onto  
7 Dickinson all the time, only during rush hour though  
8 most of the time. But that's what's going to happen  
9 to everybody in these neighborhoods. I don't care  
10 whether you live on Garfield and you're trying to put  
11 speed bumps to stop people. People want to get home.  
12 And they're going to avoid the X if it's being worked  
13 on in any way they can avoid it.

14                   But that is ridiculous. What isn't  
15 broken, don't fix.

16                   MODERATOR CURRIER: Yes, ma'am.

17                   PAT TRIGGS: Hello.

18                   MODERATOR CURRIER: Hi.

19                   PAT TRIGGS: My name is Pat Triggs, T-  
20 r-i-g-g-s.

21                   MODERATOR CURRIER: Thank you.

22                   PAT TRIGGS: I live at 21 Greenleaf  
23 Street, and I'm the president of Concerned Citizens  
24 for Springfield, which is an all-volunteer

1 organization which has rehabbed probably somewhere  
2 between 30 and 40 properties in the past 25 years.

3 So, my main question is exactly where  
4 does the tree belt shortening start and end?

5 MODERATOR CURRIER: The tree belt  
6 shortening?

7 PAT TRIGGS: Well, the width.

8 MODERATOR CURRIER: The width. Okay.  
9 So, currently, there are 13-and-a-half-foot lanes for  
10 them.

11 JONATHAN ALLARD: Yes.

12 MODERATOR CURRIER: Are the curbs  
13 moving in?

14 JONATHAN ALLARD: So, basically, the  
15 project will taper at the limits and the end. So,  
16 pretty much after you cross Main Greeting Road to  
17 Forest Park, that will be where we would reach the  
18 full extent of the proposed cross-section. And then  
19 that will continue all the way through the X. And  
20 then just past Ormond Street is where they begin to  
21 taper down to meet the existing Sumner Avenue cross-  
22 section as it is today.

23 MODERATOR CURRIER: So, it's widening?  
24 The proposed project will widen or narrow?

1                   STEPHEN SAVARIA: Yes.

2                   JONATHAN ALLARD: The tree belts are  
3 approximately 14 to 16 feet now. They're going to be  
4 11 to 13 feet, plus or minus, within that range,  
5 within the full cross-section of Sumner Avenue.

6                   MODERATOR CURRIER: Will the new tree  
7 belt follow where the old one is?

8                   JONATHAN ALLARD: Yeah, the location of  
9 the tree belt is not going to change.

10                  MODERATOR CURRIER: No.

11                  JONATHAN ALLARD: It's just going to be  
12 --

13                  PAT TRIGGS: I want to know which  
14 streets.

15                  MODERATOR CURRIER: So, with that ten  
16 feet that you --

17                  STENOGRAPHER: One at a time.

18                  MODERATOR CURRIER: When you reduce the  
19 lanes from 13-and-a-half to 11, you're gaining two-  
20 and-a-half feet per lane. You're basically reducing  
21 the width by ten feet. What are you doing with that  
22 added width or that reduced width? Are you putting it  
23 in the median?

24                  STEPHEN SAVARIA: We're putting in two

1 five-foot bike lanes.

2 MODERATOR CURRIER: Okay. That's the  
3 ten feet right there.

4 STEPHEN SAVARIA: And we're also  
5 putting left turn lanes or median islands in the  
6 middle.

7 MODERATOR CURRIER: Is that a ten-  
8 footer or --

9 STEPHEN SAVARIA: Yes.

10 MODERATOR CURRIER: Okay. So, that's  
11 where the widening --

12 STEPHEN SAVARIA: So that widening  
13 really, through the X itself, Sumner Avenue is not  
14 really going to be any wider than it is now except for  
15 some turning lanes. But, basically, from Cumberland  
16 Farms to Main Greeting Road at Forest Park is where  
17 that widening -- where the reduction in the tree belt  
18 width will take place.

19 PAT TRIGGS: I'm here to protest that  
20 because we have been fighting for 40 years to maintain  
21 it. Everyone sees it as free land. "Oh, we can do  
22 this. We can do that. We can make it quicker for  
23 people to get through. We can do this. We can do  
24 that." And I'm telling you, we are fighting to keep

1    what little we have left. At this point, part of our  
2    neighborhood at the X looks like a dilapidated,  
3    unkempt, unattractive area. And we appreciate what  
4    you're doing or trying to do to make it look better  
5    because, at one time, it was a thriving commercial  
6    district. It's not your fault. It's not our fault.  
7    It's just how things happen. So, we're trying to make  
8    the best of what we have.

9                   The tree belts in front of the people's  
10   houses that you are talking about help to buffer them  
11   from Sumner Avenue.

12                   Forty years ago, I was ridiculed, made  
13   fun of, and insulted by professional engineers, by  
14   elected officials, who were pointing and jabbing their  
15   finger at me saying, "No one will live on Sumner  
16   Avenue." And I happy to tell you that Sumner Avenue  
17   today is more residential than it was in 1963. People  
18   are living there. But in order for us to keep people  
19   living here, we have to pay attention to the things  
20   that allow them to not feel that they're living in the  
21   middle of the speedway. It's very difficult.

22                   And I'm sure your job is difficult.  
23   Our job living here is difficult. We're not out in  
24   the suburbs. And those of us who have elected to stay

1 as residents in the middle of the city are clinging to  
2 the little bits of decency in our areas that we can  
3 get.

4                               So, I'm asking you -- I'm a bicycle  
5 rider. So, the two gentlemen that preceded me, I'm on  
6 my bicycle. I had to put my bicycle away to come to  
7 this meeting because I knew it would be dark going  
8 home. I'm in favor of it. But I don't think that  
9 taking the tree belts is really going to help us in  
10 that fashion. I really don't. And I ask you to  
11 reconsider. And I hope you're taking to heart the  
12 people that are here talking to you.

13                           MODERATOR CURRIER: Absolutely. Just  
14 to clarify, Nick, you're reducing the width of the  
15 tree belt by three to four feet, is that accurate?

16                           NICHOLAS LAPOINTE: Yes.

17                           STEPHEN SAVARIA: Yes.

18                           MODERATOR CURRIER: And the number of  
19 trees will increase when the project is complete than  
20 what's there today, correct?

21                           JONATHAN ALLARD: The tree  
22 replications are one-for-one. I think they might be  
23 two-to-one in some cases.

24                           MODERATOR CURRIER: MassDOT often does

1 a two-to-one replication.

2 PAT TRIGGS: But they replace them with  
3 little twigs. Believe me, I've lived through this.  
4 They replace them with little twigs with one-inch  
5 diameter.

6 MODERATOR CURRIER: No, we can go  
7 bigger caliber.

8 PAT TRIGGS: Please, believe me. I've  
9 lived through this before with these promises of  
10 replication. We're talking trees that are --

11 MODERATOR CURRIER: We can't put in the  
12 type of --

13 PAT TRIGGS: -- of a substantial size  
14 and you don't replace them with that. And I won't  
15 live to see it. I just hope my grandchildren will.

16 MODERATOR CURRIER: Thank you.  
17 Appreciate your comment.

18 (Applause.)

19 BEATE BOLEN: I'm Beate Bolen, B-o-l-e-  
20 n. I live on Maplewood Terrace.

21 STENOGRAPHER: I'm sorry. What's your  
22 first name?

23 BEATE BOLEN: Beate, B-e-a-t-e.

24 STENOGRAPHER: Thank you.

1                   BEATE BOLEN: I just want to emphasize  
2   that I agree 100 percent with Pat's comments about the  
3   trees. Right now, we're trying desperately to add  
4   trees all over town because we have a sewer system  
5   that can't handle the runoff. Every time we take down  
6   a tree, it adds to -- it just adds to the burden on  
7   our sewer system, which we're not going to replace our  
8   100-year-old sewer system. So what possible  
9   justification can there be for taking down major trees  
10   on Sumner Avenue? We should be getting more of them,  
11   not taking them out. And I know we just planted a  
12   bunch of trees on our Terrace, but they are twigs, and  
13   it's going to be years before they begin to even  
14   approach absorbing the kind of runoff and cleaning the  
15   air the way that these large trees do.

16                   So, A, has there been an environmental  
17   impact study done, because I haven't seen it? And,  
18   does it address these issues?

19                   And about this, you know, on the same  
20   topic, my other big concern is this path through  
21   Forest Park and putting lighting in there. Putting  
22   lighting in there, you know, at night, all night,  
23   impacts the animal flow, impacts the health of the  
24   trees and the growth patterns of all the vegetation,

1 and not to mention the safety issue. I mean there is  
2 an issue now when they can close the park at night.  
3 Having that open all the time, how are they going to  
4 address the safety issue? It's a big concern.

5                   So, you know, now I do want to say I  
6 commend you for doing this. It has to be done.  
7 Something has to be done about the X. You can't walk  
8 safely in that. I hold my breath every time I have to  
9 cross the street there. So, I recognize this is a  
10 very difficult puzzle. And I recognize that you have  
11 made a really credible effort and there's always going  
12 to be issues. But don't take away the positive things  
13 we have to fix the problem that, you know, will  
14 negatively impact the entire neighborhood in the  
15 process.

16                   MODERATOR CURRIER: That's why we --  
17 these are all terrific comments, and that's part of  
18 the process is hearing them, digesting them, and  
19 moving forward, altering the design to incorporate the  
20 suggestions and eliminate the negatives if possible.  
21 And I want to clarify that the permitting process will  
22 begin after the 75 percent submission. That's when  
23 the design is really -- the details are defined and,  
24 you know, the drainage calculations and all that is

1 now available at 75 percent for the permits to be --  
2 the applications to be developed, and filed, and  
3 presented to the agencies that, you know, protect our  
4 resources. So, that's when that will happen.

5 I'm going to put the guys on the spot  
6 and ask when you anticipate, roughly within a few  
7 months, when you think we'll see the 75s?

8 STEPHEN SAVARIA: A year from now.

9 MODERATOR CURRIER: Okay. So, that's  
10 when we'll start the permitting for real. And those  
11 kind of comments that you made about the lighting and  
12 so on will come into play then.

13 You know what I keep hearing is that  
14 there's a lot of concerns about these beautiful trees.  
15 It would be nice to identify exactly which ones are  
16 going and which ones are staying. If maybe the City  
17 would get Fuss & O'Neill to develop a plan they could  
18 put on the website that would help.

19 STEPHEN SAVARIA: We have done that.  
20 And we have discussed it with the City forester. And  
21 so the Forestry Department is aware of which trees are  
22 going and which trees are staying.

23 MODERATOR CURRIER: I think these  
24 people want to go as well.

1 BEATE BOLEN: It would be very helpful  
2 to share that information with us.

3 MODERATOR CURRIER: Perhaps the City  
4 could put it on the website, Chris.

5 JONATHAN ALLARD: We have a full  
6 landscape plan that is a preliminary, but it does show  
7 all proposed trees, sizes, species --

8 MODERATOR CURRIER: And which big ones  
9 are going, you know, these beautiful old trees?

10 JONATHAN ALLARD: -- which trees will  
11 remain.

12 JEREMY COLE: Hi. Jeremy Cole. I'm a  
13 resident of Forest Park.

14 STENOGRAPHER: Would you spell your  
15 last name?

16 JEREMY COLE: C-o-l-e is the last name,  
17 Jeremy, J-e-r-e-m-y is the first name.

18 STENOGRAPHER: All right. And Cole, C  
19 --

20 JEREMY COLE: C-o-l-e, yeah.

21 STENOGRAPHER: Thank you.

22 JEREMY COLE: I want to focus on  
23 Cliftwood Street. I want to understand how this plan  
24 is going to take the pressure off Cliftwood. I know

1   you're putting a light at Cliftwood and Sumner, which  
2   really doesn't make a lot of sense to me because right  
3   now when you come down Sumner, the traffic is eased  
4   through the X because they're taking the cutoff down  
5   Cliftwood, which is something I do all the time.

6                   And then the other issue is when you're  
7   at the intersection of Cliftwood and Dickinson, that  
8   is a terrible intersection. I go through there on a  
9   regular basis and there are many accidents happening a  
10   lot, as well as there are almost accidents happening a  
11   lot, as in the other day I witnessed a woman on her  
12   cell phone easing through the intersection. Children  
13   were trying to cross in front of her. And somebody  
14   wanted to take a left-hand turn. There are no lights  
15   there. There basically is no traffic control. It  
16   really does need to be.

17                   And, at the other end of it, I really  
18   don't understand that light there at all. I don't see  
19   what it's going to -- I think it's going to make  
20   things worse and not any better because it's going to  
21   stop the traffic there, which means people are not  
22   going to be really -- those folks who would normally  
23   ease up to the intersection at the X, and so the  
24   people from Cliftwood who want to take a right from

1 Sumner to Cliftwood can do that. They won't be able  
2 to do that in this new plan.

3 So, anyway, can you address that for  
4 me, please, both those issues, which are the -- both  
5 ends of Cliftwood?

6 STEPHEN SAVARIA: So, Cliftwood is  
7 going to be reversed. It will now be one way towards  
8 Sumner Avenue.

9 JEREMY COLE: It didn't look like that  
10 on the plan there. It looked like it had it coming  
11 both directions.

12 STEPHEN SAVARIA: No, it's going to be  
13 one-way towards Sumner. And, at the Sumner Avenue  
14 end, there will be a left and a right turn lane for  
15 both movements of Sumner controlled by the signal at  
16 that location. There will be no traffic going south  
17 on Cliftwood at that point.

18 JEREMY COLE: So then, at that point,  
19 when you get to the X, in order to get on that side of  
20 Dickinson, you're going to then have to take a right  
21 you're saying?

22 STEPHEN SAVARIA: At the X.

23 JEREMY COLE: At the X.

24 STEPHEN SAVARIA: You will take the

1 right on Dickinson and the improvements to the --

2 JEREMY COLE: Will there be a right  
3 turn lane there for them to do that?

4 STEPHEN SAVARIA: Yes, there will be a  
5 right turn lane. That is how we have addressed that  
6 kind of redistribution of the traffic on Cliftwood.

7 JEREMY COLE: Okay. All right. Thank  
8 you. Appreciate it.

9 MODERATOR CURRIER: Now you know who  
10 really runs these meetings -- Walter.

11 ROBERT KLUPA: The last name is K-l-u-  
12 p-a; the first name, Robert; 46 Randolph Street. A  
13 couple of questions about safety.

14 The crosswalks at the X have lights  
15 where you press the button and they stop. And,  
16 obviously, those are going to be upgraded to the ones  
17 that make the beeping noise, the better ones. Are the  
18 roundabouts going to have that kind of -- because  
19 there's three crosswalks at each roundabout. Is there  
20 going to be a button to stop traffic?

21 STEPHEN SAVARIA: No, there will not.

22 ROBERT KLUPA: Isn't that unsafe?

23 MODERATOR CURRIER: Actually, they're  
24 very safe for pedestrians.

1                   ROBERT KLUPA: Will it be safe for my  
2 blind wife who uses that area all the time?

3                   MODERATOR CURRIER: Blind people have  
4 difficulty with roundabouts.

5                   ROBERT KLUPA: Yes.

6                   MODERATOR CURRIER: I can't lie to you.  
7 But, sighted people find them very safe because  
8 traffic moves so slowly. It continually moves.  
9 That's the beauty of them. But they move so slowly  
10 that everybody can judge the gap.

11                  ROBERT KLUPA: I hope so on Friday  
12 night and Saturday nights after the bars close.  
13 That's a problem, yeah.

14                  MODERATOR CURRIER: That's an issue.  
15 And so the cars see the pedestrians waiting to cross  
16 and they pause because it's a yield condition entering  
17 the roundabouts, and the pedestrians can then cross.  
18 So, that's how it works in my town where I have two of  
19 them.

20                  ROBERT KLUPA: Yeah, there's not a real  
21 yield condition going north on or northwest on Belmont  
22 because you're approaching a roundabout that only has  
23 an exit.

24                  MODERATOR CURRIER: But to enter the

1 circle --

2                   STEPHEN SAVARIA: There's no traffic  
3 really coming through there.

4                   MODERATOR CURRIER: There's no traffic  
5 going fast. So, yeah, so you're correct, there's no  
6 yield there.

7                   STEPHEN SAVARIA: There's not going to  
8 be much circulating traffic.

9                   ROBERT KLUPA: All right. That's a  
10 major concern for me.

11                   Also, Burlington Street is such a small  
12 street. When you park on both sides like you do now  
13 and there's no snow, only one car can get through at a  
14 time. And now you're going to take the parking away  
15 from two- and three-family homes that don't -- some of  
16 them don't have driveways. What are they supposed to  
17 do with their cars?

18                   STEPHEN SAVARIA: I don't think we're  
19 proposing any changes to parking on Burlington.

20                   ROBERT KLUPA: You're going to let them  
21 park on both sides of the street? It's going to stay  
22 the same width and that's going to be a major through  
23 street?

24                   STEPHEN SAVARIA: It's not intended to

1 be a major through street.

2 ROBERT KLUPA: Well, it is. But it is  
3 if you're coming south on Belmont because you can't go  
4 to the X; you have to go that way, don't you? If it's  
5 one-way, it's one-way the other way, you have to go to  
6 Burlington Street.

7 STEPHEN SAVARIA: Correct, unless you  
8 divert over to Oakland and come out that way.

9 CHRIS CIGNOLI: What we're proposing at  
10 that location is if you're coming down Belmont and you  
11 want to go through the X, the direction will be to go  
12 down to Oakland to Sumner Avenue, a left onto Sumner  
13 Avenue versus going through Burlington, which would  
14 then encourage more traffic onto Grenada and to all  
15 those side streets.

16 ROBERT KLUPA: And my last thing to  
17 state is to talk about is Trenton Street. It's the  
18 poor little street that if you go Cliftwood to  
19 Dickinson and you go across, it goes over it. You  
20 guys haven't got any markings on that street that  
21 you're doing anything to it. And you're going to be  
22 shoveling a lot of traffic to it I think because it  
23 will be used as a shortcut to not have to go through  
24 the X and not have to go through that roundabout.

1                   CHRIS CIGNOLI: I'm just trying to  
2 remember. You're talking about where you come out of  
3 Cliftwood?  
4                   ROBERT KLUPA: If you come out of  
5 Cliftwood and you hit Dickinson.  
6                   CHRIS CIGNOLI: It's a quick right,  
7 left. That's correct.  
8                   ROBERT KLUPA: It's like a little Z.  
9                   CHRIS CIGNOLI: Right.  
10                  ROBERT KLUPA: That little street there  
11 --  
12                  CHRIS CIGNOLI: Yes.  
13                  ROBERT KLUPA: -- will bring you out  
14 towards --  
15                  CHRIS CIGNOLI: It brings you out to  
16 Commonwealth.  
17                  ROBERT KLUPA: After the roundabout.  
18                  CHRIS CIGNOLI: Right.  
19                  ROBERT KLUPA: You make a nice cut-  
20 through. You don't have to go through the roundabout  
21 or the X to make that cut-through. And you didn't  
22 devote any nice colors to that street to making it  
23 wider, or cleaner, or anything else.  
24                  CHRIS CIGNOLI: No. I'm sorry.

1 There's nothing proposed on that street right now.  
2 And the way that we're looking at it is that for  
3 somebody to cut down what would be, in the future,  
4 would be Lenox Street, not Cliftwood, to cut down  
5 Lenox, to cut across, have to stop at the intersection  
6 of Cliftwood and Dickinson, which I agree is difficult  
7 because --

8 ROBERT KLUPA: What about a traffic  
9 light?

10 CHRIS CIGNOLI: Right. But you're  
11 stopped at that intersection --

12 ROBERT KLUPA: And no roundabout.

13 CHRIS CIGNOLI: No, but the roundabout  
14 will flow. That's good. And now if you come into the  
15 X and then you take the right to go onto Belmont out  
16 towards the East Longmeadow area, you basically do  
17 have a free flow through there. As somebody who is  
18 going to be doing that a lot, that's the way I'm going  
19 to do it. I'm going to avoid the side streets.

20 ROBERT KLUPA: The thing is I look at  
21 that and it's very hard to find the bus stops. And  
22 I'm not quite sure that they actually know where they  
23 are.

24 CHRIS CIGNOLI: Yeah, we'll make sure

1   that they're pointed out because what I looked at is  
2   if you're on a bus, the E buses that run on Dickinson,  
3   and you want to get onto a G bus that runs on Belmont  
4   and Sumner, there doesn't seem to be any place where  
5   these bus stops actually meet, and the two bus stops  
6   are at the same place because those are very popular  
7   routes, the cross-town versus the through-town. And  
8   if you can't change there, where are you supposed to  
9   change.

10                   ROBERT KLUPA: I don't know if there's  
11   anybody here from PVRTA because I saw a car out there.  
12   So maybe --

13                   CHRIS CIGNOLI: No, there isn't anybody  
14   from PVRTA. We'll make sure that they show up better  
15   on the plans that we have so when you're looking at  
16   them you'll be able to see them.

17                   ROBERT KLUPA: Thank you much.

18                   CHRIS CIGNOLI: Thank you.

19                   MODERATOR CURRIER: Thank you very  
20   much.

21                   Yes, ma'am.

22                   NANCY MORIARTY: Hi. Nancy Moriarty,  
23   M-o-r-i-a-r-t-y. And I live on Fairfield Street.

24                   And I wanted to bring up my concern, as

1 well as my neighbor on Garfield, about our street  
2 being a cut-through street and how this might impact  
3 that because when Mountainview got cut off and become  
4 a one-way street, we saw increased traffic and that's  
5 been permanent. And any time it's busy around the X,  
6 trafficky times, you know, rush hour times, everybody  
7 comes through our street and they go really fast, so  
8 there's no way that slows them down even though we  
9 have a curve at the end that you would think might  
10 slow them down, and Garfield Street. Those two  
11 streets are really busy already, so construction and  
12 just otherwise, whether it's going to increase that.

13 I also wanted to say that I am glad  
14 you're thinking about making more beautiful pedestrian  
15 places. I know some folks maybe don't think we need  
16 them, but I do think we need to keep our trees, keep  
17 the beauty, and add to the beauty to maybe attract  
18 more pedestrians, more business, more bikers, but we  
19 also need to figure out how do we get parking then,  
20 also, because if people can't get to the X and there's  
21 no place to be, they don't come. So that was my other  
22 thing.

23 And then just, finally, about notifying  
24 people in the neighborhood about the meetings. I

1 think I heard you say that you put it in the  
2 *Republican* and *El Mundo*. But we have a huge  
3 neighborhood. And this is a good turnout, but maybe  
4 there's lots of people that weren't reached because  
5 they don't read the paper. A lot of people don't read  
6 the paper anymore. So, are there other ways that you  
7 could put it in local businesses if they would agree  
8 about meetings, you know, post those kinds of things  
9 so that -- making sure that we're reaching as many  
10 people in the neighborhood that we can.

11                   CHRIS CIGNOLI: What we did on this one  
12 is, number one, we reached out to all the media  
13 outlets. Some of them chose to do something with it,  
14 some of them didn't. We reached out to all of the  
15 City Councilors and we reached out to all of the  
16 neighborhood citizen groups in the City and notified  
17 them of it. And I know Forest Park and East Forest  
18 Park, I double-checked with them to make sure they let  
19 the people know about that as well, and through the  
20 Next Door.

21                   NANCY MORIARTY: Yeah.

22                   CHRIS CIGNOLI: Through Next Door, it  
23 should have been -- what we asked is that they all  
24 share it through the Next Door as well.

1 NANCY MORIARTY: Okay.

2 CHRIS CIGNOLI: So, any sort of social  
3 media that the neighborhood groups are using to get it  
4 out there as much as we can.

5 NANCY MORIARTY: All right. Well,  
6 that's great, but I just do know there are people,  
7 lots of people in my neighborhood, who don't use any  
8 of those either, or they might speak another language.  
9 So, I don't know if there's other ways to incorporate  
10 that.

11 CHRIS CIGNOLI: Yeah, we're always  
12 struggling to make sure we get notice out. However,  
13 this is a thousand percent more people than we usually  
14 get at our public hearings.

15 NANCY MORIARTY: Okay.

16 MODERATOR CURRIER: We're headed in the  
17 right direction.

18 CHRIS CIGNOLI: Yes.

19 NANCY MORIARTY: Thank you for  
20 listening and for your time.

21 CHRIS CIGNOLI: Thank you.

22 MODERATOR CURRIER: Yeah, thank you.

23 Does the City have a Facebook presence,  
24 a social media presence?

1                   CHRIS CIGNOLI: Yes, we do. We have a  
2 City Facebook page.

3                   MODERATOR CURRIER: Maybe you could put  
4 it on that.

5                   CHRIS CIGNOLI: And we also have --  
6 individual departments have Facebook pages.

7                   MODERATOR CURRIER: Wow!

8                   CHRIS CIGNOLI: The one thing that I'm  
9 not a big fan of Facebook is when you post something,  
10 if a lot of posts above it happen, all of a sudden  
11 what you're looking at disappears real quick.

12                  MODERATOR CURRIER: I see.

13                  CHRIS CIGNOLI: So, what we try to do  
14 is then repost it, and repost it, and repost it.

15                  MODERATOR CURRIER: Oh, yeah.

16                  CHRIS CIGNOLI: So that it stays  
17 current on people's pages. When we post something  
18 that may be weather-related or other project-related,  
19 all of a sudden something for this that we may have  
20 posted on Thursday gets pushed down a page that people  
21 don't see. So, we try to do it in multiple places.

22                  MODERATOR CURRIER: Great. Yes, sir.

23                  PETER DELUZE: Good evening. My name  
24 is Peter C. DeLuze, D-e-L-u-z-e. I live in the

1 neighborhood on Belmont Avenue. I have many comments.  
2 They're quick and simple.

3 First of all, I have been a firefighter  
4 up in Greenfield. I've been an EMT on an ambulance.  
5 And I want you people to know that Belmont Avenue is a  
6 primary route for fire engines coming out of the  
7 Forest Park Fire Station, covering all of Forest Park  
8 heading to the South End. There are no other near  
9 fire stations in the City of Springfield. The next  
10 nearest one is downtown at Worthington and --

11 AUDIENCE: Spring Street.

12 PETER DELUZE: Thank you. The fact of  
13 the matter is that where I live on Belmont Avenue, I'm  
14 going to tell you, okay, you should go there, stay  
15 there for four or five hours. Three or four times a  
16 night, and I'm not complaining about the fire  
17 department at all, they use Belmont Avenue to get to  
18 the South End.

19 MODERATOR CURRIER: Okay.

20 PETER DELUZE: They're not going to  
21 head down naturally down Sumner or take a right onto  
22 Oakland and go left unless they're told ahead of time.  
23 Of course, you're putting in a split at Belmont and  
24 Sumner Avenue. The fact of the matter is that Belmont

1 Avenue, from Sumner Avenue, there's a direct line to  
2 the South End as opposed to Dickinson, which goes off  
3 to Mill, and Rifle Street, and all like that.

4                   Now, I would not -- I am in favor of  
5 what the business owner said referencing his business  
6 at the beginning of Sumner Avenue and -- well, across  
7 from Cumberland gas station. Who is going to maintain  
8 that green space, that paved area? Who is going to  
9 maintain that? Every one of you here, I want you to  
10 go outside when you leave here and look at the  
11 pavement, the pavers, in front of this building.  
12 They're all broken up because of Mother Nature. They  
13 were not done right and I've seen kids -- I've lived  
14 in this neighborhood ten years -- I've seen kids pick  
15 up these pavers and throw them. So these pavers,  
16 okay, good design. Let's use something else, let's  
17 say two-by-two concrete slabs instead of pavers  
18 because I'm sure those pavers are going to be eroding  
19 after three or four years and become uneven and it's a  
20 safety hazard.

21                   Now, in regards to Sumner Avenue and  
22 the street right across from Cumberland Farms, which  
23 is where there's a bus stop at, going eastbound on  
24 Sumner out of town, there's a bus stop there. I use

1   that bus stop, but there's no easy way for me to get  
2   across the intersection where Belmont Avenue comes up  
3   to Sumner. Right now, your plans do not propose a  
4   crosswalk there from the Cumberland Farms side of  
5   Sumner across to where the bus stop is. I'm asking  
6   you to very much consider that right there at that  
7   spot because you're redesigning the place, okay, and  
8   not everybody gets their way. Okay? The majority of  
9   opinions count, but the primary factor is safety as a  
10  pedestrian.

11                   Now, there is one small item, which I  
12  have witnessed, at the corner of Belmont Avenue and  
13  Sumner Avenue at the existing tree triangle there.  
14  The timing is a little bit off. Cars are still  
15  allowed to proceed down Sumner leaving the X at the  
16  same time that the green light is given for Belmont  
17  Avenue attempting to get onto Sumner. I haven't seen  
18  an accident there. I've seen a few close encounters.

19                   I am going to say something now that is  
20  in opposition to most of the people here. I want to  
21  see Sumner Avenue widened. The tree belt gets taken  
22  off. Okay. That's bad. But, the fact of the matter  
23  is, if we go to three lanes on Sumner Avenue on the  
24  east side, we can fill up the traffic and allow it to

1 proceed through instead of going with two lanes having  
2 spaces to turn onto your turn-offs onto side streets,  
3 okay, but also instead of getting a back up because  
4 I've seen it back up. Have you been there in the  
5 afternoon? From the X back to Trinity United  
6 Methodist Church, two lanes backed up. And you go to  
7 three lanes, okay, you just fill in the traffic. So,  
8 that one lane right there on the tree belt, as it is  
9 existing, cannot even get to Cliftwood or Lenox to  
10 make a right-hand turn. People will cut through  
11 Dickinson and then up to Belmont.

12                   The last item I would like to speak  
13 about is the proposed turnabout or rotary, however you  
14 define it, that's going to be placed right at about  
15 where Commonwealth Avenue is. All right. I don't  
16 know who here knows this, but I'll let you know.  
17 Route 83 is a posted truck route from East Longmeadow  
18 out and from Sumner Avenue to East Longmeadow, Route  
19 83. How are you going to account for tractor-trailer  
20 trucks?

21                   MODERATOR CURRIER: They can make those  
22 turns.

23                   PETER DELUZE: With the roundabout,  
24 they're going to be rounding about right onto

1 Commonwealth.

2 MODERATOR CURRIER: They can do it with  
3 the apron. They're designed -- they put turning  
4 templates on there when they design it. And they  
5 should have no problem.

6 PETER DELUZE: I think that would be a  
7 big problem because if we're talking about Belmont  
8 Avenue now, where you're going to put Commonwealth,  
9 where Commonwealth is, and you're going to put in a  
10 roundabout to make it come one way out onto  
11 Commonwealth, is that the only purpose for that  
12 roundabout?

13 MODERATOR CURRIER: Steve, can you help  
14 us with that?

15 STEPHEN SAVARIA: The purpose for the  
16 roundabout is so that vehicles that get to that point  
17 can reverse direction and go out Ormond Street if they  
18 missed --

19 PETER DELUZE: Not Ormond Street, after  
20 that. Is the roundabout going to be at Ormond Street?

21 STEPHEN SAVARIA: No, the roundabout is  
22 going to be at Commonwealth.

23 PETER DELUZE: Okay. What about  
24 tractor-trailer trucks? That's the posted route. I

1 take the buses all the time, folks. I don't drive  
2 anymore. I've been on the street walking. I know my  
3 location. I know observations. You have tractor-  
4 trailer trucks on Belmont Avenue coming up to Sumner  
5 six times a day, the one that goes down to Sumner.  
6 You have the city buses. So, a bus coming up is going  
7 to go right on Ormond Street. They're just going to  
8 follow the signs. They're going to continue on up  
9 unless you create an actual curbing at Ormond Street  
10 to direct traffic onto Ormond on Sumner. You would  
11 have to do that I think, not let them go up to  
12 Commonwealth.

13 Now, as far as some trucks that want to  
14 go down Commonwealth, service trucks, delivery trucks,  
15 the Forest Park Avenue sign at the beginning of Sumner  
16 Ave., at the beginning of Fort Pleasant and Forest  
17 Park Avenue, let's people know it's for service trucks  
18 only, no through trucks. So, no through trucks would  
19 be a good plan.

20 And my last, to this gentleman here,  
21 Bob, I believe, I want to ask you, you're a traffic  
22 engineer, I believe.

23 BAO LANG: That's right.

24 PETER DELUZE: Would you consider,

1   instead of putting in a green island on Sumner Avenue,  
2   because you're going to expand it a little bit, but  
3   you're not, you're creating more space, but you're not  
4   in terms of taking one to two feet, the curbing and  
5   the tree belt, going to three lanes on each side would  
6   accommodate the matter I think because it's going to  
7   allow more traffic to queue up. And then your right  
8   lane will take care of your Cliftwood and your Lenox.

9                   Thank you.

10                  MODERATOR CURRIER: Thank you very  
11 much. We can carry on that discussion on the side.

12                  I would like to ask the designers about  
13 the emergency response vehicle path that the gentleman  
14 brought up about Belmont. That's an important  
15 comment. Can you explain to us how that's going to  
16 respond, how they're going to respond from that  
17 station?

18                  CHRIS CIGNOLI: Do you want me to take  
19 that, Steve?

20                  STEPHEN SAVARIA: We haven't had any  
21 input from the fire department as far as -- we haven't  
22 had any input from the fire department relative to  
23 emergency response on Belmont.

24                  PETER DELUZE: Have you asked them?

1 Have you gone to them?

2 STEPHEN SAVARIA: We haven't gone to  
3 them.

4 PETER DELUZE: You have not. I think  
5 it would --

6 STENOGRAPHER: I'm sorry, sir. Can you  
7 go back to the mic and speak?

8 MODERATOR CURRIER: We will. We will.  
9 We're going to have to talk that out. That's why  
10 that's a great comment. Really, yeah. It's super  
11 important. That's why I put them on the spot.

12 PETER DELUZE: That is the question. I  
13 live on Belmont.

14 MODERATOR CURRIER: Right.

15 PETER DELUZE: Come on down, four or  
16 five times a night. I'm not opposed to it.

17 MODERATOR CURRIER: Right.

18 PETER DELUZE: But I am opposed to that  
19 one-way thing there.

20 MODERATOR CURRIER: Thank you.

21 Yes, sir?

22 STENOGRAPHER: Hang on a second.

23 MODERATOR CURRIER: Thank you, Walter.

24 Yes, sir?

1                   DREW GALASKA: Drew Galaska, G-a-l-a-s-  
2 k-a.

3                   My concerns, I guess questions, are for  
4 Chris and to Jon.

5                   So, Chris, you actually mentioned  
6 earlier the arborvitaes at the X that are at the  
7 intersection of Belmont and Dickinson where they kind  
8 of come together. They're currently blocking a light  
9 controller there. Those create a severely dangerous  
10 mess of a blind spot. If you are parked on Belmont  
11 and you're waiting at the stop line --

12                  CHRIS CIGNOLI: Yeah, I know where you  
13 mean.

14                  DREW GALASKA: -- and you're not  
15 blocking the crosswalk, you cannot see a thing in the  
16 X. And as that man mentioned, the lights are a little  
17 off. They give you a green when maybe someone is  
18 running the yellow or taking the illegal left off  
19 Dickinson. And I've been nearly hit many times.

20                  So, for the future, I ask you to  
21 consider to choose your planting, where you're  
22 planting them and what they'll look like in the future  
23 because when those plants were planted, they were  
24 these tiny little things. They blocked the box. They

1 looked prettier than the box. And now they are  
2 massive. And I would attribute a fair number of those  
3 accidents to the fact that coming up Belmont, I can't  
4 see a thing in the X. I think they should be removed.  
5 Really, I mean I'd like to remove them tomorrow. But,  
6 before construction starts, if you're going to start  
7 diverting traffic different ways, they need to be gone  
8 because I can't see unpredictable traffic. I can't  
9 see workers. I can't see policemen. And, right now,  
10 in order to see, because I know better, I live here, I  
11 creep onto the crosswalk, and I peek around, and I  
12 wait. The green goes, and I wait, and I take my time.  
13 I wait and I take my time. I get honked at. Like  
14 when you get nearly t-boned and nearly clipped half a  
15 dozen, dozen times, you don't care if you get honked  
16 at. So, I ask that in the future you consider the  
17 plants you're planting, where you're putting them.

18 And, you know, we talk about how you're  
19 going to plant little one-inch, two-inch twigs.  
20 Eventually, they're not one- and two-inch twigs. And  
21 even though you can see now, ten, 20 years from now,  
22 you may not be able to.

23 And, Chris, I would just really  
24 appreciate it, knowing that those arborvitaes are not

1 part of any future plan, that you would consider  
2 either a serious trim or just getting rid of them  
3 because, honestly, we're in this new part of this art  
4 piece where people are decorating the boxes to make  
5 them look pretty, people are doing different things,  
6 and those arborvitaes' just block a major street that  
7 goes in now, that I know is going out in the future.  
8 I'm talking the south side of the X. In the future,  
9 it's going to be one way out, so it's going to be a  
10 non-issue. I can't wait five years and sit with that  
11 blind spot this much longer.

12 CHRIS CIGNOLI: I want to get rid of  
13 them tomorrow for two reasons. Number one, exactly  
14 what you talk about, getting out there and people  
15 making -- blowing the Dickinson -- if they're going up  
16 and down Dickinson, taking that whatever, it's a right  
17 or a left. I want to get rid of it. Number two,  
18 because of where the traffic controller is, if one of  
19 our workers is working on that traffic controller, he  
20 can't see the lights while you're working on them --

21 DREW GALASKA: Right.

22 CHRIS CIGNOLI: -- which is not what  
23 it's really good for. So, I have a feeling before we  
24 get to that point, a lot of those will be gone.

1                   DREW GALASKA: You would say as the  
2 head of DPW that you want to get rid of them tomorrow.  
3 Well, why are they still there now?

4                   CHRIS CIGNOLI: I just can't take trees  
5 out. I have to go through a process. So, one of the  
6 things that I know when we're moving forward with this  
7 project ahead of time, I'm going to make a motion  
8 through the Park Department, etc., to make sure that I  
9 can get rid of them.

10                  DREW GALASKA: Okay. If I could just  
11 have your card at the end of this?

12                  CHRIS CIGNOLI: Absolutely.

13                  DREW GALASKA: I would like to be part  
14 of that process because I'd like to go on record as  
15 saying I hate those arborvitaes.

16                  CHRIS CIGNOLI: Yeah.

17                  DREW GALASKA: And, if nothing else, it  
18 makes me feel good to say it out loud and over a mic.

19                  CHRIS CIGNOLI: I know it's come up  
20 before. At that intersection, one of the things that  
21 we did is we increased the all red time so that if  
22 somebody blows the light in one of those directions --  
23 I want to say it's five seconds now. So that means if  
24 somebody is still coming through there, they really

1   blew a red light.

2                   DREW GALASKA:   It's more the people  
3   that are coming off of Dickinson --

4                   CHRIS CIGNOLI:   Yes.

5                   DREW GALASKA:   -- who don't realize  
6   they can't take a left.  They get stuck on a red.

7                   CHRIS CIGNOLI:   Right.  They're in the  
8   middle.

9                   DREW GALASKA:   They're at the lights.  
10  They can't see them.

11                  CHRIS CIGNOLI:   Right.

12                  DREW GALASKA:   And then they don't  
13  realize that we have a green coming in.

14                  CHRIS CIGNOLI:   Exactly.  Exactly.

15                  DREW GALASKA:   I just want to see the  
16  traffic that is coming perpendicular to me.

17                  CHRIS CIGNOLI:   Yeah.  No, we agree on  
18  that.

19                  DREW GALASKA:   Okay.  Thank you.

20                  CHRIS CIGNOLI:   Thank you.

21                  MODERATOR CURRIER:  The lady with the  
22  patience.  How are you?

23                  SUSAN JOEL:   No, I -- so, Susan Joel,  
24  J-o-e-l.  I live in the neighborhood.

1                   And I've been thinking and listening  
2 all evening. And one of the things that I'm hearing  
3 from both this side of the room and this side of the  
4 room is that there's a serious problem with traffic at  
5 the X right now. Right? And you've developed this  
6 very comprehensive, long-term, you know, detailed plan  
7 that's going to take, if everything goes according to  
8 plan, which almost never happens with a big  
9 construction project like this, it will be seven years  
10 from now before it's done.

11                   MODERATOR CURRIER: Correct.

12                   SUSAN JOEL: Right?

13                   MODERATOR CURRIER: Yeah, completion.  
14 Yes.

15                   SUSAN JOEL: Completion.

16                   MODERATOR CURRIER: To completion.

17                   SUSAN JOEL: Seven years from now. So,  
18 if the intersection currently is one of the most  
19 dangerous intersections in the Valley because of its  
20 crash rate, it would seem to me like it makes sense to  
21 think about what are some interim steps that can be  
22 taken to try to mitigate some of the problems. And  
23 that mitigation process, if it's done correctly, might  
24 be able to address some of the questions that have

1   been raised tonight. Right?

2                   So, people are concerned about trees.

3   People are concerned about cut-throughs. Right?

4   There's a lot of issues that got brought up. So, if  
5   there's a way to, for example, synchronize the lights  
6   in a way that helps to control the traffic. If  
7   there's a way to deal with the arborvitaes --

8                   MODERATOR CURRIER: Yeah.

9                   SUSAN JOEL: -- if there's a way to put  
10   in some new signage or some new directions around  
11   pedestrian crossings. It would be nice to have like  
12   lines. It would be nice to have all kinds of things  
13   that don't cost \$11-and-a-half million and don't take  
14   seven years to do.

15                  So, I guess I would encourage the City  
16   and whatever partners you need, Chris, to work with  
17   you to think about, you know, what can we do between  
18   now and seven years from now --

19                  MODERATOR CURRIER: Right.

20                  SUSAN JOEL: -- to try to make the  
21   intersection a safer intersection for everyone.

22                  MODERATOR CURRIER: Yeah.

23                  SUSAN JOEL: Right? Because asking us  
24   to wait for seven years --

1                   MODERATOR CURRIER: Right.

2                   SUSAN JOEL: -- to fix a problem that's  
3 really an urgent problem seems like a hard ask.

4                   MODERATOR CURRIER: No, that's a great  
5 constructive comment. And there are -- you could  
6 freshen up the striping, and check the visibility of  
7 the signs -- those arborvitaes are probably in deep  
8 trouble right now -- and some other things that I  
9 can't think of. Bao might have a couple of ideas.

10                  BAO LANG: A Road Safety Audit was  
11 actually performed probably a year ago, Nick. And  
12 they did provide some interim short-term fixes like  
13 you suggested. So, that's something that Chris, the  
14 City, can probably look into to maybe address before  
15 this project. So, there are little, low-cost, interim  
16 actions that can be taken. And that will be up to  
17 Chris and the City.

18                  MODERATOR CURRIER: MassDOT performs  
19 Road Safety Audits at all our high-crash locations,  
20 which is the exact exercise you described where we  
21 evaluate simple, low-cost, quick fixes.

22                  AUDIENCE: Can we get those interim  
23 steps that you suggested --

24                  MODERATOR CURRIER: Can you come up to

1 the mic? Yes, we can provide the Road Safety Audit  
2 results. We can give that to the City. They can put  
3 it on their website.

4 AUDIENCE: If we could get those  
5 interim results and share it with the civic  
6 associations as well as with the City Council, and  
7 then we could work with Mr. Cignoli.

8 MODERATOR CURRIER: Yes, absolutely.  
9 Thank you.

10 Yes, what else? One more. This  
11 gentleman here.

12 AUDIENCE: On your little footprint,  
13 you have this red marker here that looks like a --  
14 what is that?

15 STEPHEN SAVARIA: As part of the  
16 original concept design, in addition to the path going  
17 through Forest Park from Cliftwood out to Sumner  
18 Avenue, there was going to be another path for Trafton  
19 Road into Forest Park to the arena parking area where  
20 the farmers' market is, kind of just through the woods  
21 back there.

22 The Parks Department has elected to  
23 make that part of their own set of programmed  
24 improvements. So that is no longer part of this

1 project.

2 AUDIENCE: Thanks.

3 MODERATOR CURRIER: Would anyone else  
4 like to be formally recognized by -- yes, ma'am. Come  
5 on up. I'm afraid we need you at the mic. You've  
6 seen Walter.

7 KIM RIVERA: Hello. My name is Kim  
8 Rivera. And I am actually the civilian coordinator  
9 for the C3 --

10 MODERATOR CURRIER: Could you spell  
11 your last name for us?

12 KIM RIVERA: River with an A.

13 STENOGRAPHER: R-i-v-e-r-a?

14 KIM RIVERA: Exactly.

15 STENOGRAPHER: Thank you.

16 MODERATOR CURRIER: Thank you.

17 KIM RIVERA: And I am the civilian  
18 coordinator for the C3 here in Forest Park.

19 Just as an FYI, I didn't know about  
20 this meeting. I was just fortunate that someone had  
21 to tell me. We meet every Monday at Calvary Love  
22 Church from 10:00 to 11:00, faithfully, for five  
23 years. So, if you ever want to give out some  
24 information, maybe someone could come to the meeting.

1                   I also live on Pomona and Sumner. And  
2 my fear is that if you have the light -- I believe  
3 that it's Ormond Street -- when you have all that  
4 traffic coming in and out, we have the liquor store  
5 and Benson Bagels there. And people love that  
6 restaurant. And so it's always already busy on my  
7 street. So, imagine when they start having a lot of  
8 traffic coming in from East Longmeadow, and you've got  
9 the liquor store, and you've got the little  
10 restaurant. I just feel like that's going to end up  
11 being one area that's going to be congested. And I'm  
12 afraid of that.

13                   And I really don't want a lot of cars  
14 on my street. I like my street the way it is. That's  
15 my complaint.

16                   MODERATOR CURRIER: That's a good  
17 comment.

18                   KIM RIVERA: Thank you

19                   STENOGRAPHER: I'm sorry, Ms. Rivera,  
20 before you go, just a couple of things. You are the  
21 civilian coordinator of what?

22                   KIM RIVERA: C3.

23                   STENOGRAPHER: C3?

24                   KIM RIVERA: Yes.

1                   STENOGRAPHER: And, I'm sorry, you  
2 mentioned a bagel store. What's the name of it again?  
3                   KIM RIVERA: Benson Bagels.  
4                   STENOGRAPHER: Sorry?  
5                   KIM RIVERA: Benson Bagels.  
6                   STENOGRAPHER: Benson?  
7                   KIM RIVERA: Yes.  
8                   MODERATOR CURRIER: Yes, Benson Bagels.  
9                   STENOGRAPHER: Thank you.  
10                  MODERATOR CURRIER: Thanks very much,  
11 Ms. Rivera. Sorry.  
12                  VIRGINIA WHITE: Virginia White, W-h-i-  
13 t-e.  
14                  I just was wondering, since the X and  
15 all those main streets, the speed is a problem, if you  
16 incorporated or have thought about any traffic calming  
17 designs?  
18                  MODERATOR CURRIER: On the side streets  
19 or on the X itself, the major roads?  
20                  VIRGINIA WHITE: On the main street,  
21 like Sumner and stuff, to slow the traffic instead of  
22 widening the street and having more cars go down at  
23 speeds that are ridiculous.  
24                  MODERATOR CURRIER: Narrowing the lanes

1 is a form of traffic calming. We're going from 13-  
2 and-a-half feet to 11 on each lane. And we're adding  
3 the shoulder stripes. We're not allowed to do speed  
4 bumps on public safety routes, things like that.

5 STEPHEN SAVARIA: So the elimination of  
6 through traffic on Belmont Avenue --

7 MODERATOR CURRIER: Yeah, that will  
8 help.

9 STEPHEN SAVARIA: -- is a traffic  
10 calming measure. And the introduction of the mini-  
11 roundabouts on Belmont Avenue is also a traffic  
12 calming measure.

13 VIRGINIA WHITE: Okay. Great. Thank  
14 you.

15 MODERATOR CURRIER: That's a great  
16 question.

17 What do you think? Shall we close it  
18 formally and then we'll stay for as long as you'd like  
19 to chat? I see some nods. I'm going to go with it.

20 Thank you so much. Walter, we're  
21 officially ending the formal part of our gathering at  
22 9:07.

23 (Whereupon, the hearing was closed at  
24 9:07 p.m.)

C E R T I F I C A T E

I, Judith A. Luciano, do hereby certify that the foregoing record is a true and accurate transcription of the proceedings in the above-captioned matter to the best of my skill and ability.

**THE COMMONWEALTH OF MASSACHUSETTS  
MASSACHUSETTS DEPARTMENT OF TRANSPORTATION – HIGHWAY DIVISION  
NOTICE OF A PUBLIC HEARING Project File No. 608717**

A Design Public Hearing will be held by MassDOT and the City of Springfield to discuss the proposed Sumner Ave at Belmont Ave and Dickinson Street (The X) Intersection and Related Improvements Project in Springfield, MA.

WHERE: Forest Park Middle School Auditorium  
46 Oakland Street  
Springfield, MA 01108

WHEN: Tuesday, September 17, 2019 @ 6:30 PM

PURPOSE: The purpose of this hearing is to provide the public with the opportunity to become fully acquainted with the proposed Sumner Ave at Belmont Ave and Dickinson Street (The X) intersection and surrounding area improvements project. All views and comments made at the hearing will be reviewed and considered to the maximum extent possible.

PROPOSAL: The project includes reconstruction of The "X" and other intersections along Sumner Ave, Belmont Ave and Dickinson Street. Major project elements include: reconstruction of existing roadways, realignment of critical intersections, new traffic signal control, construction of two mini-roundabouts, handicapped accessibility, pedestrian improvements, bike lane and shared use bicycle accommodation, bus stop accommodations, drainage, streetscaping and pedestrian plazas, landscaping and utility improvements. In addition, new shared use paths will connect the surrounding neighborhood to Forest Park.

A secure right-of-way is necessary for this project. Acquisitions in fee and permanent or temporary easements may be required. The City of Springfield is responsible for acquiring all needed rights in private or public lands. MassDOT's policy concerning land acquisitions will be discussed at this hearing.

Written views received by MassDOT subsequent to the date of this notice and up to five (5) days prior to the date of the hearing shall be displayed for public inspection and copying at the time and date listed above. Plans will be on display one-half hour before the hearing begins, with an engineer in attendance to answer questions regarding this project. A project handout will be made available on the MassDOT website listed below.

Written statements and other exhibits in place of, or in addition to, oral statements made at the Public Hearing regarding the proposed undertaking are to be submitted to Patricia A. Leavenworth, P.E., Chief Engineer, MassDOT, 10 Park Plaza, Boston, MA 02116, Attention: Roadway Project Management, Project File No. 608717. Such submissions will also be accepted at the hearing. Mailed statements and exhibits intended for inclusion in the public hearing transcript must be postmarked within ten (10) business days of this Public Hearing. Project inquiries may be emailed to [dot.feedback.highway@state.ma.us](mailto:dot.feedback.highway@state.ma.us)

This location is accessible to people with disabilities. MassDOT provides reasonable accommodations and/or language assistance free of charge upon request (including but not limited to interpreters in American Sign Language and languages other than English, open or closed captioning for videos, assistive listening devices and alternate material formats, such as audio tapes, Braille and large print), as available. For accommodation or language assistance, please contact MassDOT's Chief Diversity and Civil Rights Officer by phone (857-368-8580), fax (857-368-0602), TTD/TTY (857-368-0603) or by email ([MassDOT.CivilRights@dot.state.ma.us](mailto:MassDOT.CivilRights@dot.state.ma.us)). Requests should be made as soon as possible prior to the meeting, and for more difficult to arrange services including sign-language, CART or language translation or interpretation, requests should be made at least ten (10) business days before the meeting. In case of inclement weather, hearing cancellation announcements will be posted on the internet at <http://www.massdot.state.ma.us/Highway/>

JONATHAN GULLIVER  
HIGHWAY ADMINISTRATOR

PATRICIA A. LEAVENWORTH, P.E.  
CHIEF ENGINEER

Dear Concerned Citizen:

The Massachusetts Department of Transportation (MassDOT) is committed to building and maintaining a transportation infrastructure that is both safe and efficient for all who use our roadways, bridges, bicycle facilities and pedestrian paths, while maintaining the integrity of the environment.

As part of the design process for this project, we are conducting this public hearing to explain the proposed improvements, listen to your comments and answer any questions you may have. At the conclusion of the hearing, MassDOT will review all of your comments and, where feasible, incorporate them into the design of the project.

We recognize that road and bridge construction can create inconveniences for the public. MassDOT places a great deal of emphasis on minimizing the temporary disruptive effects of construction.

MassDOT encourages input from local communities and values your opinions. Please be assured that we will undertake no project without addressing the concerns of the community.

Sincerely,

Patricia A Leavenworth, P. E.  
Chief Engineer

## **WHAT IS A PUBLIC HEARING?**

### **WHY A PUBLIC HEARING?**

To provide an assured method whereby the Commonwealth of Massachusetts can furnish to the public information concerning the State's highway construction proposals, and to afford every interested resident of the area an opportunity to be heard on any proposed project. At the same time, the hearings afford the Commonwealth an additional opportunity to receive information from local sources which would be of value to the State in making its final decisions to what design should be advanced for development.

### **WHY NOT A VOTE ON HIGHWAY PLANS?**

The hearings are not intended to be a popular referendum for the purpose of determining the nature of a proposed improvement by a majority of those present. They do not relieve the duly constituted officials of a State highway department of the necessity for making decisions in State highway matters for which they are charged with full responsibility.

### **WHAT DOES A PUBLIC HEARING ACCOMPLISH?**

It is designed to ensure the opportunity for, or the availability of, a forum to provide factual information which is pertinent to the determination of the final alternative considered by the state to best serve the public interest, and on which improvement projects are proposed to be undertaken.

It is important that the people of the area express their views in regard to the proposal being presented, so that views can be properly recorded in the minutes of the meeting. These minutes will be carefully studied and taken into consideration in the determination of the final design.

## **RIGHT OF WAY ISSUES**

A secure right of way is necessary for this project. Temporary construction easements may be required. Your municipality is responsible for acquiring all necessary rights in private or public lands. If your property is affected, your rights are fully protected under law.

### **1. REASON FOR PROJECT**

The completion of this project will serve local needs. The proposed enhancement will also be in the interest of others in the greater community, and provide for the public good.

### **2. WHO CONTACTS ME?**

Representatives of the municipality have already contacted or will contact you. They will explain the procedures used in acquiring any necessary rights in land.

### **3. WHAT ABOUT DONATIONS? WHAT IS A RIGHT OF ENTRY?**

Town officials will often seek donations, of parcels, where permanent rights are required. This procedure will minimize the acquisition cost for your community.

A Right of Entry is a document that is signed by the owner. It allows the Contractor to perform certain types of work on the owner's land. The work is usually minor in nature and frequently consists of loaming/seeding behind sidewalks, new driveway apron work, grading/sloping, and wetland protection, etc. The rights granted are temporary in nature.

### **4. WHAT IS A FAIR PRICE FOR THE ACQUIRED PARCELS?**

In the event that donations are not considered, or completed, every effort will be made to ensure that an equitable value is awarded. Municipal and/or outside appraisers will complete an appraisal. Consideration is given to the type of rights needed, whether in fee, permanent or temporary easements. The appraisal will be the basis for arriving at a fair price (for damages that result).

### **5. MUST I ACCEPT THE MUNICIPALITY OFFER?**

No, if the owner feels that the offer is not fair the owner may petition the courts. This action does not stop or delay the acquisition. The action must occur within 3 years. The owner(s) may be paid pro tanto (for the time being). The pro tanto payment will not prejudice the court's final decision.

## **PROJECT OVERVIEW**

The improvements proposed as part of this project will address existing and future deficiencies associated with the increase in traffic demand along this heavily traveled corridor. The purpose of this design, engineering, and landscape architecture work is to refine the recommended improvements for traffic congestion mitigation, pedestrian, bicycle, and vehicle safety enhancement to the study area roadways as presented in the “X” Planning Study.

The main features of the improvements for this project are as follows:

- Traffic pattern modifications to the study area intersections to alleviate congestion and improve safety at the X intersection
- New traffic signal equipment to improve operations
- New signal coordination plan between signals on Sumner Avenue to improve Sumner Avenue traffic progression
- Provision of 5’ bicycle lanes
- Construction of a multi-use path within Forest Park connecting Dickinson Street with Sumner Avenue/Oakland Street intersection
- Reconstruct and reconfigure sidewalks and pedestrian facilities; provide furnishings and landscaping.
- Improve pedestrian accessibility and crossing lengths
- Addition of left and right turn auxiliary lanes at study area intersections to separate movements where warranted by traffic volumes

## **PROPOSED IMPROVEMENTS**

In general, the Belmont Avenue legs at the “X” are redesigned to be one-way roadways departing the intersection. In order to accommodate this design, the following summarizes the redistribution methodologies and anticipated improvement measures for the preferred alternative.

### The “X” — Sumner Street at Dickinson Street and Belmont Avenue:

- Redesign the Belmont Avenue north leg to provide a one-way roadway northbound from Sumner Avenue to Burlington Street (i.e., departing the “X”).
- Redesign the Belmont Avenue south leg to provide a one-way roadway southbound from Sumner Avenue to Commonwealth Avenue (i.e., departing the “X”).
- Reconfigure the Sumner Avenue westbound approach to provide an exclusive left-turn lane onto Dickinson Street southbound.
- Reconfigure the Dickinson Street northbound and southbound approaches to provide exclusive left turn lanes onto Sumner Avenue.
- Permit right turns from Dickinson Street southbound approach to Sumner Avenue with a “No Turn on Red” sign.

### Belmont Avenue North of the “X”:

- Redistribute Belmont Avenue southbound traffic destined for Sumner Avenue eastbound, Dickinson Street southbound, and Belmont Avenue southbound to Oakland Street and then to Sumner Avenue.
- Reconstruct the Belmont Avenue and Burlington Street intersection to provide a mini-roundabout, with Belmont Avenue north and Burlington Street providing two-way traffic

flow, and Belmont Avenue south providing one-way traffic flow approaching the intersection (i.e., away from the “X”).

- Modify traffic signal operations at the Belmont Avenue and Oakland Street intersection.
- Modify traffic signal operations at the Sumner Avenue and Oakland Street intersection.

#### Belmont Avenue South of the “X”:

- Redistribute Belmont Avenue northbound traffic destined for Sumner Avenue westbound, Belmont Avenue northbound, and Dickinson Street northbound to Ormond Street and then to Sumner Avenue.
- Convert Ormond Street to a one-way roadway northbound from Belmont Avenue to Sumner Avenue.
- Remove the existing traffic signal at the Sumner Avenue intersection with Belmont Avenue south.
- Reconstruct the Belmont Avenue and Commonwealth Avenue intersection to provide a mini-roundabout, with Belmont Avenue south and Commonwealth Avenue providing two way traffic flow, and Belmont Avenue north providing one way traffic flow approaching the intersection (i.e., away from the “X”).

#### Sumner Avenue West of the “X”:

- Relocate the Sumner Avenue traffic signal from the Lenox Street intersection to the Cliftwood Street intersection. .
- Convert Lenox Street to a one-way roadway southbound from Sumner Avenue.
- Convert Cliftwood Street to a one-way roadway northbound toward Sumner Avenue.
- Remove the existing traffic signal at the Sumner Avenue intersection with Lenox Street. Place the Sumner Avenue and Cliftwood Street intersection under traffic signal control. Include the Cliftwood Street traffic signal within a coordinated traffic signal system with the “X” signalized intersection.

#### Sumner Avenue at Oakland Street:

- Restripe the Sumner Avenue eastbound approach to provide an exclusive left-turn lane and two through lanes.
- Reconfigure the Oakland Street southbound approach to provide an exclusive left turn lane and a right-turn lane.

#### Sumner Avenue at Ormond Street:

- Place the Sumner Avenue and Ormond Street intersection under traffic signal control. Include the Ormond Street traffic signal within a coordinated traffic signal system with the “X” signalized intersection.
- Modify the Forest Park Liquors drive to be controlled by the traffic signal.
- Close the Santander Bank drive-through entrance.
- Restripe the Ormond Street northbound approach to provide an exclusive left—turn lane and a shared left-turn/through/right—turn lane.

#### Sumner Avenue at White Street:

- Provide vehicle detection and retime the traffic signal to provide more green time on the Sumner Avenue eastbound/westbound permissive phase.

Sumner Avenue at Main Greeting Road (Forest Park main entrance):

- Construct a Sumner Avenue westbound exclusive left-turn lane for access into Forest Park.

**TRAFFIC MANAGEMENT**

All roadways in the project area will remain open to traffic throughout construction. At least one lane of traffic in each direction will be maintained at all times. There will be pedestrian detours in place during normal construction hours if necessary. Sections of sidewalk may be closed for short periods of time to allow for concrete curing. Occasional short traffic disruptions may occur but every effort will be made to minimize inconvenience to the public.

**RIGHT OF WAY IMPACTS**

Temporary construction and permanent sidewalk easements, as well as acquisition in fee of private property for the alteration of the layout of Belmont Avenue associated with the project construction will be required. The City will be responsible for securing all necessary easements and fee takings.

**PROJECT COST**

The current estimate of the total construction cost of this project is approximately \$11 million.

**PROJECT SCHEDULE**

The design is expected to be complete by 2022 and ready for advertisement when funding for the project is programmed in the Statewide Transportation Improvements Program (STIP).

**Cc:** Galen Mook <galen@massbike.org>  
**Subject:** The X redesign feedback

Ms Leavenworth et. al:

Please see the attached requested changes to The X's ongoing redesign from MassBike's Springfield membership.

We highly recommend an additional forum with regards to preservation of historic tree assets and bikeways along Sumner Ave between Forest Park and The X business district.

MassBike would be happy to assist with organizing a forum to include all affected parties as we do believe a pareto equilibrium compromise can be reached for neighbors, business owners, religious communities, cyclists, pedestrians, and motorists.

Don't hesitate to let me know of any questions.

Best Regards,  
-Alex

Patricia Leavenworth, P.E., Chief Engineer  
MassDOT - Highway Division  
10 Park Plaza, Boston, MA 02116-3973  
Attn: Roadway Project Management Section

Dear Ms. Leavenworth

The members of the Massachusetts Bicycle Commission (MassBike) would like to make the following written comments on the Sumner Ave at Belmont Ave and Dickinson Street (The X) Intersection and Related Improvements Project (Project File No. 608717). Some members of our group attended the public hearing on September 17, 2019 and provided spoken comments.

With the acceleration of climate change upon us, we strongly recommend MassDOT and the City of Springfield refocus on details of bike and pedestrian infrastructure.

We provide a handful of recommendations below:

*1) Minimize the removal of mature trees on the section of Sumner Avenue along Forest Park, Trinity Church, and nearby properties by removing the bicycle lane on the south side (eastbound travel) of Sumner Ave and constructing instead an enhanced multi-use path (MUP) for both pedestrians and bicycles in place of the existing sidewalk south side of Sumner.* We suggest that, within Forest Park, the additional necessary width to create the path can extend south towards the park, where there is currently a strip of lawn. This will reduce conflicts with utilities and avoid the removal of trees in the tree belt. Trinity Church has objected to the removal of trees in front of its land, and as a result, might agree to allow the widening of the sidewalk in front of the church if those trees can be saved. We suggest retaining the eastbound bike lane in the design wherever the MUP cannot be accommodated. We suggest that an MUP is quite feasible between Main Greeting Road and Continental Street, and may be possible further east to Parkwood St with careful design.

IN ORDER TO BEST ADDRESS ALL INTERESTED PARTIES' CONCERNS, WE HIGHLY RECOMMEND YOU HOST ANOTHER FEEDBACK SESSION INCLUDING MASSBIKE, WALK/BIKE SPRINGFIELD, TRINITY CHURCH, SUMNER AVE ABUTTERS, AND ANY OTHER REGISTERED PARTIES.

2) To reduce the need to widen Sumner Avenue, reduce the width of the inner travel lane to 10 feet. According to the NACTO Urban Street Design Guide, "For multi-lane roadways where transit or freight vehicles are present and require a wider travel lane, the wider lane should be the outside lane (curbside or next to parking).... Inside lanes should continue to be designed at the minimum possible width. Lane widths of 10 feet are appropriate in urban areas and have a positive impact on a street's safety without impacting traffic operations. For designated truck or transit routes, one travel lane of 11 feet may be used in each direction."

3) The distance between crosswalks at the west end of the project (Main Greeting Road to Oakland St.) is too great. (The distance from Main Greeting Road to Oakland and Forest Park Ave is about 490 feet and 960 feet, respectively.) As numerous PVT bus riders exit

along these stretches there should be a crosswalk with rapid flashing beacon at Sumner Terrance across from the entrance to Forest Park.

4) The distance for pedestrians to walk between crosswalks is too great between Oakland and Cliftwood (about 1,000 feet). Add a crosswalk with a flashing beacon near the bus stop at Beaumont.

5) Stripe a crosswalk across all sides of the Cliftwood/Sumner intersection. The design currently does not provide for a crosswalk on the western side.

6) Eliminate the counter-flow bicycle lane on Belmont and add the bicycle lane instead of sharrows on the right side of Belmont traffic flow. Springfield currently has an issue with rider miseducation resulting in numerous cyclists riding against traffic.

7) Again, too long a distance exists between pedestrian crossings east of the X, from Dickinson St and Ormond St. (About 700 feet). Add a crosswalk at Ventura, as there is considerable pedestrian activity in this commercial area and again a bus stop.

8) The multi-use path through Forest Park needs lighting to improve safety at night. Lighting is currently provided in the design, but at least one commenter at the public hearing objected to it. Law enforcement will be able to safely monitor the path when lit.

9) It is a common theme at MassDOT public hearings that commenters complain about perceived poor notification about the hearing. We kindly request that [pioneervalley@massbike.org](mailto:pioneervalley@massbike.org) be notified of all MassDOT public hearings

10) We would like information on how MassDOT will keep the public informed of future design changes, and how the public can comment on such changes.

Thank you for your action on these comments.

Best Regards,

H. Alex Weck

Re: *Reconstruction of Sumner Avenue at Dickson Street and Belmont Avenue,  
Springfield (The "X"). Project File No. 608717*

Dear Ms. Leavenworth:

I write on behalf of Trinity United Methodist Church ("Trinity Church"). I thank you for taking the time to host a Design Public Hearing last night at the Forest Park Middle School. We appreciate the presentations as well as the information that has been provided on the Springfield Public Works website. As I noted last night, we appreciate and applaud the goals of improving the safety around the X and Forest Park. At the same time, we have some concerns with the plans as currently proposed.

As you may be aware, Trinity Church has a longstanding and historic relationship with the City of Springfield and been a long-time friend and good neighbor to the Forest Park community. Trinity Church's congregation is made up of over 700 members, the overwhelming majority living in a close geographic distance to Trinity Church. In addition, Trinity Church is home to numerous groups who regularly and routinely use our facilities – including, Trinity Nursery School and Kindergarten ("TNSK"), Justice for our Neighbors, SPARK After School Program, Boy Scouts, Mobile Food Bank, Residents Encounter Christ, Forest Park Alcoholics Anonymous, St. Augustine Group, two other congregations, Relay for Life, Jewish Family Services, Urban Potential, etc. Our facilities are used by the local community 365 days a year and by hundreds of guests and friends of Trinity Church.

Based upon what I heard at last night's hearing, as well as a review of the rendering and associated documents on the Springfield Public Works website, below please find some initial concerns. These are preliminary observations, are not intended to be an exclusive listing, and are provided in a spirit of opening a dialogue with you to determine how best to address them.

#### In Front of Trinity Church (Sumner Avenue Side)

- The rendering does not have a turning lane for Westbound Sumner Avenue traffic into Continental Street, making it impossible to enter our parking lot approaching Westbound on Sumner Avenue. Similarly, the inability to take a left hand turn from Continental Street onto Sumner Avenue, would significantly disrupt Trinity Church's membership, TNSK students and families, the various groups that use Trinity Church on a regular basis and our respective guests

- Taking any land from the tree belt on Sumner Avenue could eliminate on street parking – negatively impacting our congregation and community who regularly utilize Trinity Church's building
- The general aesthetics of Trinity Church would be adversely impacted including reduced use of our front lawn, and potential loss of beautiful old trees, etc.
- The Trinity Church exit across from Oakland Street does not appear to be addressed in the rendering (including traffic lights and signage). Specifically, the current light at the intersection of Oakland and Sumner Avenue (and the side exit of Trinity Church) only has a three-way traffic signals, and not a four-way traffic signal for the intersection that exists.

#### Behind Trinity Church

- The creation of a Trafton Road walking/bike path connecting Dickinson Street to Sumner Avenue (extending Cliffwood Street from Dickinson to run parallel to Sumner Avenue behind Trinity Church could have potential negative impacts to Trinity Church including: potential for increased vandalism, trespass, etc.
- At this point, we do not understand what the mitigating measures Springfield may employ to address the potential "attractive nuisance".

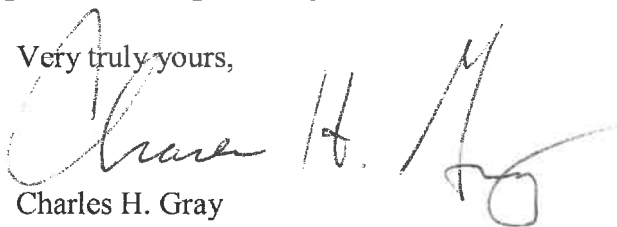

#### Miscellaneous Concerns

- It is unclear how these plans will impact fire lanes – both in front of, beside and behind Trinity Church. This could adversely impact large vehicle's access and egress, including Mobile Food Bank trucks, Fire/Safety vehicles, etc.
- Trinity Church will likely be negatively impacted by general construction disturbance, inconvenience, etc. before/during and after construction.

The above items are provided in a spirit of cooperation and we welcome an open dialogue with the City and/or MassDOT to enhance/improve the safety of Forest Park. After you have had a chance to review our concerns, I would appreciate an opportunity for the City of Springfield, Trinity Church, MassDOT and/or the Springfield Park and Rec Department to partner to achieve a mutually agreeable solution(s) that will address our concerns.

Thank you for the opportunity to engage in this dialogue with you.

Very truly yours,

Charles H. Gray  
President, Board of Trustees  
Trinity United Methodist Church

Attn: Roadway Project Management Section

Dear Ms. Leavenworth

I would like to make the following written comments on the Sumner Ave at Belmont Ave and Dickinson Street (The X) Intersection and Related Improvements Project (Project File No. 608717). I am a member of the local advocacy group known as WalkBike Springfield. Along with some other members of our group, I attended the public hearing on September 17, 2019 and provided spoken comments.

1) The distance between crosswalks at the west end of the project (Main Greeting Road to Oakland) is too great. (The distance from Main Greeting Road to Oakland and Forest Park Ave is about 490 feet and 960 feet, respectively.) There should be a crosswalk with a flashing beacon (at a minimum) at Sumner Terrance across from the entrance to Forest Park.

2) Minimize the removal of mature trees on the section of Sumner along Forest Park by removing the bicycle lane on the south side as described below and instead constructing an enhanced multi-use path (MUP) for both pedestrians and bicycles on the south side of Sumner. This MUP would replace the existing sidewalk. Within Forest Park, the additional necessary width to create the path can be built on the south side of the existing sidewalk, where there is currently a strip of lawn. This will reduce conflicts with utilities and avoid the removal of trees in the tree belt. Trinity Church has objected to the removal of trees in front of its land, and as a result, might agree to allow the widening of the sidewalk in front of the church, if those trees can be saved. The south bike lane should be retained in the design wherever the MUP cannot be accommodated. A MUP appears to be feasible between Main Greeting Road and Continental Street, at a minimum.

3) To reduce the need to widen Sumner, reduce the width of the inner travel lane to 10 feet. According to the NACTO Urban Street Design Guide, "For multi-lane roadways where transit or freight vehicles are present and require a wider travel lane, the wider lane should be the outside lane (curbside or next to parking).... Inside lanes should continue to be designed at the minimum possible width. Lane widths of 10 feet are appropriate in urban areas and have a positive impact on a street's safety without impacting traffic operations. For designated truck or transit routes, one travel lane of 11 feet may be used in each direction."

4) The distance for pedestrians to walk between crosswalks is too great between Oakland and Cliftwood (about 1,000 feet). Add a crosswalk with a flashing beacon (at a minimum) near the bus stop at Beaumont.

5) Stripe a crosswalk across the entire Cliftwood/Sumner intersection. The design currently does not provide for a crosswalk on the western side.

6) Eliminate the counter-flow bicycle lane on Belmont and place a bicycle lane (instead of sharrows) on the right side of Belmont, in the direction of traffic. If the counter-flow bicycle lane is retained, the entrance to the lane from the roundabout north of the X must be redesigned. The

current design requires cyclists to negotiate a very sharp turn in the same space as motor vehicles entering the roundabout from Belmont.

7) The distance for pedestrians to walk between crosswalks is too great east of the X between Dickinson St and Ormond St. (About 700 feet). Add a crosswalk at Ventura, as there is considerable pedestrian activity in this commercial area. A bus stop is also located there.

8) The multi-use path through Forest Park needs lighting to improve safety at night. Lighting is currently provided in the design, but at least one commenter at the public hearing objected to it.

9) It is a common theme at MassDOT public hearings that commenters complain about poor notification of the hearing. Specifically, that written notification is typically limited to a legal notice in one or two local newspapers. This issue came up again at this hearing. Although a legal notice is a required part of public notice, I would suggest that additional outreach regarding public hearings can be accomplished through two simple zero-cost steps: (1) Contact information for all neighborhood councils in Springfield can be found on a single City website page. An email to the neighborhood council in the affected neighborhood(s) at least one month in advance of the hearing will likely result in a announcement at the next scheduled meeting and/or outreach by the council to its members regarding the hearing. (2) Nextdoor.com is a free web service that is organized by neighborhoods. There is likely a Nextdoor.com group for every neighborhood (or town, for small towns that may not have multiple neighborhoods) in Massachusetts. MassDOT can post hearing notifications specific to the municipalities or neighborhoods affected by a project, which will appear on neighborhood- or town-specific web pages and emailed to Nextdoor.com members who elect to receive email updates. Using these simple, zero-cost resources will vastly increase the reach of MassDOT's communications regarding public hearings.

10) I would like information on how MassDOT will keep the public informed of future design changes, and how the public can comment on such changes.

Thank you for your consideration of these comments.

Sincerely,  
Jim Scheffler

**Subject:** Forest Park X Feedback

Dear Ms. Patricia Leavenworth,

I would like to make the following written comments on the Sumner Ave at Belmont Ave and Dickinson Street (The X) Intersection and Related Improvements Project (Project File No. 608717). I strongly recommend MassDOT and the City of Springfield refocus on details of bike and pedestrian infrastructure throughout this project.

Specific areas of concern:

1) **Please construct instead a separated multi-use path (MUP) for both pedestrians and bicycles on the south side of Sumner by widening existing sidewalk along the park.** This would eliminate the need for an east bound bike lane and would **minimize the removal of mature trees** on the section of Sumner Avenue along Forest Park, Trinity Church, and nearby properties. This approach would also avoid the need to widen the existing roadway. A multi-use path could stretch between Forest Park Ave and Parkwood Street and would minimize the need for the proposed path behind Trinity church. Please note: any pedestrian paths or crosswalks in the project should be well lit. According to the Mass Highway addition 11.4.1.1 on shared use paths, "In certain instances, a reduced width of 8 feet may be acceptable where there are severe environmental, historical, and/or structural constraints."

2) **Reduce the width of the inner travel lane to 10 feet** in order to reduce the need to widen Sumner Avenue. According to the NACTO Urban Street Design Guide, "For multi-lane roadways where transit or freight vehicles are present and require a wider travel lane, the wider lane should be the outside lane (curbside or next to parking).... Inside lanes should continue to be designed at the minimum possible width. Lane widths of 10 feet are appropriate in urban areas and have a positive impact on a street's safety without impacting traffic operations. For designated truck or transit routes, one travel lane of 11 feet may be used in each direction."

3) **Reduce the distance between pedestrian crossings by adding additional crosswalks and flashing lights at the following locations:**

- **Sumner Terrance across from the entrance to Forest Park** - The distance between crosswalks at the west end of the project (Main Greeting Road to Oakland St.) is too great. As numerous PVTA bus riders exit along these stretches there should be a crosswalk with rapid flashing beacon at Sumner Terrance across from the entrance to Forest Park.

- **Beaumont St bus stop** - The distance for pedestrians to walk between crosswalks is too great between Oakland and Cliftwood (about 1,000 feet). Add a crosswalk with a flashing beacon near the bus stop at Beaumont.
- **Cliftwood & Sumner in all directions** - Stripe a crosswalk across all sides of the Cliftwood/Sumner intersection. The design currently does not provide for a crosswalk on the western side.
- **Ventura st-** Again, too long a distance exists between pedestrian crossings east of the X, from Dickinson St and Ormond St. (About 700 feet). Add a crosswalk at Ventura, as there is considerable pedestrian activity in this commercial area and again a bus stop.

Thank you for considering these important changes.

Warm regards,  
Laura Masulis

Hello

Please Consider the following Responses suggestions of your traffic design plan. (redesign).

Your goal is to improve, integrate, accessibility to Motor Vehicle traffic, to pedestrians and to increase the flow of Business for every one.

3 key items that would be affected as I see #1.

The hindrance / interference of emergency response Vehicles (i.e.) Fire Engines, traveling South on Belmont and Your in effect one way design opposing their access to Summer Ave means minutes delay for Access to the entire neighborhood of emergency vehicles. Our local Engine house (2) Relys on Belmont Avenue to get to Whole Sections of Forest Park their next access Point to Belmont would be on Ken Wood terrace from Summer. And its a Street not wide Enough to Accomodate One Engine and One Aerial Ladder truck. Belmont Avenue is their key Access Route to an Entire Section of Low-income old buildings and old people Poor Inner-City People w/ a generated blockage of help.

RECEIVED

MassDOT  
PROJECT MANAGEMENT

Bus Access - There is a (there) is a Bustop<sup>2</sup> on North ~~bound~~ Side going to South end on Belmont Ave. this Bus stop is Near to CVS and Consumer Auto Parts. People use this Stop to Access stores & pharmacies and to Walk across the Pkg. lot to transfer to the G-1 Route East bound. If you eliminate the Continuance of Belmont North bound by Creating a diversion to Ormond one way and also Creating a turn around at ~~Summer~~ Avenue Belmont and Commonwealth you in effect prohibit Access to two pharmacy pharmacies and other businesses. the bus Cannot Be changed with a Left Side exit to Satisfy a Ormond One way st.

Plus IF Tractor trailer trucks RT 83 is a posted via (9ps System) truck Route to E Longmeadow from I-91 and Rt. 21 and they do not use Ormond st to Summer Avenue. Then According to Your Plan the 413 27343R turn a round Roundabout will put 53' 12-North-8p Tractor trailer trucks onto Commonwealth Ave.

Next is Summer Avenue at Cliffwood directly across from tip of Cumberland Farms Sidewalk there is no Cross walk to Walk Across Summer Ave at that Point. 2 Spots there Forest Park

**Subject:** Mass Dot Project File No 608717/The X, Spfld, Ma Proposed Improvement Project

Ladies/Gentleman: As a life long Forest Park Resident and a Spfld City Councilor I attended the Sept 17, 2019 25% Design Public Hearing held at Forest Park Middle School with respect to the above referenced project. My concerns with respect to the proposal are as follows:

- 1) Belmont Ave is a wider and broader street than Dickinson and it seems to have the capacity to carry more vehicles than Dickinson and given the placement of the intersections cars can turn left from Belmont onto Sumner, which is a more difficult maneuver from Dickinson. Closing Belmont interrupts that flow.
  - 2) Burlington street can not handle the traffic that would be forced to go down it if the proposed Belmont Ave traffic circle is constructed. The street is too narrow for 2-way traffic, or significant volumes.
  - 3) Sumner Ave, please recall this is Dr. Suess neighborhood, he created the Lorax and the Lorax speaks for the Trees. For 20-35 years the City has tried to re-plant and maintain a tree canopy on Sumner Ave, it appears that the proposal would remove many, if not all the trees from Churchill Street eastbound to Pomona. That is simply unacceptable. In place of these trees we get traffic islands (green space) and the offsets on each side of the intersection. It is not a fair exchange. Further the removal of the trees would leave us with a denuded and barren asphalt landscape. Not acceptable.
  - 4) The Belmont/Commonwealth Ave rotary is another device that has limited utility to the neighborhood. Essentially, we are surrendering our use, access and control of these streets on a 24/7 basis in the hopes that commuter traffic moves quicker.
  - 5) Oakland Street is not an adequate alternative to Belmont Ave. Like Dickinson it is a narrow street and it has a 1000 student school at the Sumner intersection. Mornings and afternoons Oakland St is a place to be avoided. Trying to push outbound traffic through there will simply aggravate any traffic issues.
- Thank you.

OCT 04 2019

MassDOT  
PROJECT MANAGEMENT

September 26, 2019

Patricia Leavenworth, P.E., Chief Engineer  
MassDOT - Highway Division  
10 Park Plaza, Boston, MA 02116-3973  
Attn: Roadway Project Management Section

Dear Ms. Leavenworth

The members of WalkBike Springfield would like to make the following written comments on the Sumner Ave at Belmont Ave and Dickinson Street (The X) Intersection and Related Improvements Project (Project File No. 608717). Some members of our group attended the public hearing on September 17, 2019 and provided spoken comments.

1) The distance between crosswalks at the west end of the project (Main Greeting Road to Oakland) is too great. (The distance from Main Greeting Road to Oakland and Forest Park Ave is about 490 feet and 960 feet, respectively.) There should be a crosswalk with flashing beacon at Sumner Terrance across from the entrance to Forest Park – where pedestrian WILL cross!

2) Minimize the removal of mature trees on the section of Sumner along Forest Park by removing the bicycle lane on the south side as described below and constructing instead an enhanced multi-use path (MUP) for both pedestrians and bicycles on the south side of Sumner. This MUP would replace the existing sidewalk. We suggest that, within Forest Park, the additional necessary width to create the path can extend south towards the park, where there is currently a strip of lawn. This will reduce conflicts with utilities and avoid the removal of trees in the tree belt. Trinity Church has objected to the removal of trees in front of its land, and as a result, might agree to allow the widening of the sidewalk in front of the church if those trees can be saved. We suggest retaining the south bike lane in the design wherever the MUP cannot be accommodated. We suggest that an MUP is quite feasible between Main Greeting Road and Continental Street, and may be possible further east to Parkwood St with careful design.

3) To reduce the need to widen Sumner, reduce the width of the inner travel lane to 10 feet. According to the NACTO Urban Street Design Guide, "For multi-lane roadways where transit or freight vehicles are present and require a wider travel lane, the wider lane should be the outside lane (curbside or next to parking).... Inside lanes should continue to be designed at the minimum possible width. Lane widths of 10 feet are appropriate in urban areas and have a positive impact on a street's safety without impacting traffic operations. For designated truck or transit routes, one travel lane of 11 feet may be used in each direction."

4) The distance for pedestrians to walk between crosswalks is too great between Oakland and Cliftwood (about 1,000 feet). Add a crosswalk with a flashing beacon near the bus stop at Beaumont.

5) Stripe a crosswalk across the entire Cliffwood/Sumner intersection. The design currently does not provide for a crosswalk on the western side.

6) Eliminate the counter-flow bicycle lane on Belmont and add the bicycle lane instead of sharrows on the right side of Belmont, in the direction of traffic. If the counter-flow bicycle lane is retained, the entrance to the lane from the roundabout north of the X must be redesigned. The current design requires cyclists to negotiate a very sharp turn in the same space as motor vehicles entering the roundabout from Belmont.

7) Again, too long a distance between pedestrian crossing east of the X, between Dickinson St and Ormond St. (About 700 feet). Add a crosswalk at Ventura, as there is considerable pedestrian activity in this commercial area and again a bus stop.

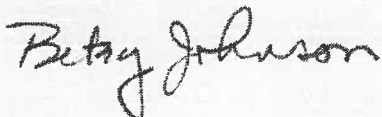

8) The multi-use path through Forest Park needs lighting to improve safety at night. Lighting is currently provided in the design, but at least one commenter at the public hearing objected to it.

9) It is a common theme at MassDOT public hearings that commenters complain about perceived poor notification about the hearing, specifically that written notification is typically limited to a legal notice in one or two local newspapers. This issue came up again at this hearing. Although we understand that a legal notice is a required part of public notice, we would suggest that additional outreach regarding public hearings can be accomplished through two simple zero-cost steps: (1) Contact information for all neighborhood councils in Springfield can be found on a single City www page. An email to the neighborhood council in the affected neighborhood(s) at least one month in advance of the hearing will likely result in a mention at the next scheduled meeting and/or outreach by the council to its members regarding the hearing. (2) Nextdoor.com is a free www service that is organized by neighborhoods. There is likely a Nextdoor.com group for every neighborhood (or town, for small towns that may not have multiple neighborhoods) in Massachusetts. MassDOT can post hearing notifications specific to the municipalities or neighborhoods affected by a project, which will appear on neighborhood- or town-specific www pages (e.g., <https://www.springfield-ma.gov/planning/index.php?id=neighborhoodcouncils>) and emailed to Nextdoor.com members who elect to receive email updates. Using these simple, zero-cost resources will vastly increase the reach of MassDOT's communication efforts. For the immediate future, the illustrations of the project should be available at the Forest Park Library.

10) We would like information on how MassDOT will keep the public informed of future design changes, and how the public can comment on such changes.

Thank you for your consideration of these comments.

Sincerely,
